About ECT

ECT is in the business of commercialising leading-edge energy and resource technologies, capable of delivering financial and environmental benefits.

We are focused on advancing a portfolio of technologies, which have significant market potential globally.

ECT’s business plan is to pragmatically commercialise these technologies and secure sustainable, profitable income streams through licensing and other commercial mechanisms.

About Coldry

Coldry is the gateway enabler of higher-value applications for low-rank coals.

Low-rank coals are a rich source of valuable hydrocarbons. However, they suffer from high moisture content that must be reduced to enable higher-value upgrading and conversion to solid fuels, liquid or gaseous hydrocarbons.

Drying is easy. However, drying efficiently and cost-effectively has been the challenge. Coldry meets this challenge through a combination of ‘brown coal densification’ and waste heat utilisation, delivering the world’s first low temperature, low pressure, low cost, zero CO₂ emissions drying process.

About HydroMOR

The HydroMOR process has the potential to revolutionise primary iron making.

HydroMOR is a simple, low cost, low emission, hydrogen-driven technology that enables ‘low value’ feedstocks to produce primary iron.

About COHgen

The COHgen process has the potential to deliver a lower cost, lower emission method for hydrogen production from brown coal.

COHgen is currently advancing through fundamental laboratory development intended to form the basis for a patent application ahead of scale-up and commercialisation.

About CDP-WTE

The catalytic depolymerisation-based waste-to-energy process converts ‘low-value resources into higher-value diesel and other valuable by-products.

CDP-WTE can be deployed as a standalone solution or integrated with the Coldry process to deliver higher-value, lower-emission energy solutions to lignite resource owners.

Jobkeeper Payments Notification

A notice for release to the market under subsection 323DB(1) of the Corporations Act 2001-jobkeeper payments disclosure by listed entity.

Date of this notice

10/11/2021

Listed entity details

Australian Business Number (ABN)
28009120405

ASX/NSX/SSX issuer code
ECT

Name of the listed entity
Environmental Clean Technologies Limited

Jobkeeper payments

This notice relates to the financial years ended 30/06/2020 (FY 1) and 30/06/2021 (FY 2).

The number of individuals for whom the listed entity or a subsidiary of the listed entity received a jobkeeper payment for a jobkeeper fortnight that ended in the financial year *(within the meaning of the Coronavirus Economic Response Package (Payments and Benefits) Rules 2020).*

FY 1: 1

FY 2: 1

The sum of all jobkeeper payments the listed entity, and each subsidiary of the listed entity, received in a jobkeeper fortnight that ended in the financial year.

FY 1: \$6,000

FY 2: \$21,350

Has the listed entity or a subsidiary of the listed entity, made one or more voluntary payments (whether or not in the financial year) to the Commonwealth by way of a repayment of jobkeeper payments received by the listed entity or a subsidiary of the listed in the financial year?

NO

If the listed entity or a subsidiary of the listed entity has made such a voluntary payment or payments -the sum of those payments:

FY 1:\$0

FY 2:\$0
