## COVID-19 Update

2 April 2020

MELBOURNE, Australia – SDI Limited (ASX: SDI) is monitoring the effect of COVID-19 pandemic on its staff and global operations, with the health and safety of its employees and the operations of the business being paramount.

The Company has implemented plans to reduce exposure to its employees and address operational changes required to maintain business continuity. These plans have been implemented across SDI's global operations and will continue to be amended as the situation evolves.

The full effect of COVID-19 on the Company's global business remains uncertain. However, current indications suggest that global sales for the last quarter of the financial year will be materially reduced, reflecting the reduced operations of dental offices around the world and the Company's distributors. At this stage, it is difficult to quantify the full impact on sales. SDI's vast global markets are all affected, with many dental offices currently only treating emergency cases. The Company will continue to adjust its operational and capital expenditure accordingly.

Reflecting the strength of the Company's balance sheet, SDI's fully franked interim dividend of 1.35 cents per share as previously announced on 14 February 2020 will be paid on 17 April 2020.

**This announcement is authorised by the Board of Directors**
