Alcidion partners with Leidos Australia to deliver a health knowledge management system for the Australian Defence Force

- Alcidion today confirms that, as part of a consortium led by Leidos Australia, it will deliver a health knowledge management system (HKM) that will support delivery of healthcare services across the Australian Defence Force (ADF).
- Alcidion's Miya Precision platform will perform the critical role of aggregating data from consortium partner solutions to provide a single, consolidated, longitudinal view of participant health status and history.
- The total contract value (TCV) to Alcidion is \$23.3M over the initial term (six years).
- This announcement provides further information in relation to our 3rd December 2021 announcement indicating Alcidion had been awarded a contract with Leidos as part of a Commonwealth of Australia contract, and confirms Alcidion is a member of the consortium that was awarded the JP2060 Defence contract.

Melbourne, Australia – Following recent press coverage, Australian health technology company Alcidion Group Limited (ASX:ALC) confirms that, as part of a consortium led by Leidos Australia, it will partner in the delivery of a modern, sovereign health knowledge management system (HKM) to support healthcare services across the Australian Defence Force (ADF). Alcidion will provide a significant component of the scope of the contract issued by the Australian Department of Defence Chief Information Officer Group.

Alcidion's contract value is estimated to be \$23.3M over the initial term of six years covering implementation and subscription for the company's Miya Precision platform. Further contract extensions and options to renew up to 15 years create a possible total contract value for Alcidion's contract with Leidos of approximately \$50.0M.

The HKM system will replace the ADF's legacy electronic health record product with a modern, patient-centric health solution. It will record, store, aggregate and analyse health data and information for the ADF population, unifying multidisciplinary primary and occupational care with emergency and hospital care in both garrison and deployed domains, to enable better clinical decision-making.

Alcidion's Miya Precision platform will perform the critical role of aggregating data from consortium partner solutions, and other systems in the Defence environment, to provide a single, consolidated, longitudinal view of every participant's health status and history, accessible via the platform's intuitive modern interface.

The consortium will see Alcidion partner with a multi-disciplinary team of primarily Australian companies to deliver the full system requirements, with more than 95% of the work to be delivered by Australian companies. Leidos Australia is the wholly owned subsidiary of Leidos (NYSE:LDOS), a

Fortune 500® information technology, engineering, and science solutions and services firm with clients across multiple sectors in government.

Group Managing Director and CEO Kate Quirke said: “The Alcidion team is excited to work on this critical project for the Australian Defence Force, together with Leidos and our consortium partners. Our contribution is pivotal in consolidating data from partner systems to provide clinicians with a comprehensive and meaningful view of the ADF population and their interaction with their healthcare services”.

This announcement is authorised for release by the Board of Directors of Alcidion Group Limited.

About Alcidion

Alcidion Group Limited (Alcidion) has a simple purpose, that is, to transform healthcare with proactive, smart, intuitive technology solutions that improve the efficiency and quality of patient care in healthcare organisations, worldwide.

Alcidion offers a complementary set of software products and technical services that create a unique offering in the global healthcare market. Based on the flagship product, Miya Precision, the solutions aggregate meaningful information to centralised dashboards, support interoperability, facilitate communication and task management in clinical and operational settings and deliver Clinical Decision Support at the point of care; all in support of Alcidion’s mission to improve patient outcomes.

Since listing on the ASX in 2011, Alcidion has acquired multiple healthcare IT companies and expanded its foothold in the UK, Australia, and New Zealand to now service over 300 hospitals and 60 healthcare organisations, with further geographical expansion planned.

With over 20 years of healthcare experience, Alcidion brings together the very best in technology and market knowledge to deliver solutions that make healthcare better for everyone.
