Comments from CEO

Praemium CEO Anthony Wamsteker made the following comments about the quarter:

“We are delighted to report continued outstanding momentum this quarter with FUA levels of \$47.7 billion. Net inflows have continued to grow strongly over the course of the current financial year. This shows Praemium is delivering on our strategy to become one of Australia’s largest independent specialist platform providers. It was also very pleasing to add a further \$362 million into our highest revenue margin product, the Praemium SMA scheme, which is a record net inflow for a third quarter. We anticipate this strong growth trajectory to continue, with a healthy sales pipeline translating to FUA and revenue growth for the remainder of the financial year.

We are pleased to have been rated as the top platform in three out of six categories in the latest Investment Trends Platform Report, categories that are arguably the most crucial to helping an adviser deliver their service efficiently and effectively. We remain committed to enhancing our strengths in those areas important to financial advisers, including managed accounts, non-custody solutions and service excellence and are confident this will further strengthen our market-leading position in the private wealth and HNW adviser segments.”
