Mining Right Granted at Witwatersrand Basin Project

West Wits Mining (ASX: WWI, “**West Wits**” or “**the Company**”) is pleased to advise that it has received a positive outcome from the Department of Mineral Resources and Energy (“DMRE”) mining right application process at the Witwatersrand Basin Project (“WBP”) in South Africa.

West Wits has received formal communication from South Africa’s Director General of Department of Mineral Resources and Energy that the Company’s mining right application has been granted in terms of section 23(1) of the Mineral and Petroleum Resources Development Act, 2002 (Act 28 of 2002).

West Wits Chairman, Michael Quinert commented, *“The Department’s decision to grant West Wits’ Mining Right is a pivotal milestone for the Company which heralds in the development of WWI’s marquee Witwatersrand Basin Project. The granting is a testament to the quality and thoroughness of the engagement process undertaken by our lawyers, specialist consultants and the executive team led by Managing Director, Jac van Heerden, and comes at a critical time with the independent Definitive Feasibility Study on the Qala Shallows nearing completion. The WWI Team continues to ramp up development activity and is focused on project execution in the 2nd half of 2021 as it targets maiden underground gold production.”*

Authorised for release by the Chairman of the Company.

Michael Quinert
Chairman
West Wits Mining Limited
