

Quarterly Activities Report

AKORA
Resources Limited

For the period ending
30 June 2021

Highlights

- **Commencement of +4,000 metre diamond drilling programme at Bekisopa designed to extend and confirm iron mineralized zones along strike and depth**
 - o Initial drill results show iron mineralisation continues in both North and South zones
 - o Significant intercepts containing massive and coarse disseminated iron mineralisation
- **Premium iron grade product from crushing trials at Bekisopa with benchmark 62% iron at 3mm crush and 64% iron at 2mm crush**
- **Final 2020 drill hole assay results continue to highlight potential to deliver high-grade 64.5% iron ore product grades at a 2mm coarse crush size**
- **62.8% iron product grades from composites with massive and coarse disseminated iron mineralisation with low silica, alumina and phosphorus**
- **65.5% iron product grades achieved from massive iron mineralisation**
- **Bekisopa product grades appear excellent when compared to globally traded iron ore products in regard to high iron content and low impurity levels**
- **No environment, social or governance issues in the quarter**
 - o Supportive contacts made with local officials in the lead up to drilling activities at Bekisopa
- **Quarter expenditure**
Quarterly expenditure was A\$836,000 including A\$511,000 expended on exploration activities
- **Cash balances**
Cash balances as at 30 June 2021 were A\$3,705,000 (including the Australian dollar equivalent of US\$1,564,000) with no debt

Pursuant to the requirements of Listing Rules, this announcement on the Quarterly Activities Report and Quarterly Cashflow has been authorized by the AKORA Resources Limited board of directors.

AKORA Resources Limited (ASX: AKO, AKORA or the Company) is pleased to report its activities during the June 2021 quarter.

AKORA Managing Director Paul Bibby commented, ***“The past quarter has seen continued evaluation of the 2020 exploratory drilling programme with excellent iron intercepts in the southern zone, with very encouraging product grade trial results averaging 62.8% iron at a 2mm crush. Then further crushing trials showed that a 3mm crush delivers benchmark 62% iron ore product grades. These results have informed our plan for the recently commenced 4,000 plus metre drilling campaign at Bekisopa, which we are aiming to complete in the last quarter of 2021.”***

Operating activities

Commencement of 4,000-metre diamond drilling campaign

In June, the Company commenced its 4,000-metre drilling campaign at its flagship Bekisopa iron ore project after mobilizing drilling equipment and support in late May. The campaign aims to deliver a JORC compliant initial resource by year-end (see ASX announcement 31 May 2021). The Company will undertake this drilling programme at Bekisopa tenements 3757 and 10430. During camp construction a contractor received lacerations, first aid managed the injury, and the contractor will return to his employment when recovered. Completion of the establishment of the camp and commencement of drilling has proceeded well despite restrictions imposed due to Covid-19.

The campaign’s timeframe assumes the Company can complete all necessary work activities (drilling, assaying, metallurgical test work and resource estimation) without being impacted by operation issues, Covid-19 in Madagascar or limited international transport options to get samples for analysis to accredited ALS laboratories. The various operational and logistical lessons learnt from the successful 2020 Bekisopa drilling programme will assist in managing the necessary steps to complete this drilling programme in as timely a manner as practical.

The 2021 drill plan expands on results previously reported for the Bekisopa iron ore project (see ASX Announcements dated 13 April 2021, 27 April 2021 and 25 June 2021). The plan is to complete 4,000 metres of diamond drill holes focusing on areas at the northern and southern limits of the main 6-kilometre strike. The proposed drilling programme is set out in Figure 1.

In the north, across tenements 3757 and 10430, drilling is targeting a zone of high magnetic intensity and the encouraging drill intercept in 2020 drill hole BEKD01, at 200m line spacing to a depth of around 250m below surface.

In the south (tenement 10430), where continuous iron mineralization appears to be dipping much more shallowly, 200m line spaced drilling will target shallower mineralization such as that intersected in 2020 drill holes BEKD09, 10 and 11, to a depth of about 150m below surface.

AKORA selected these drill grids to confirm the continuity of the known iron mineralization in these two zones, within the selected grid areas, and predominately to confirm the known mineralization to the west and at depth. These two drilling grids will only confirm the extent of the iron mineralization along some 30% of the 6 km strike. Therefore, depending on these drill results, the potential for a larger iron resource after further drilling is considerable.

Figure 1
Bekisopa Proposed 2021 Drilling Plan

COVID-19 Precautions

AKORA has been proactively managing the potential impact of COVID-19. With all employees and contractors requiring a negative COVID test to be allowed to travel to site and limiting risk to its operations and community. All operations, activities and movements have been minimised to what is deemed essential. Bekisopa site has first aid, increased hygiene practices and nonessential travel banned for the foreseeable future.

Crushing trials results

The Company continued to receive pleasing results from its crushing trials on 2020 drill cores taken from the Bekisopa project (see ASX announcement 15 July 2021).

These processing trials continue to show excellent iron ore product grades of 62% iron at a crush size of 3mm and 64% iron at a crush size of 2 mm from massive and coarse disseminated iron mineralization types. As expected, the iron grade increases proportionally with finer crush sizes while the silica, alumina, phosphorus and sulphur levels decrease substantially.

Analysis of the product grades achieved from all processing trials to date (see ASX Announcements on 13 April 2021, 27 April 2021 and 25 June 2021) shows the iron mineralization along the Bekisopa strike length can deliver high-grade iron products. The excellent product grades achieved in processing trial from the northern and southern zones, where the 2021 drill grids are planned, ranged from 60.7% to 68.3% Fe, averaging 65.2% Fe.

