ASX Announcement

MAYNE PHARMA PROVIDES UPDATE ON WOMEN'S HEALTH PIPELINE

6 October 2020, Adelaide Australia: Mayne Pharma Group Limited (ASX: MYX) has received a complete response letter (CRL) from the US Food and Drug Administration (FDA) in relation to its abbreviated new drug application (ANDA) for a generic version of NUVARING®.

Mayne Pharma is working closely with its development partner, Mithra Pharmaceuticals, and the FDA to address the questions raised in the CRL. Following submission of the response to the CRL, Mayne Pharma will then receive a new target action date from the FDA.

Mayne Pharma's CEO Scott Richards said, "We are confident we can address the issues raised in the letter in a timely manner. Pleasingly, the FDA has indicated that Mayne Pharma and its development partner Mithra have an acceptable manufacturing process for generic NUVARING. Furthermore, the market opportunity continues to be highly attractive with only one independent generic approved and an addressable market of US$920m[1]."

The company also recently participated in a mid-cycle review meeting with the FDA regarding the New Drug Application (NDA) for NEXTSTELLIS™ to prevent pregnancy. The FDA did not raise any substantive issues at the meeting and indicated that no major safety concerns have been noted at this point in their review.

"The NEXTSTELLIS mid-cycle review meeting with the FDA provided us with some insights into the review process so far, and we are pleased that no significant issues and no major safety concerns were raised. This meeting marks the halfway point of the NEXTSTELLIS NDA review process, and with approximately six months until the PDUFA date, we continue to advance our US commercial strategy and infrastructure to support the potential launch of this novel contraceptive in the first half of calendar 2021."

The Company has also received a CRL on its potential first-to-market women's health generic product with an addressable market of US$160m[1]. Importantly, the FDA has found all key disciplines of the ANDA adequate with the exception of the packaging facility which was assessed by a desk-top audit rather than an in-person inspection due to COVID-19. Mayne Pharma is working closely with the FDA and its development partner to close out this application as soon as possible.
