X2M strategy is working

X2M business has significant market potential

Total addressable market is huge. The X2M existing customer base represents a substantial opportunity

South Korea market

Existing customers provide a substantial potential market that is being progressively penetrated

- Total addressable market (TAM) 7.9m households, \$950m in potential value²
- Existing customer TAM - 3.5m households, \$426m in potential value²

Japan

Connected devices in Japan have grown ~130% during FY22

- Approximately 50% of households in Japan use bottled gas
- There is significant potential to grow through existing customers

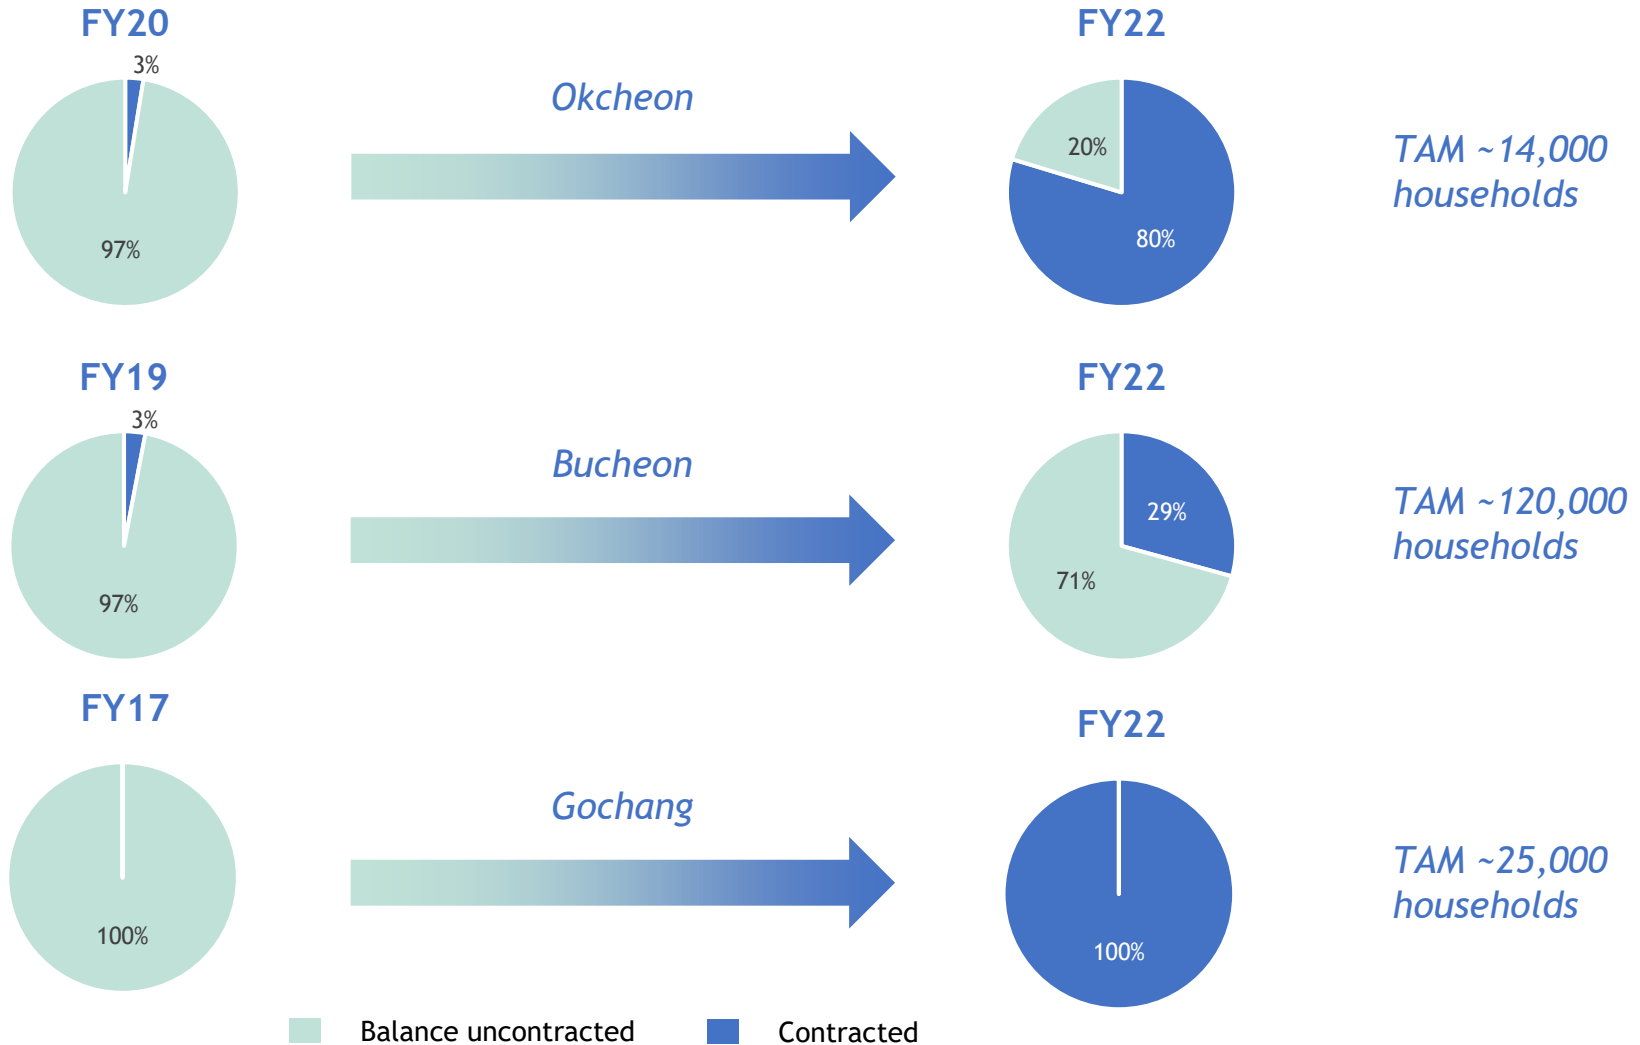

1. Japan data as at 30 June 2022.

2. South Korea total addressable market (TAM) and contracted values are based on a nominal per device charge of A\$120. South Korea data as at 31 May 2022.

Validated strategic business model - increasing share of TAM

The X2M strategy of securing customers and pursuing conversion of each customer's available market is working and reflects the stickiness of the X2M business model

1. All charts as at 30 June 2022.
 2. TAM - total addressable market

-  Revenue momentum to continue with \$11m already contracted for deployment in FY23 which is ahead of FY22 full year revenues of \$10.4m and additional contracts are expected in FY23
-  Connected devices from contracted deployments already set to exceed 300k, driving acceleration in recurring SaaS and maintenance revenues
-  Repeat orders from existing customers to feature strongly further penetrating existing customers' addressable markets
-  Investment in growth initiatives to continue
-  First energy management deployment with Resi Ventures expected to commence in Australia
