

CONNEXION™

FY20 AGM Presentation

November 2020

20

Important General Information

This presentation (“**Presentation**”) is issued by Connexion Telematics Limited, ABN 68004240313 (“**Company**”) and has been approved by the Board of the Company.

The information in this Presentation does not constitute financial product advice (nor investment, tax, accounting or legal advice) and has been prepared without taking account of any person’s investment objectives, financial situation or particular needs. You should read the entire Presentation in its entirety and consider all of the risk factors that could affect the performance of the Company in light of your particular investment objectives, financial circumstances and particular needs (including financial and taxation issues) and seek professional advice from your accountant, financial adviser, stockbroker, lawyer or other professional adviser.

Statements in this presentation are made only as of the date of this Presentation unless otherwise stated and the information in this Presentation remains subject to change without notice. The Company is not responsible for updating nor undertakes to update this Presentation. The historical information in this Presentation is, or is based upon, information that has been released to the market. The Presentation contains reference to certain intentions, expectations and future events. Whilst the Company has reasonable grounds for these references, they are subject to factors some of which are outside the Company’s control.

This Presentation is not a prospectus, disclosure document, product disclosure statement or other offering document under Australian law or under any other law. It is for information purposes only and is not an invitation, nor offer of securities for subscription, purchase or sale in any jurisdiction. This Presentation does not purport to contain all the information that a prospective investor may require in evaluating a possible investment in the Company nor does it contain all the information which would be required in a prospectus or product disclosure statement prepared in accordance with the requirements of the Corporations Act.

This Presentation does not and will not form any part of any contract for the acquisition of Securities.

Who We Are & What We Do

Connexion Telematics Ltd is an ASX-listed Enterprise-grade software company servicing the US automotive software market.

Our proprietary software incorporates telemetry, fleet management, contract management and data analytics tools to deliver solutions to the global automotive sector.

Our cornerstone OEM client is General Motors (US), for whom we exclusively power its Courtesy Transportation Program (CTP) via our proprietary software.

Courtesy Transportation Program

**GM's OnTRAC – powered by a Connexion
Telematics Ltd SaaS solution**

GM uses OnTRAC exclusively to manage its CTP:

On > OnSTAR
T > Telemetry
R > Reporting
A > Analytics
C > Contracts

Main characteristics of GM's CTP

Incentives

Offers dealers an incentive to maintain a GM service/rental fleet rather than having an in-store rental agency such as "Enterprise" or non-GM vehicles at GM Dealerships. Further incentives are triggered as cars are placed into the hands of consumers.

Courtesy Cars

Allows Dealers to provide courtesy cars to service customers up to 30 days.

Demo Cars

Allows Dealers to provide extended test drives of up to 4 days.

Loan Cars

Allows Dealers to rent vehicles to customers who want to drive them longer.

Customer Service

Increases the level of customer service.

Loyalty

Creates loyalty by rewarding drivers who own GM vehicles: Chevy, Buick, Cadillac and GMC.

Choice

Gives Dealers a choice of vehicles best suited to their markets.

Marketing Mechanism

CTP coordinates the various forms of value provided above to form a strong marketing mechanism for GM. Numerous other manufacturers operate similar programs.

