Global Health secures First Victorian Regional Contract Win for FY22/23

Australian Healthcare Software Provider **Global Health Limited (ASX: GLH)** (“Global Health” or “Company”) has secured a new contract with **Yarram District Health Service** (Yarram) to provide MasterCare EMR, Dashboards as a Service (DaaS), ReferralNet Secure Messaging Platform and Hothealth (Patient Engagement Platform) solutions to the hospital and community health services in Yarram, Gippsland, Victoria.

Yarram continues the Company’s momentum in the regional growth corridors of the Victorian Community Health landscape. This contract win is the first for FY22/23 and joins **Windana Drug and Alcohol Recovery, Monash Health, Bass Coast Health, Sunraysia Community Health, Bellarine Community Health and most recently Ballarat Community Health and Peninsula Health** all of whom have come on-board with the MasterCare solution in recent years.

Global Health aims to provide integrated healthcare solutions to key growth corridors in regional areas across Australia, after the ongoing bombardment on community health resources during the COVID-19 Pandemic which placed a massive strain on regional health organisations.

The contract value is approximately \$200,000 through the initial 12 months across implementation and ARR **with an initial term of 4 years**, with 2 x 4-year extensions. This contract win is another key outcome from the strong sales pipeline in place and continues MasterCare’s growth trajectory in its key markets of Community Health and Hospital providers.

Yarram District Health Service ‘Win’

Global Health is excited to be providing the **MasterCare EMR, Dashboards as a Service (DaaS), ReferralNet Secure messaging platform** and **Hot Health** (Patient Engagement Platform) solutions to the Hospital and community health services in Yarram, South Gippsland, Victoria. **The solution** will enable Yarram to connect directly with their clients and materially improve their clinical and administrative processes allowing the Yarram team to spend more time focused on patient outcomes and less on paperwork and process.

This is a significant contract for the Company, with Yarram supporting a material geographic region of Gippsland and marks the beginning of our support to this important growth corridor in Victoria.

Michael Davies, CEO of Global Health commented:

“We are excited to be working in regional Victoria and supporting Yarram District Health Service, an exceptional regional based community health and hospital provider that delivers high-quality healthcare to improve patient outcomes and wellbeing in Gippsland.

Our MasterCare solutions will enable Yarram to better run their day-to-day health management; provide improved reporting and business insight; actively engage with patients through an online presence and telehealth which helps to address the needs of their communities and improve patient care.

We’re delighted that we are able to provide solutions to improve accessibility to community, mental health services and hospital care in regional Victoria.”

Authorised for release to ASX by: Michael Davies, Chief Executive Officer.

More Information on Global Health Solutions:

MasterCare

MasterCare Electronic Medical Records (EMR) facilitates a singular view of all your data by integrating with your existing clinical and operational systems, connecting you with secondary providers, capturing consistent clinical data sets and supporting clinical and practice management workflows all through one system.

DaaS

A reporting tool for unlocking data insights that improve business performance. The tool connects operational and clinical data to unlock insights that go beyond reporting requirements.

ReferralNet Secure Messaging

A secure messaging system for sending and receiving health documents electronically. Referrals are automatically delivered into your clinical system.

HotHealth

This solution provides a “patient engagement platform” to better engage with patients and clients through an online presence and tools such as telehealth, forms, chat forums and information distribution.
