THE RECORD FY21 YEAR WAS 10 YEARS IN THE MAKING

A man in a light blue shirt and a woman in a yellow top and blue jeans are sitting on a yellow armchair in a bright, modern living room. The man is leaning over the woman, showing her something on his smartphone. They are both smiling. In the background, there is a large window with a view of red brick buildings outside. A grey sofa is visible to the right, and a small white coffee table with a green cup, a blue cup, and a remote control is in front of them. A potted plant sits on a small white side table. A black and white patterned rug is on the floor. A blue circular graphic is overlaid on the left side of the image.

STRONG GROWTH IN ALL KEY METRICS

1. "Gross Sales per Active Customer" is calculated as Gross Sales for the relevant period divided by the number of Active Customers as at the end of the relevant period.
2. "Fixed costs includes all costs excluding distribution, marketing, merchant fees, finance costs, tax and IPO transaction costs..

Revenue Growth	209.1%	149.6%
Gross Profit Margin (% of NTV)	16.2%	16.3%
Adjusted EBITDA (% of NTV)	0.7%	(1.9%)

Commentary

Gross Sales of \$218.1m, up 111%, driven by growth in active customer base of 83%, increasing orders from repeat customers and higher average order value

Revenue of \$38.3m, up 150%, and above Gross Sales growth, driven by the accounting revenue recognition of private label sales versus marketplace commission structure and an increase in advertising and fee income

Gross Profit of \$33.3m, up 118.6%. Stable gross profit as a percentage of NTV³ at 16.3% with marketplace commissions and private label margins in line with H1 FY21

Marketing investment increased from 9.1% to 11.3% of NTV in line with customer acquisition strategy

Other Expenses include distribution costs of \$2.8m to support private label sales and merchant fees, which grew inline with Gross Sales. Fixed costs⁴ reduced as a % of NTV from 5.6% to 4.5%.

Adjusted EBITDA loss of \$4.0m reflecting the investment of IPO proceeds to drive long term growth

¹ Net Transaction Value (NTV) is Gross Sales or Gross Transaction Value after deducting refunds, chargebacks, discounts and coupons.

² Represents IPO related costs not recognized through equity and share based payments

³ Due to the difference in revenue recognition between private label and marketplace sales, MyDeal believes gross profit (revenue less cost of sales) as a percentage of NTV represents a more relevant measure than take rate (revenue as a percentage of NTV) and will report this metric moving forward.

⁴ Fixed costs includes all costs excluding distribution, marketing, merchant fees, finance costs, tax and IPO transaction costs.

PROVEN CUSTOMER ACQUISITION

New customers continue to be profitable on first purchase

- Unique website visitors averaged 6.4m per month throughout the year
- Conversion of site visit to transaction continues to improve in line with user experience
- Half on half movements reflect seasonality for both visits and conversion rate. Comparisons against FY20 are skewed by the emergence of COVID 19 in H2 FY20

- ROI remains profitable on first purchase
- Last 12 month ROI of 2.0 relatively consistent with the pcp, with Higher AOV's offsetting increases in customer acquisition cost (CAC) to \$19.1 (FY20: \$15.0)

1. Number of transactions calculated as a percentage of unique visitors

2. New Customer Acquisition Cost is calculated as the total marketing spend for FY21 x 51.8% (being the estimated percentage of marketing spent on new customer acquisition) divided by the number of new customers during FY21.

3. Gross Profit per Customer is calculated as total Gross Profit for FY21 divided by the total number of customers that transacted in FY21.

INCREASING CUSTOMER LOYALTY

Even with record customer acquisition, 59.4% of transactions were from returning customers, with the average number of orders per customers increasing to 1.7 during FY21

Miscellaneous

No person, especially those who do not have professional experience in matters relating to investments, must rely on the contents of this document. If you are in any doubt as to the matters contained in this document you should seek independent advice and/or consult your stockbroker, bank manager, solicitor, accountant or other financial adviser.

It should be remembered that the price of securities and the income from them can go down as well as up. A number of figures, amounts, percentages, estimates, calculations of value and fractions in this document are subject to the effect of rounding. Accordingly, the actual calculation of these figures may differ from the figures set out in this document.

Non-IFRS financial measures

The Company uses certain measures to manage and report on its business that are not recognised under Australian Accounting Standards or IFRS. These measures are collectively referred to in this presentation as 'non-IFRS financial measures' under Regulatory Guide 230 'Disclosing non-IFRS financial information' published by ASIC. Management uses these non-IFRS financial measures to evaluate the performance and profitability of the overall business. The principal non-IFRS financial measure that is referred to in this presentation is EBITDA. EBITDA is earnings before interest, tax, depreciation and amortisation and significant items. Management uses EBITDA to evaluate the operating performance of the business and each operating segment prior to the impact of significant items, the non-cash impact of depreciation and amortisation and interest and tax charges, which are significantly impacted by the historical capital structure and historical capital structure and historical tax position of the Company. Management also use the terms Gross Sales or Gross Transaction Value, which represents the total value (unaudited) of transactions processed by MyDeal, on a cash basis, before deducting refunds, chargebacks, discounts and coupons but after deducting GST.

Although the Company believes that these measures provide useful information about the financial performance of the Company, they should be considered as supplements to the income statement measures that have been presented in accordance with the Australia Accounting Standards and not as a replacement for them. All dollar figures within this document represent Australian Dollars unless otherwise specifically stated.

Thank
You.
