

Global Health Signs Peninsula Health for Community Health

Australian Healthcare Software provider **Global Health Limited (ASX: GLH)** (“**Global Health**” or “**Company**”) has made a significant inroad into the Victorian Community Health Sector with the signing of **Peninsula Health** on a 3-year contract, with the first year of services and licensing revenue totalling \$725,000.

Key Highlights

- Implementation of MasterCare EMR (Electronic Medical Record), MasterCare+, ReferralNet Secure Message Delivery and Dashboards-as-a-Service
- Combined \$725,000 in revenue from initial year of the contract
- Over 800 new users on the MasterCare platform
- Integration with DXC Technology’s i.PM
- Integration with Cerner Corporation's Clinical Applications

Global Health’s rapid adoption through the Victorian Community Health setting has further extended its reach by landing Peninsula Health, one of Victoria’s largest Community Healthcare providers, on a 3-year contract. Not only will this contract increase users on Global Health’s MasterCare platform, it will also have MasterCare integrate with DXC Technology’s i.PM Patient Administration System and Cerner Corporation's Clinical Applications.

Global Health’s MasterCare platform will enable Peninsula Health to meet the key reporting requirements for the NDIS (National Disability Insurance Scheme), HACC (Home & Community Care), CHSP (Community Home Support Program), VADC (Victorian Alcohol & Drug Collection) and VINAH (Victorian Integrated Non-Admitted Health) programs, as well as provide support for their Allied, Community and Mental Health users.

Breaking into the Victorian Metropolitan Region

Peninsula Health is the newest name to join Global Health’s growing Victorian Community Health Network, and the first major player from the Victorian Metropolitan region.

Global Health has already accomplished a widespread adoption across the Victorian Community Health setting, with **Ballarat** Community Health, **Bellarine** Community Health, **Sunraysia** Community Health, **Bass Coast** Health, **Monash** Health and **Windana** Drug and Alcohol Recovery on the list of organisations who signed in the last 24 months.

The demand for Global Health's **MasterCare Solution** has grown in recent months due to the increase in reporting requirements for Victoria's major health programs.

"The modern-day Community Health organisation must report in up to 10 different formats just to meet their funding obligations. Using MasterCare allows them to achieve this in a single integrated platform", said **Kye Cherian, General Manager of MasterCare**.

"MasterCare is a comprehensive Client management and Clinical solution that has modules for Scheduling, Billing, Claiming, Referral Management and a whole suite of clinical features that add great value to all facets of a health service."

Global Health is continually investing in the MasterCare platform to ensure its functionality remains at the front of the Victorian Community Health landscape. This includes the development of the new MasterCare+ platform which is set to be the catalyst in achieving the Global Health vision.

Integrating with DXC Technology's i.PM and Cerner Corporation's Clinical Applications

The Peninsula Health contract will also see Global Health's MasterCare solution integrate with DXC Technology's i.PM software, as well as Cerner Corporation's Clinical Applications, for the first time.

In commenting on the integration, Managing Director of Global Health, Mathew Cherian said:

“This integration will open up the possibility of deploying MasterCare alongside these applications across a number of other major health providers within Victoria and Australia wide.

It aligns not only with our vision of a more Connected Healthcare Eco-system, but also opens up further opportunities for expansion for both MasterCare and Global Health in the future.”
