TETRA4 STRIKES LNG DEAL WITH BULK HAULIERS INTERNATIONAL TRANSPORT

Renergen Limited (Renergen), an emerging domestic natural gas and helium producer listed on the JSE's Alt-X, and the Australian Securities Exchange ("ASX") today announced that its subsidiary Tetra4 (Pty) Ltd, has secured an agreement with Bulk Hauliers International Transport ("BHIT") for the supply of Liquefied Natural Gas ("LNG"). The transaction will fuel approximately fifty trucks using dual fuel technology; significantly reducing operator costs and improving vehicle lifecycle maintenance.

Says Stefano Marani, Renergen CEO, ***"Tetra4 is proud to be associated with BHIT as they embark on their new venture to disrupt the local logistics market using cutting-edge technology and international best practice."***

"As a company, BHIT is committed to providing sustainable transport solutions. Running trucks on locally produced liquid natural gas fits in perfectly with this and we look forward to developing a successful partnership with Tetra4 and extending the benefits of LNG to our clients," comments BHIT Director James Cohen.

BHIT operates a premium fleet of truck-tractor combinations, with a focus on the transportation of general freight and dangerous goods throughout Southern Africa. Tetra4, a vertically integrated gas producer, holds the first and (currently) only onshore petroleum production license issued by the Department of Mineral Resources and Energy (DMRE) through the Petroleum Agency of South Africa (PASA).
