ASX Announcement

## **Most advanced TYMLEZ blockchain solution platform now available for Google Cloud Platform Users**

TYMLEZ Group Limited (ASX:TYM) (“**TYMLEZ**” or the “**Company**”) is pleased to announce that the latest release of TYMLEZ Blockchain solution platform (**TBSP**) on Google Cloud Marketplace (**GCP**) is now LIVE.

This new release of TYMLEZ Blockchain solution on the Google Cloud Marketplace offers a number of new features, such as an escrow smart contract templates, the ability to create new applications by uploading custom plugins to TBSP on Google Cloud Platform, as well as the ability for enterprises to create their own smart contract flows and applications via the Node-RED UI.

The new release also comes with enhanced security features, such as the application key requirement that prevents unauthorized users from posting transactions to the blockchain. This is especially important, given the recent announcement by the Australian government to inject \$1.35 billion towards cyber security.

The TYMLEZ Blockchain solution platform also comes with FIDO-U2F as second-factor authentication, providing full end to end encryption using W3C Webauthn Standard and U2F-enabled hardware security keys, such as Yubikey.

The new release will further simplify the deployment and use of Blockchain-based solutions and enable global small, medium and multi-national enterprises, to implement automation through smart contracts, data logging and digital ownership rights in hours rather than months.

This release brings even more advantages to the enterprise.

In addition to “track and trace” in supply chain management, managing proof of existence as of a specific time via time stamp transactions, this new version also provides an escrow smart contract template, which ensures trustworthy, transparent and immutable transfer of assets between two parties.

**Reinier van der Drift, CEO of TYMLEZ, adds: “It’s an exciting time for us. As we’re moving more and more in the Australian market, the availability of our complete stack on Google Marketplace, will prove to be a value asset for our future education partners as well as customers in Australia.**

***It will provide them with a 1-click-deployment of one of the most advanced blockchain stacks currently on the market in terms of speed, security, stability and ease of use.”***

Blockchain designed for business. TYMLEZ provides a highly scalable, multi-tenant, enterprise-grade smart contract blockchain platform which can be deployed in minutes and / or implemented via partners within an enterprise or across a consortium. We bring commercial-grade blockchain technology to the enterprise. We do this by delivering a scalable platform which enables accelerated development, management, and deployment of enterprise blockchain applications.
