COMPANY UPDATE

Melbourne, Australia, 5 October 2020: Eco Systems Ltd, (ASX: ESL) (“Eco Systems” or “the Company”) would like to provide its Shareholders with the following Company update.

Over the course of this year, the Board has been looking at its options that would achieve our re-listing on the ASX. A transaction has been identified and the Company has been working towards this end. Unfortunately, with what has occurred during 2020, the transaction could not be completed in the time frame. Fortunately, the transaction that was chosen still has merit going forward with both parties committed to moving forward and, if successful, would require the Company to make application to the ASX for the Company to operate as a listed concern.

While there has been a lot of work completed, the timing delay dictates that it has not been finalised in the window required to maintain the Company’s listing, however, the Board continues to move toward this goal and will update shareholders at the appropriate point in the transaction.

While not ideal, the Board believes that, if the transaction is successful, shareholders will benefit in the long term and this transaction is in the best interest of the Company.

-Ends-
