

ASX Announcement:

5G Networks Selected in SA Government Panel for Managed Infrastructure

NEWS RELEASE February 2021

One of Australia's fastest growing telecommunications and digital infrastructure providers 5G Networks (ASX: 5GN) is proud to confirm that it has been chosen as a strategic supplier to the South Australian Government Managed Platform Services panel. The panel enables SA government agencies to purchase key infrastructure and cloud services and is valued at over \$300m AUD.

5G Networks will provide IT infrastructure services including managed platforms and public cloud management services such as Infrastructure-as-a-Service (IaaS) and Platform-as-a-Service (PaaS). 5GN expects the panel will enable SA government agencies to rapidly transform a range of infrastructure assets and applications as they transition to the cloud.

Joe Gillett, General Manager of sales at 5GN stated;

"We are delighted to continue our relationship with the SA Government as a strategic supplier for critical infrastructure services. In working closely with SA agencies for many years, we now look forward to the next phase in the journey by enabling new innovative models of service delivery. The panel will also benefit from our direct investment in South Australia as we further develop our managed infrastructure platforms. This includes the continued development of the 5GN Cloud platform in Adelaide, which provides hybrid cloud services across both private and public clouds." He added.

Importantly, 5GN has been providing managed hosting and infrastructure services to SA government for many years and this heritage was critical in understanding the strategic direction and key requirements of the government as they design, develop and execute the move to cloud.

About 5G Networks

5G Networks (5GN) is a licenced telecommunications carrier operating across Australia. Our mission is to be Australia's partner of choice for unifying a seamless digital experience for our customers across data connectivity, cloud and data centre services, underpinned by expert managed services in the business to business market.

5GN currently owns and operates its own Nationwide highspeed Data Network with points of presence in all major Australian capital cities. In addition, the Company offers managed cloud solutions through its Cloud and Data Centre capabilities as well as managed services to optimise customers' IT and network environments. Supporting this is the Company's combined rack capacity of 800 racks through its owned and operated Data Centres across Melbourne, Sydney and Adelaide.

As an organisation, we are dedicated and passionate about delivering unique value to our 2500+ customers which include several top 50 ASX listed and Government organisations. This commitment is strengthened by a core focus on digital leadership, innovation and an exceptional customer experience.