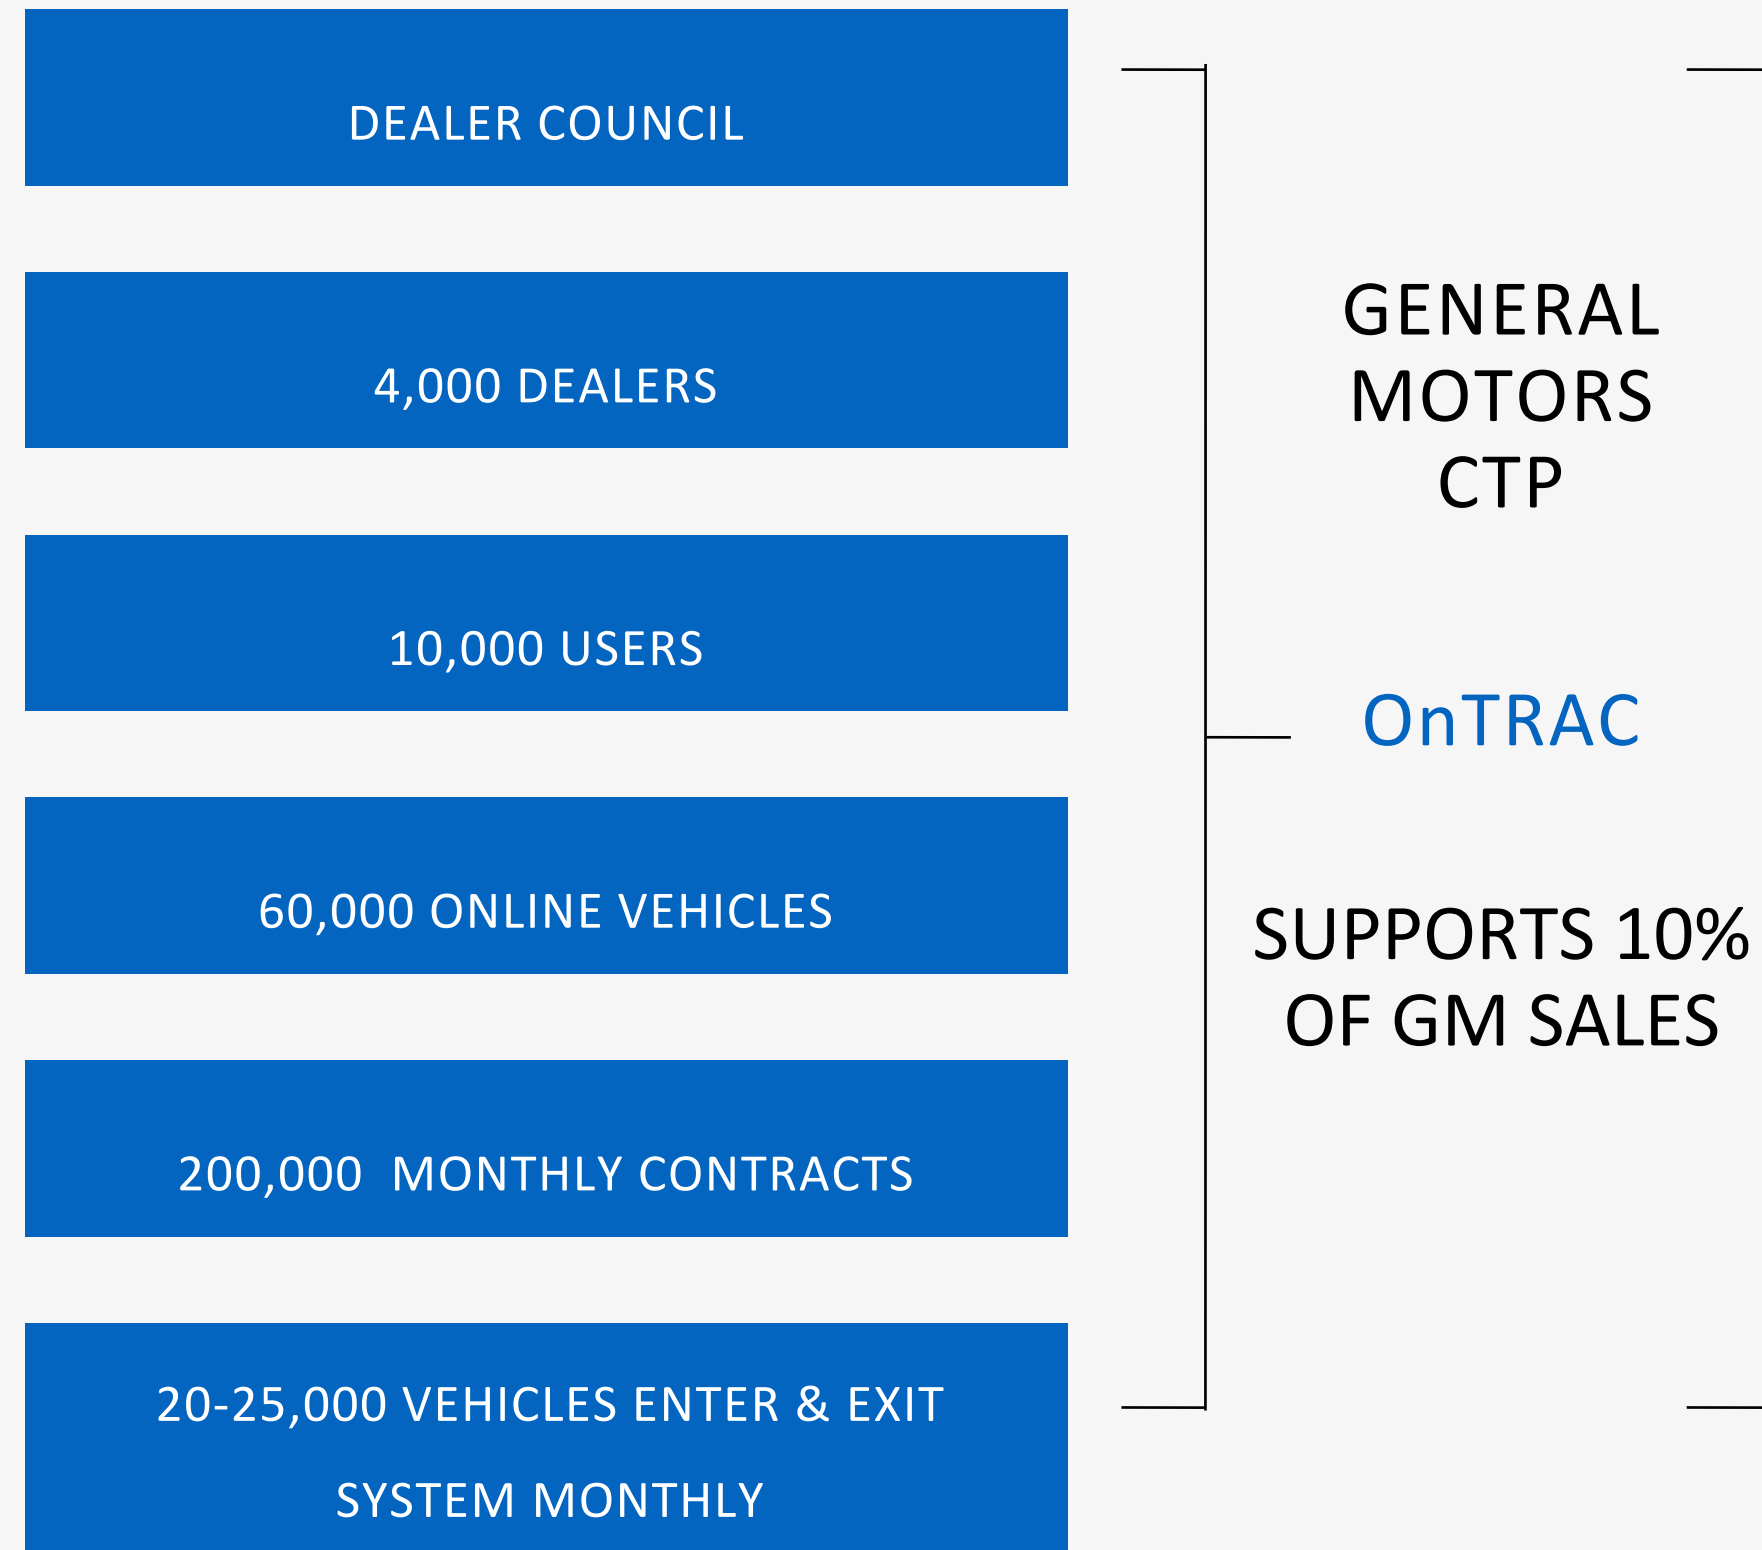

OnTRAC

GM's OnTRAC – powered by a Connexion Telematics Ltd SaaS solution

Over 2 Million contracts are issued annually on our software platform

Platform Data (US only)

OnTRAC supplies a range of tools to both the OEM and Dealer, covering:

- Telemetry
- Reporting
- Analytics
- Contracts

Barriers to Entry

There are numerous barriers to potential competitors wishing to enter the market.

