**About the Charley Creek Project:**

The Charley Creek rare earth project is located 110 km W-NW of Alice Springs in the central Northern Territory, Australia. Enova Mining Limited, with 100% project equity, is working to re-establish a resource statement and scoping study. The project is well positioned to be a low environmental impact mine with few encumbrances. The Company is currently reviewing its resource model and the mineral processing flowsheet. Metallurgical laboratory test-work is in-progress to increase the rare earth mineral process recovery. The target final products are high purity rare earth oxide/hydroxide/carbonates, suitable for export to downstream high-purity product refiners, with potential industrial mineral by-products.
