

21 December 2020

2020 Annual General Meeting – Chairman’s Speech

In spite of the many challenges over this last year, I believe we will look back at 2020 as being a transformative one for Nova Minerals Limited (ASX: NVA).

We commenced an intensive drilling programme, and released an interim resource upgrade, increasing the size of our resource at Korbel to 3.3Moz.

As I speak to you this morning, exploration continues in Alaska, and will extend into 2021 in order to expand the resource, while pressing forward with technical analyses and environmental studies, in line with our fast-track development strategy.

This is, of course, is only the beginning. Drill results have since pointed towards excellent and extensive mineralisation, effectively converging Korbel Blocks A and B into Korbel Main. As our CEO Chris Gerteisen has said in recent weeks, we have yet to discover the limits of the Korbel Deposit.

I thank all members of the executive, the board and the field personnel for their hard work, but most of all, thank you, our loyal shareholders, for your continuing support. We look forward to achieving all of our objectives in coming months, and keeping you updated on our progress.

This announcement has been authorised for release by the Board.

- Ends -