Over \$5m+ in development cost
or more for other 1st tier providers

Training cost of over 10,000 users

Encapsulated business rules
based on CTP

Solutions integrated
with other GM partners – difficult to untangle

Trusted relationship
built over many years of doing business

Transition cost
time, development, training, roll-out, support and uncertainty of output/results)

Risks to GM
uncertainty in output/usability/performance/reliability

Cost effectiveness
current solution is very lean

FY20 Highlights

✓ Revenue of \$8.20M – 131% increase Vs FY19

✓ NPBT of \$2.05M – 340% increase Vs FY19

✓ Free Cashflow of \$1.49M – 254% increase Vs FY19

✓ Working Capital of \$3.35M – 256% increase Vs FY19

✓ Tech and Support Team expanded by 33%

✓ Significant ongoing enhancements to the OnTRAC program

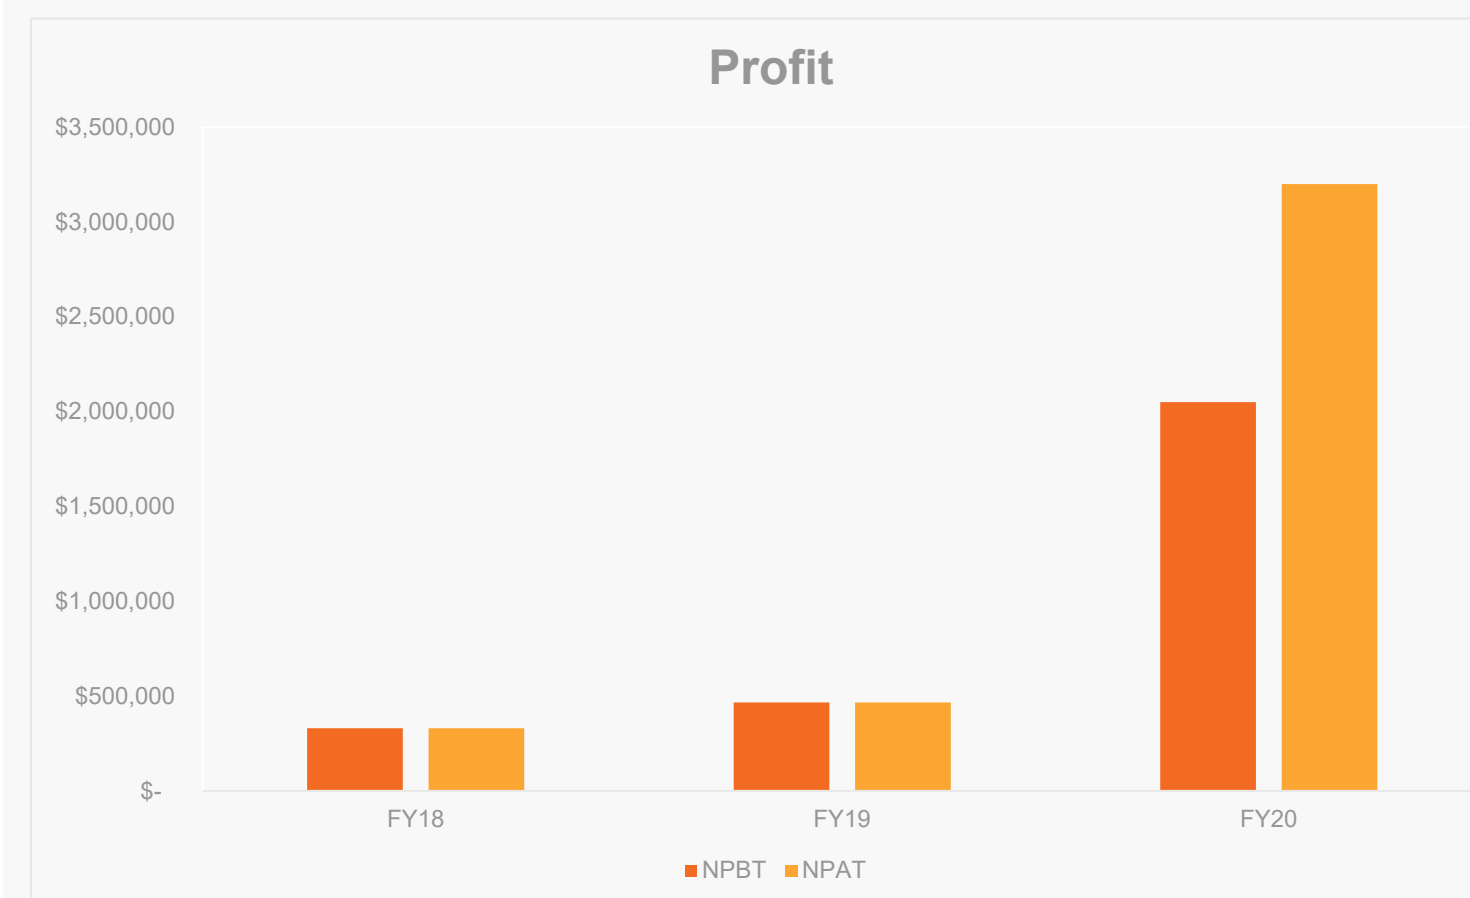

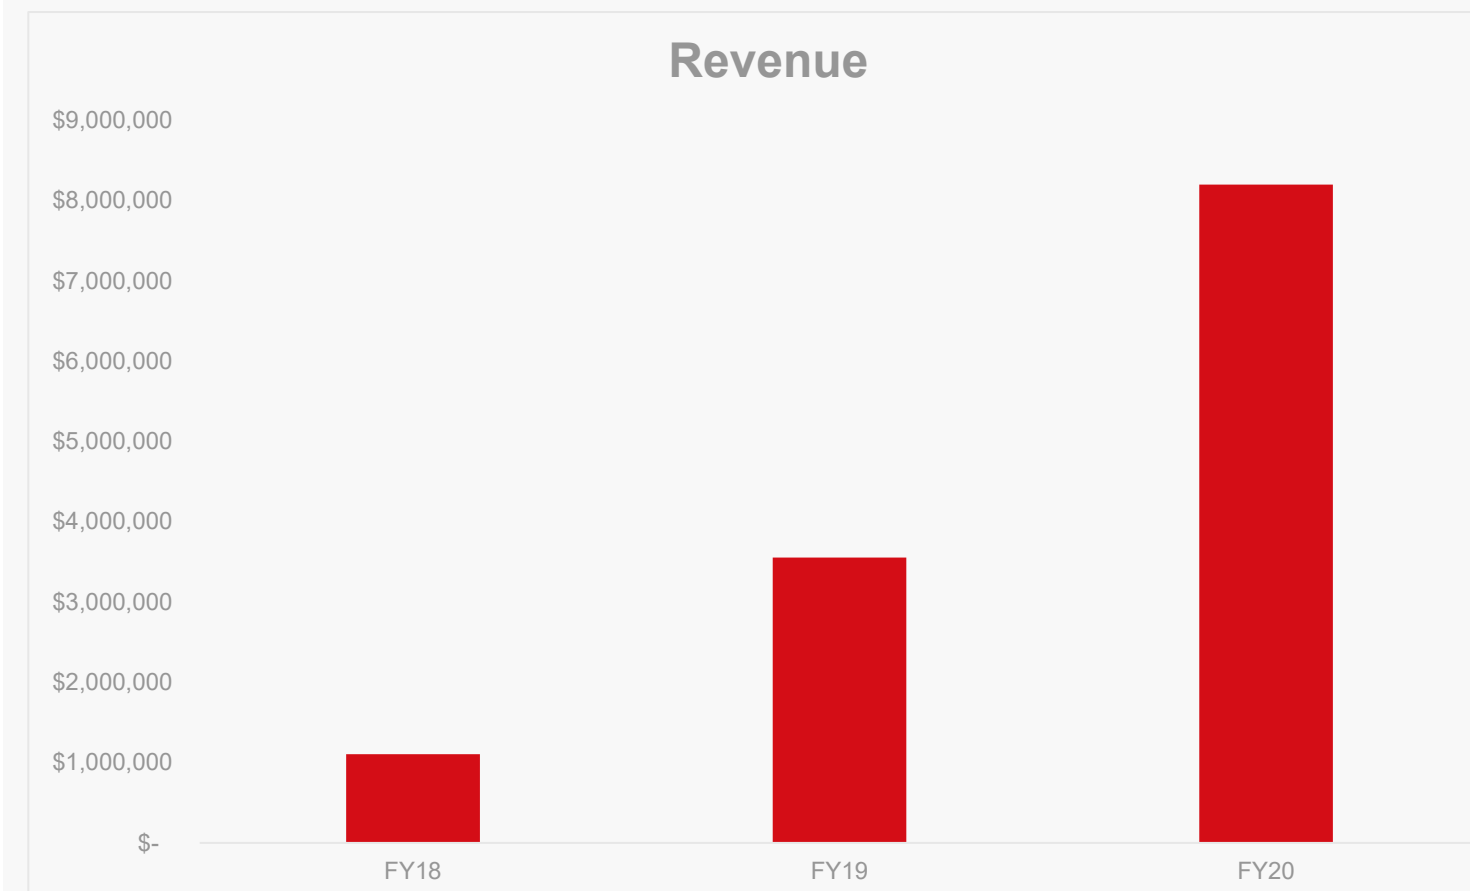

✓ New recurring revenue streams identified within the ecosystem

FY20 Highlights

Our P&L exhibits strong operating leverage typical of a SaaS company at an early stage of profitability.

Balance Sheet quality continues to improve, with no debt and strong free cashflow conversion.

Our growing cash balance offers both optionality and defensive characteristics.

Economic Drivers

FX → uncontrollable

Subscriptions → limited control

Team Performance → controllable

- As a Company with both strong operating leverage and USD revenue, movements in the AUD/USD exert a material influence over Company earnings. Virtually all of the Company’s gross margin is earned in USD, whilst the majority of its fixed cost is denominated in AUD.
- As reported throughout the year, COVID-19 has impacted the number of vehicles on GM’s CTP (“subscription numbers”) which, in turn, impacts Company earnings. In recent months, subscription numbers have stabilised. Longer-term we are responsible for growing our revenue beyond CTP.
- Underlying operating performance is the final driver. Notwithstanding the two major uncontrollable variables above, Connexion’s Team continues to deliver pleasing performance at an operating level.

Operating Model

via Functionality

Integrate
via API

Generate
Data Insights

Operating Model

Embed

via Functionality

- Executing Customer-Driven Product Roadmap
- Notably strong track record of delivery since 2017
- Customer-driven approach enables low marketing cost & high OEM satisfaction
- Feature enhancements improve both User and Consumer experience
- Feature enhancements improve product stickiness
- Typically self-funding, and profitability grows over time

Examples of such functionality can be found here:

<https://www.connexionltd.com/products/custom-solutions/>

Operating Model

Integrate

via API

- Ecosystem integration improves functionality and reduces double-entry
- Execution underway in 2020 with multiple DMS integrations commenced
- Integration enhancements improve both User and Consumer experience
- Integration enhancements improve product stickiness
- Modest initial investment, and profitability grows over time

