## Mining and Processing Activities Commence at Yerbas Buenas

**Freehill Mining Limited (ASX: FHS 'Freehill' or 'the Company')** is pleased to provide this update to shareholders on the ramp up of mining and ore processing activities at the Company's 100%-owned Yerbas Buenas magnetite project.

- Mining, crushing and processing activities are well underway with approximately 150,000 metric tonnes
  of stockpiled mined material ready for processing
- Impact crusher acquired and installed which elevates the mine from two stage to three stage fine crushing circuit producing final 3mm iron ore product
- The impact crusher provides a two-level benefit of increasing the grade of iron ore and higher value fine aggregate and once producing, the Company will look to optimise its process from its' sources of supply
- Magnetic plant operating at 100%, producing over 300 tonnes of finished product per hour
- Freehill's focus at this time is on stockpiling processed material while sales arrangements are finalised

Operations are now well underway with mining, crushing and processing equipment on site and operational (*see image 1*). In the last week, an Impact crusher has been acquired with installation substantially completed. The impact crusher elevates the process from a two stage to a three stage fine crushing circuit. The impact crusher delivers a final product of -3mm iron ore which the Company is expecting to be available for sale to potential off-takers imminently (*see image 2 below*). The Company's magnetic plant has now reached 100% capacity and is operating at a processing capacity of 300+ tonnes per hour.

Freehill's focus is now on stockpiling the processed ore while off-take sales contracts are assessed. Currently, the Company has approximately 150,000 metric tonnes of stockpiled mined material ready for processing. Discussions with several off-takers are already well advanced, with demand being evidenced from a number of further identified potential domestic and international off take customers.

## Comment:

**Chief Executive Officer Paul Davies said:** *"We are now well into the production phase at Yerbas Buenas which will deliver multiple revenue streams from the iron ore and aggregate we are producing. The current operation provides a strong foundation which underpins the growth and development of Freehill. We look forward to updating shareholders as processing activities continue and sales materialise."*
