

ASX Announcement

16 March 2020

## Elsight Broadens Partnership with CopterPIX PRO with Purchase Order for Halo units

### Highlights

- **CopterPIX PRO** is a leading drone company focussing on advanced solutions using autonomous drones.
- Following one month of successful Proof-of-Concept (POC) test flights using **Halo**, CopterPIX PRO has elected to expand the ongoing **Halo** POC and purchase an additional 6 **Halo** units for integration with their drone platforms.
- CopterPIX PRO recently won an IDF tender for tactical drone operations, and within the framework of winning the tender, the expanded POC will enable them to conduct drone flights *beyond the visual line of sight* (BVLOS) on a wider scale.

**16 March 2020** — **Elsight (ASX: "ELS")** an ASX-listed company that develops advanced communication technologies for real-time data, video, and audio transmission over cellular networks in mission-critical environments, broadened a Proof-of-Concept (POC) field trial with autonomous drone manufacturer and innovator **CopterPIX PRO**.

Following one month of intensive and successful POC test flights with using Halo, CopterPIX PRO has elected to expand the ongoing Halo POC and purchase an additional 6 Halo units for integration with their drone platforms. The expansion of the POC comes after CopterPIX PRO won an IDF tender for tactical drone operations (an article describing the IDF tender: <https://www.haaretz.com/israel-news/business/.premium-tiny-startup-beats-the-giants-for-israeli-army-drone-contract-1.7025982>). Within the framework of winning the tender, the expanded POC will enable CopterPIX PRO to conduct BVLOS drone flights on a much wider scale and will pave the way towards the integration of their solution within the IDF as the latter continues to transition to a greater emphasis on autonomous and robotic warfare.

Following the expansion of the POC, **Nir Gabay, Elsight CEO said:** "We are very excited to announce the expansion of our partnership with CopterPIX PRO and are thrilled that they have selected Halo as their drone connectivity solution. We look forward to continuing to deepen our partnership moving forward as we set our sights on additional BVLOS drone flight milestones."

**Alon Svirsky, CEO of CopterPIX PRO said:** "After a highly successful month of test flights using Halo, we have reached the conclusion that Elsight's unique solutions simply do not exist elsewhere in the market. We are excited to announce the deepening of our partnership with Elsight and the expansion of the ongoing Halo POC, and we look forward to expanding the integration of Elsight's cutting-edge technology across our platforms as we maintain our focus on making BVLOS drone operations a widespread reality. I have no doubt that with Elsight's technology integrated within our platforms we will succeed in doing so, both in Israel and around the world."

*Authorised for release by the board of directors of Elsight Limited.*

**About Elsight**

**Elsight** ([www.elsight.com](http://www.elsight.com)) is a solution provider of ground-breaking hybrid video and data transport services (on-the-move or fixed) for large Safe-City projects, sensitive facilities management, and surveillance and protective activities. The platform supports data and video capturing, recording, and highly secured transmission against data and video interception and hacking. **Elsight's** platform was designed to address the most demanding requirements of Special Forces across enemy lines and sophisticated intelligence organisations. These systems underwent the most rigorous testing in combat situations as well as extensive testing by the most demanding laboratories. As a result, they present an unmatched level of reliability, lowest latency, and highest adaptive bandwidth over cellular networks that enables HD and 4K TV transmission quality, with "never-fail" redundancy and much more. For the first time they offer strict military requirements for civil usage. **Elsight's** customers range from defence and homeland security to industrial security, broadcasting, first responders and healthcare.

**About CopterPIX PRO**

**CopterPIX PRO** (<http://www.copterpix.pro/>), an Israeli boutique workshop which specializes in designing, developing and manufacturing unique and advanced UAV solutions for special assignment with outstanding drone's expertise. They offer their clients both engineering and software development along with aerial services through their subsidiary CopterPIX Aerial photography LTD. **CopterPIX PRO** works closely with the world's leaders' integrators and manufacture of HLS, military industries and aerospace industries. Their unique drones fly 25% longer, equipped with the world's leading day \ night cameras, real time advanced image processing, precise landing, unique GC and unique docking stations.
