

9th December 2020

dorsaVi signs evaluation agreement with Medtronic

Key highlights

- **Medtronic signs a minimum 6-month evaluation agreement with dorsaVi**
- **As part of their evaluation, Medtronic will utilise dorsaVi's technology to assess patients alongside leading clinicians**

Melbourne, Australia, 9th December 2020: dorsaVi (ASX: DVL) (**dorsaVi** or the **Company**) is pleased to announce an initial 6-12-month agreement with Medtronic, in which Medtronic staff will work alongside leading clinicians to evaluate and test dorsaVi's technology to assess patients undergoing surgical evaluation.

Medtronic plc, headquartered in Dublin, Ireland, is among the world's largest medical technology, services and solutions companies – alleviating pain, restoring health and extending life for millions of people around the world.

Dr Andrew Ronchi, dorsaVi's Chief Executive Officer, said:

"We are excited to initiate a relationship with Medtronic where dorsaVi has specific and market-leading knowledge. Over the next 6-12 months, we look forward to showcasing the value of our technology. This partnership aims to capture novel insights that we are confident will help Medtronic achieve better clinical evaluations for patients. This deal builds on dorsaVi's strategy to expand our channel partnerships and deliver shareholder value."

About dorsaVi

dorsaVi Ltd (ASX: DVL) is an ASX company focused on developing innovative motion analysis device technologies for use in clinical applications, elite sports, and occupational health and safety. dorsaVi believes its wearable sensor technology enables, for the first time, many aspects of detailed human movement and position to be accurately captured, quantified and assessed outside a biomechanics lab, in both real-time and real situations for up to 24 hours. dorsaVi's focus is on two major markets:

- **Workplace:** dorsaVi enables employers to assess risk of injury for employees as well as test the effectiveness of proposed changes to OHS workplace design, equipment or methods based on objective evidence. dorsaVi works either directly with major corporations, or through an insurance company's customer base with the aim of reducing workplace compensation and claims. dorsaVi has been used by major corporations including Sodexo, London Underground, Vinci Construction, Crown Resorts, Caterpillar (US), Monash Health, Coles, Woolworths, Toll, Toyota, Orora (formerly Amcor) and BHP Billiton.
- **Clinical:** dorsaVi is transforming the management of patients with its clinical solutions (ViMove, ViMove2 and Professional Suite) which provide objective assessment, monitoring outside the clinic and immediate biofeedback. The clinical market is broken down into the physical therapy (physiotherapists) market, hospital in the home and elite sports. Hospital in the home refers to the remote management of patients by clinicians outside of physical therapy (i.e. for orthopaedic conditions). Elite sports refers to the management and optimisation of athletes through objective evidence for decisions on return to play, measurement of biomechanics and immediate biofeedback to enable peak performance. dorsaVi's ViPerform is being used in the U.S. by the National Basketball Association (NBA), the Major League Soccer (MLS) and the National Football League (NFL). It is also used by the AFL and NRL clubs in Australia, by the English Premier League (EPL) clubs, England and Wales Cricket Board and the Board of Control for Cricket in India as well as various Olympic teams and athletes internationally. dorsaVi's Telehealth provides a virtual clinic, enabling clinicians to do business differently and take their patient consultations online.
