Objective

The Objective is to create a diversified portfolio of listed microcap companies and then to invest opportunistically in unlisted entities that offer better relative value. The performance objective for ACQ is to outperform the S&P/ASX Small Ordinaries Accumulation Index over the medium to long term.

Dividend Intention

ACQ intends to pay annual dividends targeting at least 5% of closing post-tax NTA for each financial year, franked to the highest extent possible without the Company incurring a liability. This is subject to ACQ having sufficient profit and cash flow to make such payments.

Investment philosophy

The investment philosophy is based on a belief that there are pricing inefficiencies amongst emerging or microcap companies due to a lack of readily available external research conducted on such entities.

Acorn Capital believes that through a research driven investment process the pricing inefficiencies that exist in both listed microcaps and unlisted microcaps can be exploited to earn returns superior to those available in the broader market.

Unlisted microcap opportunities must be of better relative value on a risk-adjusted basis to displace existing listed portfolio investments in the corresponding sector.

Strategy

- Research-driven stock selection
- Economic sector diversified
- Style agnostic
- Long term investor
- Create diversified portfolios to reduce volatility

Manager profile

Established in 1998 Acorn Capital Ltd is a specialist Australian microcap manager

Portfolio Profile as at 31 October 2021

ACQ had 79%, 18% and 3% in listed investments, unlisted investments and cash, respectively. 57% of the unlisted portfolio was held in equity linked securities.

Equity linked securities include: convertible debt; debt with attaching warrants or options; preference shares; and similar instruments. Investments are revalued in accordance with policies adopted by the Board of ACQ. Unlisted investment valuations are reviewed monthly. Ordinary equity investments will generally be adjusted to reflect movements in the relevant industry sector in the Microcap Index². Valuations of equity linked securities are reviewed to determine whether market movements result in an impairment in the security held. Equity linked securities held in the portfolio are typically less correlated with market movements.