Operating Model

Generate

Data Insights

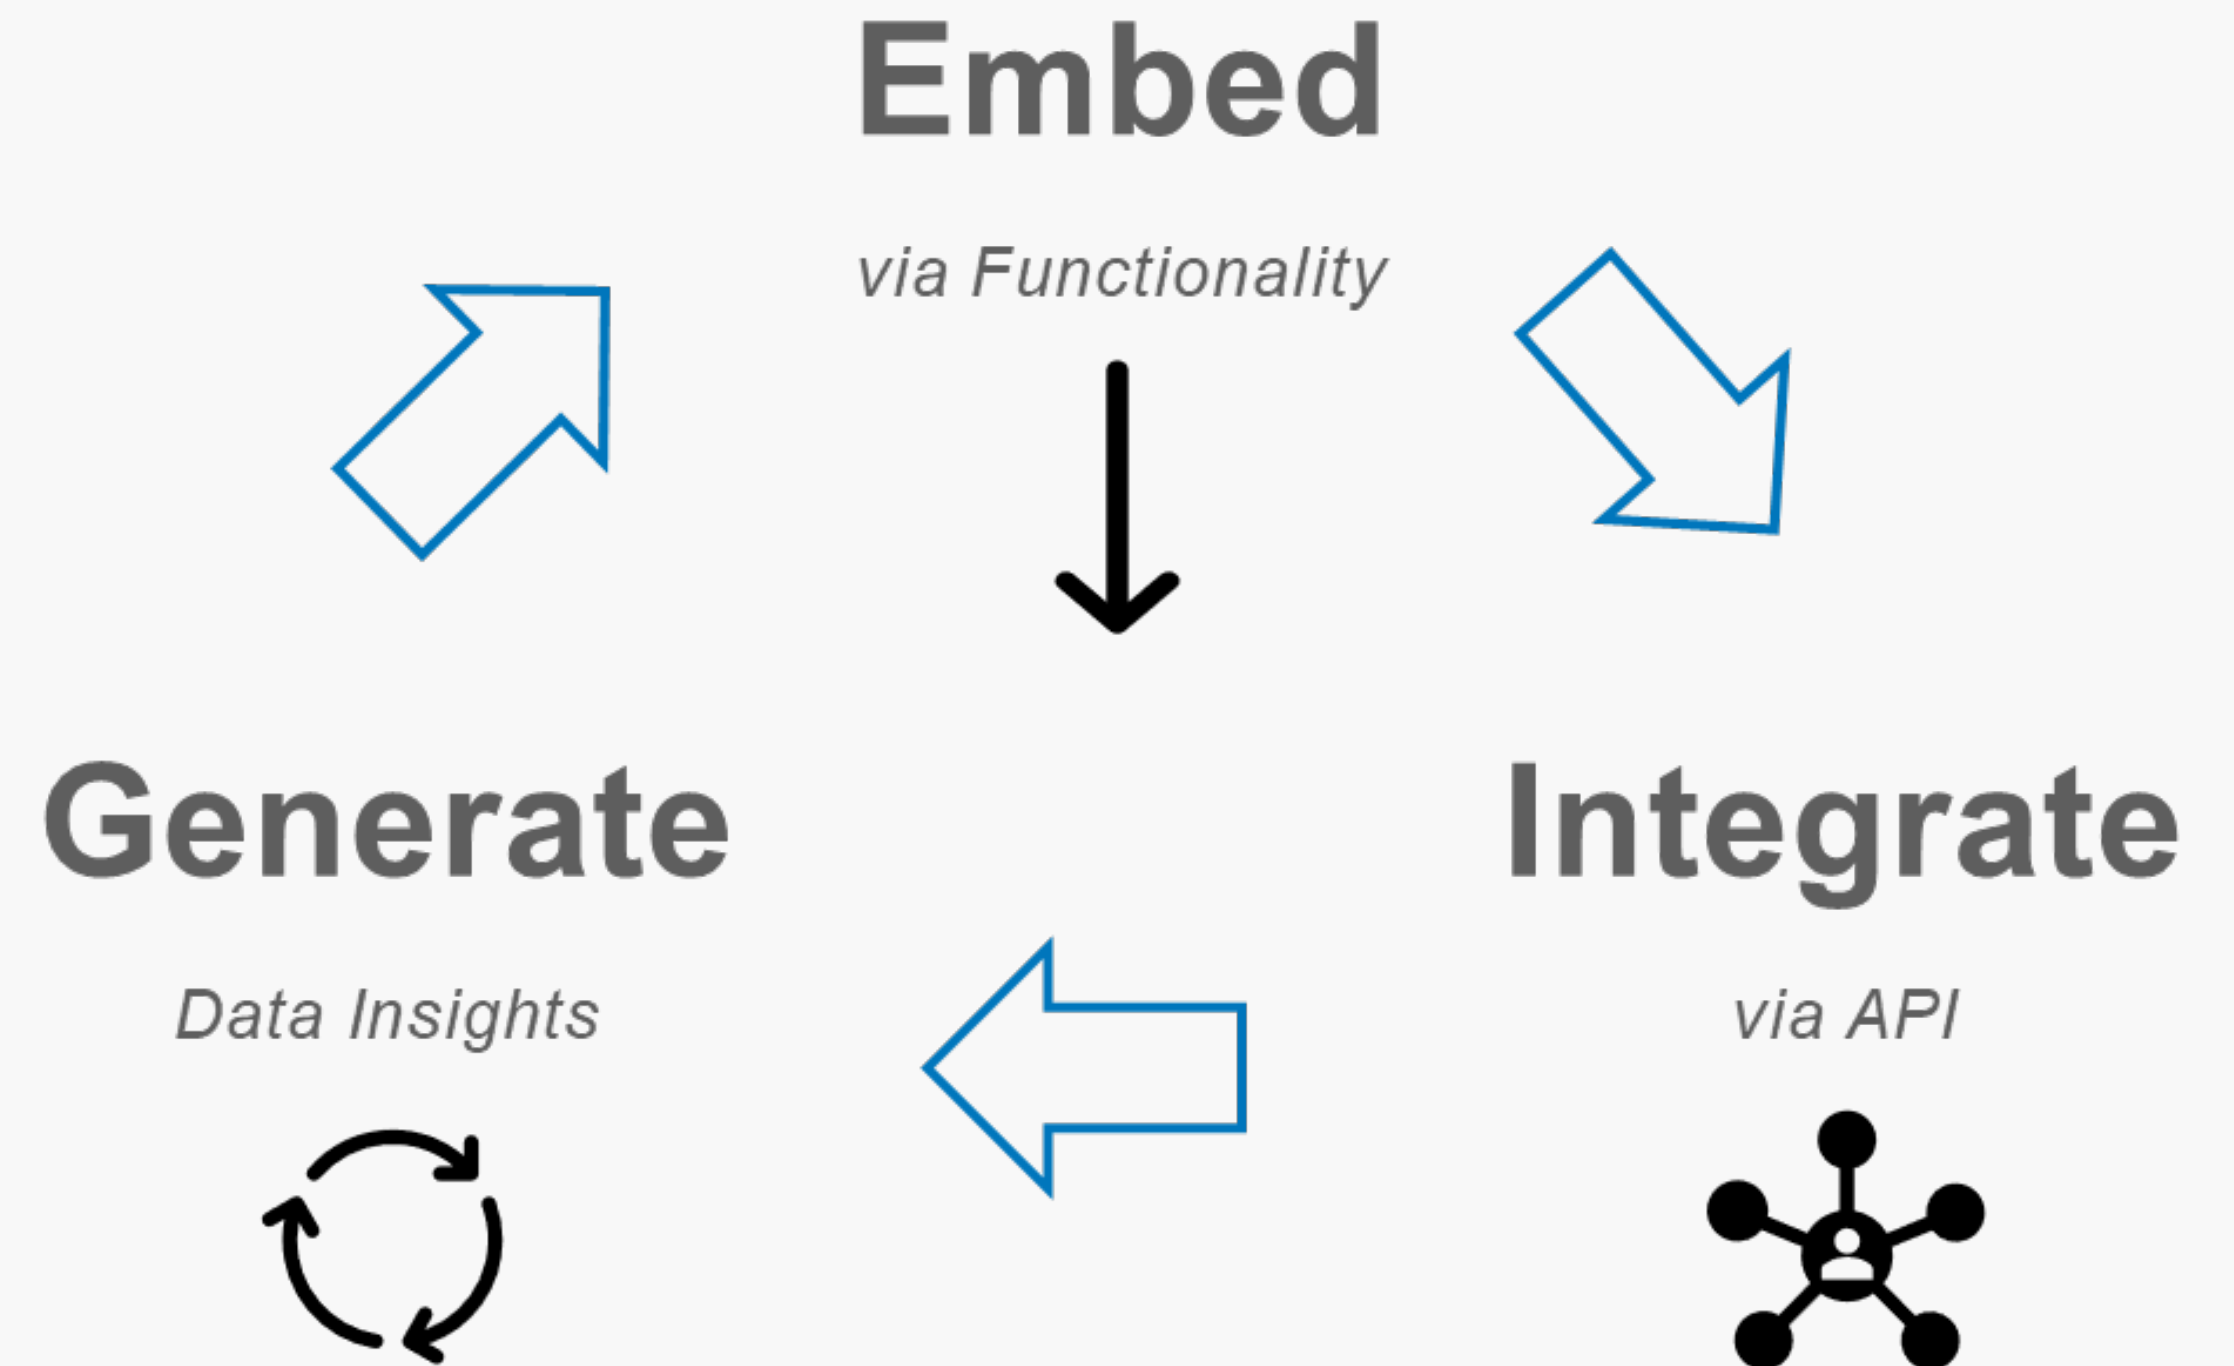

- Data Analytics is one of technology's strongest growth sectors
- Execution underway in 2020 with nominal initial revenues
- Access to Data Insights improves the User experience
- Application of Data Insights improves product stickiness
- Modest initial investment, and profitability grows over time

Operating Model

Operating as a feedback loop, each step not only adds to profitability, but strengthens our moat.

In turn, this enhances our strategy of operating at the intersection of Business Process Outsourcing, Customer Experience and Sales

Sales Model

Customer Driven Sales Strategy:

- Connexion sells to the OEM
- OEM sells to the Dealerships
- Connexion sells further to the Dealerships
- Dealerships sell to the Consumer

