Avecho Quarterly Activities Report and Appendix 4C

Melbourne, Australia, 29 April 2020 - Avecho Biotechnology Limited (ASX: AVE) ("Avecho" or the "Company"), a company that develops and commercialises innovative Human and Animal Health products using its proprietary drug delivery system called TPM®, is pleased to release its Quarterly Activities Report and Appendix 4C for the quarter ended 31 March 2020.

Key Highlights

- Continued advancement of Avecho's Human and Animal Health Programs.
- Avecho commences development of oral cannabinoids combined with TPM® to enhance absorption.
- Changes to Leadership Team saw Dr Paul Gavin promoted to CEO and Dr Roksan Libinaki COO.
- Cash balance at the close of quarter of A\$3m and net operating outflows of A\$340K, including A\$115K invested in R&D activities.

Operations

Our core injectables program continued to advance, with a number of products formally passing stability. Working with known injectable drugs that have solubility problems, we have reformulated them using our TPM® technology. Our Propofol TPM® formulation, previously partnered with Terumo, was successfully reformulated and has resumed development. Other injectable programs, including Daptomycin TPM®, were presented in business development discussions.

The Company continued to pursue animal health opportunities with third parties. A number of our commercial partners continued to evaluate the utility of TPM® in feed and veterinary products for livestock. Performance and proof-of-concept studies are being undertaken by and with these partners. Avecho's application to the European Food and Safety Authority (EFSA) for TPM® to be utilised as a feed additive to the EU was, and still is, under review.

Avecho commenced initial development of an oral cannabinoid product to address the growing pains associated with the medicinal cannabis market. The early work undertaken by Avecho and partners demonstrated that TPM® could increase the solubility of cannabinoids, a limitation that leads to poor oral bioavailability, high variability in absorption, and difficulty in developing aqueous dosage forms. This work led to the subsequent announcement of partnerships with both Purisys and Tasmanian Alkaloids, released in April 2020. Avecho's cannabinoid program will develop a pharmaceutical dosage form of our own and will support the benefits of including TPM® in natural medicinal cannabis extracts. This will open additional licensing opportunities for the use of TPM® in third-party medicinal cannabis products, both in Australia and large North American markets.

During the quarter, Avecho began a management restructure. Mr Matthew McNamara was appointed to the Board as a Non-Executive Director, effective 13 January 2020. Mr McNamara's extensive expertise in the healthcare and medical sciences sector was seen as a tremendous asset for the Company. The Management restructure was finalised in April 2020, with the appointment of Drs Paul Gavin and Roksan Libinaki, as CEO and COO, respectively.

Corporate

During the quarter, Avecho had net operating cash outflows of A\$340K with A\$115K internal salary costs allocated to R&D programs. At the end of the quarter, the Company held A\$3m in cash. The Company remains committed to the R&D programs, while continuing to demonstrate prudent cash management and adapt its operational policies and procedures in line with COVID-19 mitigation measures.

Payments to related parties and their associates during the quarter as outlined in Section 6 of the accompanying Appendix 4C to this quarterly activities report were A\$81K. These payments are related to executive director salaries and non-executive director fees for the quarter.
