

## Block Trade to Facilitate Early Exercise of Options

**Elsight Limited (ASX: ELS) ('Elsight Ltd', 'Elsight' or 'the Company')**, announces that a block trade of 8,040,002 ordinary shares, representing 6.02% of the issued capital in the Company was facilitated on 6 April 2022 at a price of \$0.35 per share. Co-Founders Nir Gabay and Roe Kashi were parties to the block trade for the purpose of funding the early exercise of options ('the Options'), and for taxation purposes.

Funds raised from the early exercise of the Options allows the Company to accelerate the executing of the design win strategy, which sees the Company's "Halo" technology rolled out with commercial partners.

In a strong show of support to the business moving forward, and an endorsement of the management team, the newly acquired shares will be subject to a six-month voluntary escrow period. The entry into the voluntary restriction deed confirms both holders wish to remain long term shareholders of the Company.

The Company will provide further information when available.

The relevant regulatory forms in relation to the Options exercise and changes in substantial shareholdings will be provided to the ASX in due course.

Authorised for release by the Board of Directors of Elsight Limited.