OEM Sales

CXZTRAC

Dealership Sales

Lot Management (non-CTP), Concierge, Rental Platform etc

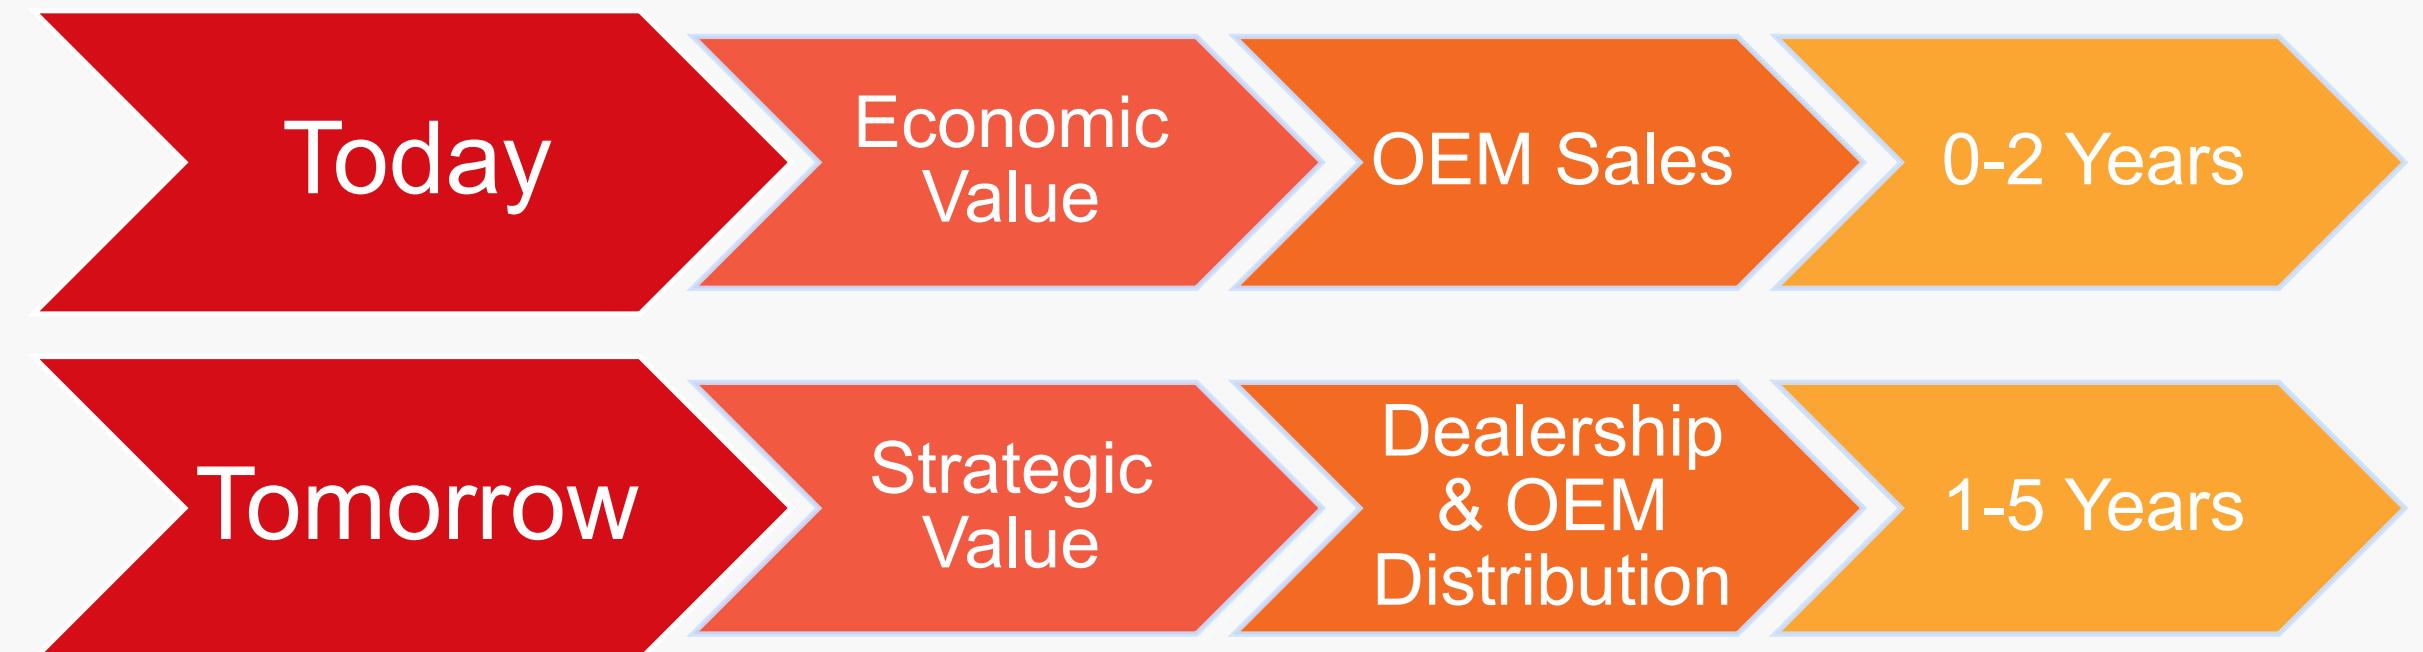

Consumer Sales

Consumer Apps

NOTE: At this stage, “Consumer Sales” merely represents optionality inherent in Connexion’s strategy by way of its distribution network. There are no current plans to develop this component.

Sources of Value

Sources of Value

Generating Economic Value

2017 Onwards.
OEM Sales – existing product.
A small number of potentially large-ticket revenue prospects.
Lumpy revenue growth.
Long lead times.
US BDM appointment imminent.
Multi-pronged sales approach implemented using existing internal product champions.