These trials confirm that a 2mm crush delivers quality high-grade iron ore fines products, resulting in the Company to undertake for the JORC resource estimation product trials on drill core samples from the 2021 drilling campaign at 2mm and wLIMS (wet low intensity magnetic separation). This series of crushing trials confirms the favorable upgrading characteristics of the iron mineralization at Bekisopa in achieving high-grade clean iron ore fines products.

Final assay results from 2020 12-hole drilling programme

During the quarter, AKORA also received assays for the final four drill holes from its 2020 12-hole drilling programme at Bekisopa (see ASX announcement 27 April 2021). The Company reported results from the first eight drill holes in April (see ASX announcement dated 13 April 2021).

The results confirm the previous interpretation of a broad, shallow (15°) westerly dipping iron mineralized zone with a true thickness of at least 45 metres, increasing to the west. The mineralized zone outcrops and is continuous from surface. Simple coarse crushing and wet LIMS test work generated outstanding recoveries of up to 90.6%Fe and delivered product grades of up to 66.9%Fe. These final laboratory results confirmed the excellent qualities of the Bekisopa mineralization and highlighted the potential for low capital and operating costs and high-grade iron ore product.

The drilling has confirmed the previous interpretation of an outcropping zone of massive and coarse disseminated magnetite +/- hematite in the southern area of the project area, starting at surface and continuous to the limit of drilling to date. The new results show very high-grade massive mineralization is present in each of the weathered surficial, totally oxidized weathered, transitional and fresh rock zones. This outcome suggests the potential for large scale mineralization at depth and to the west.

Corporate activities

During the June 2021 quarter, the Company issued 329,000 fully paid ordinary shares at 30 cents per ordinary share on the exercise by shareholders of options over ordinary shares issued pursuant to the listing of the Company on the Australian Securities Exchange.

The Company received \$98,000 in new funds from the exercise of options during the June quarter.

The Company expended \$836,000 on exploration and corporate activities during the second quarter of 2021 with \$511,000 expended on exploration and the balance on corporate activities.

As at 30 June 2021, the Company had \$3,705,000 in cash balances (including the Australian dollar equivalent of US\$1,565,000 in US deposits) and nil debt.

Capital structure as at the date of this Quarterly Activities Report is as follows:

Fully paid ordinary shares (tradeable)	51,225,600
Restricted securities	
- Ordinary shares (escrowed 5/8/21)	981,492
- Ordinary shares (escrowed 30/9/21)	136,364
- Ordinary shares (escrowed 7/12/22)	8,693,266

	61,036,722

Unlisted options	
- Exercisable up to 7/12/22 @ 30 cents	8,592,266
- Escrowed until 7/12/22 @ 30 cents	2,244,750

Related parties

During the quarter Messrs PG Bibby and JM Madden acquired 14,000 and 57,000 ordinary shares, respectively, on the market. Disclosure of these purchases was detailed in Appendices 3Y submitted to the ASX on 29 April 2021.

ASX Listing Rule 4.10.19

In accordance with Listing Rule 4.10.19, the board of directors wish to confirm that the Group has been utilising the cash and assets in a form readily convertible to cash that it held at the time of its admission to the Official List of ASX on 15 December 2020 and since its admission to the end of the reporting period (being 30 June 2021) in a way that is consistent with its business objectives.

4.5	Effect of movement in exchange rates on cash held	14	45
4.6	Cash and cash equivalents at end of period	3,705	3,705

5.	Reconciliation of cash and cash equivalents at the end of the quarter (as shown in the consolidated statement of cash flows) to the related items in the accounts	Current quarter \$A'000	Previous quarter \$A'000
5.1	Bank balances	284	340
5.2	Call deposits	1,340	1,600
5.3	Bank overdrafts		
5.4	Other US dollar accounts	2,081	2,488
5.5	Cash and cash equivalents at end of quarter (should equal item 4.6 above)	3,705	4,428

6.	Payments to related parties of the entity and their associates	Current quarter \$A'000
6.1	Aggregate amount of payments to related parties and their associates included in item 1	140
6.2	Aggregate amount of payments to related parties and their associates included in item 2	-
<i>Note: Salaries for executive directors are allocated to both corporate and exploration activities</i>		
<i>Note: if any amounts are shown in items 6.1 or 6.2, your quarterly activity report must include a description of, and an explanation for, such payments.</i>		

7.	Financing facilities <i>Note: the term "facility" includes all forms of financing arrangements available to the entity. Add notes as necessary for an understanding of the sources of finance available to the entity.</i>	Total facility amount at quarter end \$A'000	Amount drawn at quarter end \$A'000
7.1	Loan facilities		
7.2	Credit standby arrangements		
7.3	Other (Convertible Notes)		
7.4	Total financing facilities		
7.5	Unused financing facilities available at quarter end		
7.6	Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.		

8.	Estimated cash available for future operating activities	\$A'000
8.1	Net cash from / (used in) operating activities (item 1.9)	(835)
8.2	(Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	-
8.3	Total relevant outgoings (item 8.1 + item 8.2)	(835)
8.4	Cash and cash equivalents at quarter end (item 4.6)	3,705
8.5	Unused finance facilities available at quarter end (item 7.5)	-
8.6	Total available funding (item 8.4 + item 8.5)	3,705
8.7	Estimated quarters of funding available (item 8.6 divided by item 8.3)	4.44 quarters
	<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8	If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1	Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
	Answer: N/A	
8.8.2	Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
	Answer: N/A	
8.8.3	Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?	
	Answer: N/A	
	<i>Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.</i>
