### Market update and investment activity

As of 31 May 2022, the Trust's capital is 93% invested. As mentioned in the April performance update, any increases in Bank Bill Swap Bid Rate (BBSY) for loans with a variable interest rate will be passed on to fund investors. In May 2022, QRI delivered an attractive monthly risk adjusted distribution of 6.00% on NAV of \$1.60 as at 31 May 2022. This represents an annualised distribution return of 7.17% at QRI current unit price of \$1.34 as at 16 June 2022.12 The last twelve month distribution of 5.36% as at May 2022 is within target range. Subject to no unexpected repayments and no further settlement delays, the Manager expects that the monthly distribution return should remain within target range for the remainder of this financial year.

Repayments of loans are occurring in the ordinary course and as expected. This is evident from the repayment of \$20.3m of loans during the month predominantly from residual stock loans which also evidences that residual stock in completed apartments continue to be sold down and ultimately settled by vendors. This supports the valuations adopted by the Manager. Investment activity for the month encompassed settlement of the three facilities totalling \$51.0m. The Trust's portfolio continues to perform in line with investment objectives with no interest arrears or impairments recorded on any loans. QRI has a strong pipeline of investment opportunities totalling \$700m and pleasing to us is the potential to move pricing upwards in line with increases in both benchmark and risk pricing premiums.

As of 31 May 2022, 51% of the QRI portfolio is loans based on a variable interest rate. Monthly interest payments of our variable interest rate loans are calculated on BBSY as at 1st business day of each month. This means 51% of our portfolio will reflect the increase in BBSY on 1st of June. This increase will be passed through in the June distribution. Following RBA's decision to lift the cash rate from 0.35% to 0.85%, BBSY has increased 0.46% since the announcement.13 Nearly 100% of these increases from variable interest loans will be passed on to our fund investors in the July distribution. The percentage of variable interest loans will increase over the next few months noting that QRI's weighted loan maturity is 1.3 years, and any new loans or roll-overs will be priced on a variable rate base rate. We view our short term duration to be a strength of the fund enabling us to continually assess risk margins and on-going security values which is addition to our interim active asset management reviewing quality of loan positions.

We are observing heightened risk relating to underlying asset prices as well as supply chain delays causing construction costs to rise. We remain vigilant with our asset management reviews in the ordinary course of business and especially during market volatility. Approximately 21% of QRI's portfolio is construction loans. We conducted a comprehensive review across all loans including construction loans in QRI's portfolio and as at 31 May 2022, the Trust has no impairments, and all interest payments are up to date. It is important to note that equity bears the brunt of market volatility as debt has higher priority of repayment than equity. As a debt financier, QRI has multiple layers of equity buffers including developer and builder contingency; developer and builder profit and equity and personal guarantees from developers. We do not have any lending exposures to construction companies. Average LVR of 66% translates to equity buffer of 34% across our loan portfolio.

The Manager is focused on continuing to deliver attractive risk adjusted return and maintaining transparency of our disclosure.

UALITAS

### Notes

#### Page 1

[1] Net returns are calculated based on the daily weighted average NAV across the respective time periods.

[2] The payment of monthly cash income is a goal of the Trust only and neither the Manager or the Responsible Entity provide any representation or warranty (whether express or implied) in relation to the payment of any monthly cash income.

[3] The premium achieved is commensurate to the investment risk undertaken.

[4] Invested Capital represents the amount of the Trust's total capital that has been committed and invested as at month end in loans (on a look through basis to the Qualitas Funds) and the Trust Loan Receivable. All investments including direct loans are made by the Sub-Trust. The Sub-Trust is wholly owned by the Trust.

[5] Represents total loans in the portfolio on a look through basis, via investments in direct loans and Qualitas wholesale funds.

[6] Represents total LVR of loans in the portfolio on a look through basis, via investments in direct loans and Qualitas wholesale funds.

[7] Represents % of loan portfolio on look through-basis in arrears by 90 days or more.

[8] This is a target return only. There is no guarantee the Trust will meet its Investment Objective. The payment of monthly cash income is a goal of the Trust only and neither the Manager or the Responsible Entity provide any representation or warranty (whether express or implied) in relation to the payment of any monthly cash income. The Trust reserves the discretion to amend its distribution policy.

[9] RBA cash rate is subject to a floor of 0%.

[10] The portfolio statistics are determined on a look-through basis having regard to the loans in the underlying Qualitas Funds as indicated. The classifications of these diversification parameters are determined by the Manager. Figures stated are subject to rounding.

[11] Excludes Trust Loan Receivable & cash.

[12] May distribution annualised based on 365 days divided by \$1.34.

[13] Change in BBSY between 6th of June 2022 to 15th June 2022.

[14] Percentage based on total invested capital excludes cash and Trust Loan Receivables.

#### Page 2

[1] Calculated based on units entitled to the distribution. The units entitled to the Sep-19 distribution excludes units issued under the Wholesale and Early Retail Entitlement Offers.

[2] Net Return calculated based on weighted average NAV.