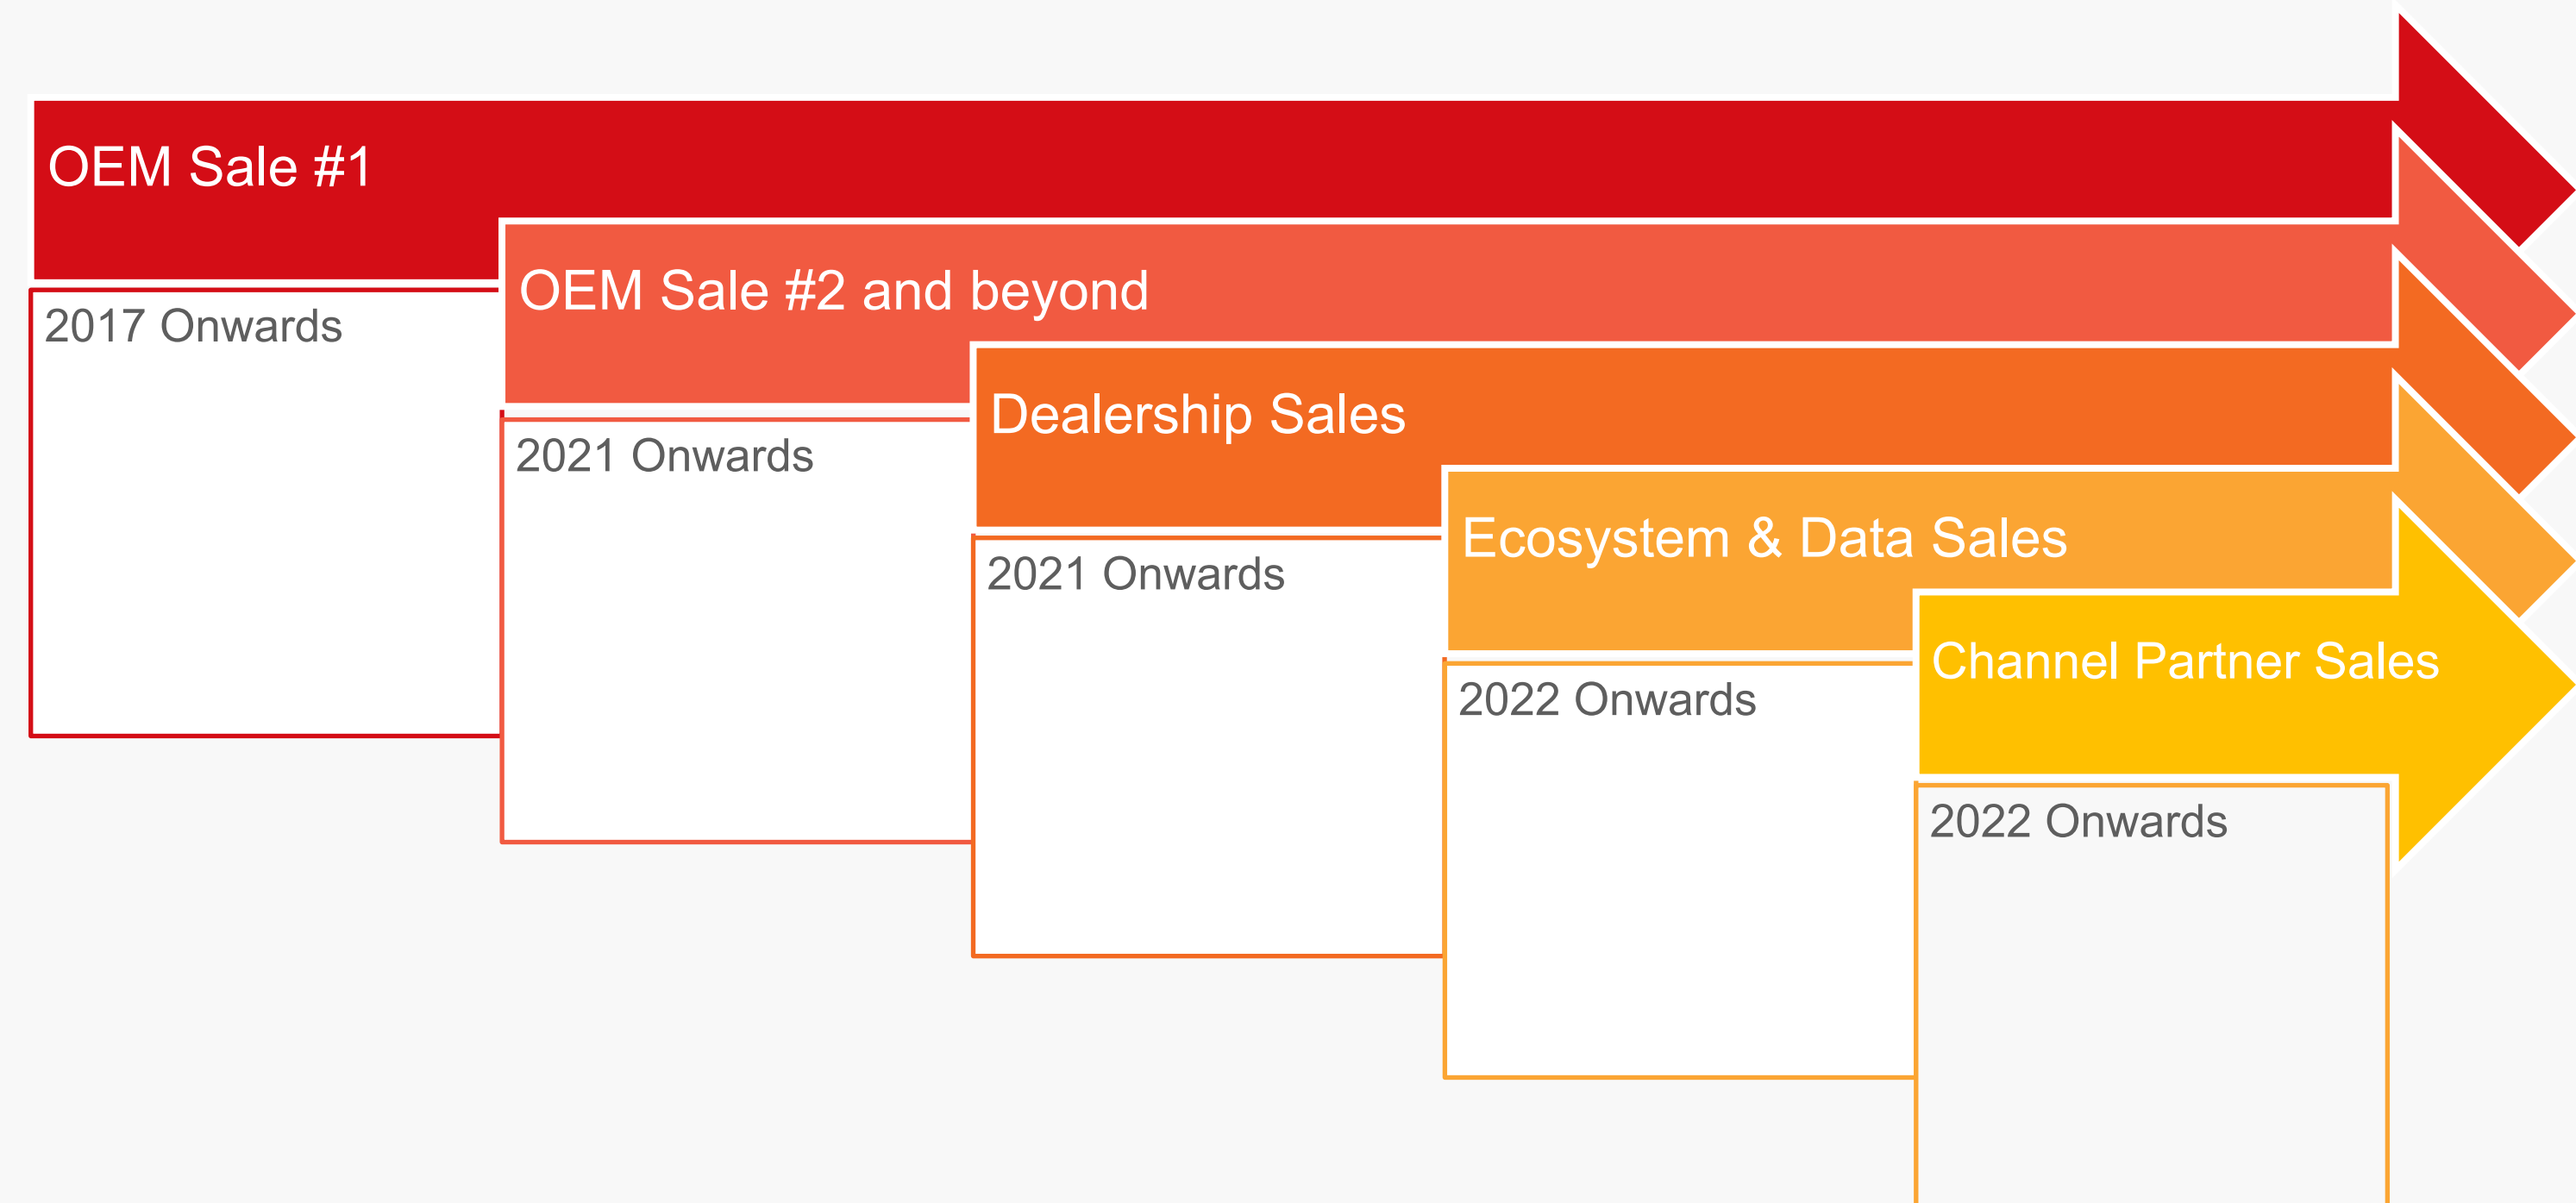

Building Strategic Value

2020 Onwards.
Building the value inherent in both our OEM and Dealership distribution channels.
Already, approximately 22% of all Light Vehicle Dealerships in the US use Connexion's software.
For context, the largest DMS provider in the US has ~45% share.
These channels are suitable for both our proprietary products, and potentially 3rd party product as well.

Commercialising Strategic Value

2021 Onwards.
Commercialising the value inherent in both our OEM and Dealership distribution channels.
Value can be commercialised organically or via channel partnerships in either direction.
A larger number of small-ticket revenue prospects.
Incremental revenue growth.

Sources of Value

Summary

Connexion Telematics Ltd is a **well-established** supplier of **proprietary enterprise software** to one of the world's largest global brands.

There are **high barriers to entry** for competitors in terms of both time and cost, and there is **significant opportunity** for us to **broaden and deepen** our service offering within this large ecosystem.

The **disciplined approach** of both Management and Board towards execution and capital management has delivered **significant shareholder value** to date and this is expected to continue.
