About Dart Mining

Dart Mining’s (ASX: DTM) objective is to evaluate, explore, and develop Lithium prospectivity, historic Goldfields, and Porphyry precious and base metal targets in NE Victoria. NE Victoria is prospective for precious, base, and critical metals. These include Lithium, Gold, Silver, Copper, Molybdenum, Zinc, Tungsten, Tin, and Tantalum. Dart Mining has built a strategic gold footprint in the Northeast Region of Victoria where historical surface mining and alluvial gold indicates the existence of potentially significant gold endowment.
