## ASX Announcement

### Rectifier Technologies FY21 Result Guidance and Dividend Update

The Board of Rectifier Technologies Limited (Company) announces an expected revenue and profit decrease compared to the prior financial year for financial year 2021. The Company considers the expected reduced revenue and profit are due to the global economic impact of the COVID-19 pandemic on Company sales and customer spending and short term supply chain shortages arising from suppliers reduced production as a result of lockdowns. The Company's preliminary guidance for FY2021 is revenue in the range of \$11 million to \$12 million and net profit after tax in the range of \$200,000 to \$700,000.

The above guidance is based on preliminary unaudited financials and may be subject to change.

As a result of the expected reduced profit, the Company will not be declaring a dividend for the 2021 financial year. The Company paid a \$0.001 per share dividend for the 2020 financial year.

Authorised by the Board of Directors.
