Patent Litigation Update

July 12, 2022 – Mach7 Technologies, Inc., a wholly-owned subsidiary of Mach7 Technologies Limited, announced an update today on the patent infringement lawsuit brought by AI Visualize, Inc., a Texas corporation.

On June 8, 2022, Mach 7 received notice from the United States District Court for the District of Delaware that it granted Mach7's request to dismiss all claims asserted by AI Visualize. The Court based its dismissal on a finding that AI Visualize's patents were not eligible for patenting. AI Visualize's claims of wilful infringement was therefore dismissed.

AI Visualize has until August 8, 2022, to appeal the dismissal to the United States Court of Appeals for the Third Circuit. Mach7 will continue to defend itself on appeal, if necessary, and inform the market with any additional information regarding this legal action.

Released on authority of the Board by:

Mike Lampron
Chief Executive Officer

About Mach 7

Mach7 Technologies (ASX:M7T), founded in 2007, is a medical imaging systems provider that develops innovative image management and viewing solutions for healthcare organizations. The core of these offerings is the Mach7 Enterprise Imaging Solution, encompassing Enterprise Data Management, Enterprise Diagnostic Viewing and Departmental Workflow applications. Mach7's Enterprise Data Management solution, consisting of a powerful Vendor Neutral Archive (VNA) and data administration tools, allows for the fast storage, access, retrieval and viewing of images across a healthcare network with connectivity to the Cloud. In July 2020, Mach7 acquired Client Outlook and the *eUnity* Enterprise Diagnostic Viewing technology to augment Mach7's Enterprise Data

Management and Departmental Workflow applications. eUnity is a zero-footprint, FDA-approved, image viewing solution that makes images accessible on any workstation. This offers healthcare professionals consolidated access to all patient images and data, ensuring clinical staff have timely access to the right information to diagnose and treat patients. Uniquely, the company also gives customers independence to deploy its solutions either on a component basis or in a unified comprehensive platform. With more than 150 customers across 15 different countries, Mach7 has built a global network of diverse customers that range from expansive Integrated Delivery Networks, National Health Systems, medical research facilities, and large academic medical institutions to regional community hospitals, private radiology practices, and independent provider groups.
