Dear Sir/Madam

**2022 Half-Year Report**

Due to a technical issue, the Half-Year Report lodged earlier today contained formatting errors on pages 21 and 22.

The Los Cerros 2022 Half-Year Report and Appendix 4D attached has been amended to correct this issue.

Yours sincerely

Michael J. Allen  
Company Secretary

The Directors present their report, together with the financial statements, on the consolidated entity (referred to hereafter as the 'consolidated entity', 'Consolidated Group' or the 'Group'), consisting of Los Cerros Limited (referred to hereafter as 'Los Cerros', the 'Company' or the 'parent entity') and the entities it controlled at the end of, or during, the half-year ended 30 June 2022.

## Directors

The following persons were Directors of Los Cerros Limited during the whole of the financial half-year and up to the date of this report:

Ross Ashton	Non-Executive Chairman
Jason Stirbinskis	Managing Director
Kevin Wilson	Non-Executive Director

## Principal Activities

**Los Cerros Limited (ASX: LCL) (Los Cerros or the Company)** is a gold/copper explorer with a dominant position within the Andes and Quinchía regions of the mid-Cauca Gold Belt of Colombia which hosts many major discoveries.

The Company's focus is the mineral exploration on the assets held in the Andes and the Quinchía gold-copper Projects.

## Dividends

There were no dividends paid, recommended or declared during the current or previous financial half-years.

## Review of Operations

The loss for the consolidated entity after providing for income tax amounted to \$1,820,501 (30 June 2021: loss of \$2,318,237).

The definition of a Tesorito maiden Mineral Resource Estimate (MRE) marked a major milestone for the Company and expanded the Quinchia Resource to 2.6Moz @ 1.02g/t Au<sup>1</sup>. The Quinchia Project is a cluster of 100% owned porphyry and epithermal gold/copper targets within a 3km radius in Risaralda, Colombia (Figure 2).

The Tesorito MRE marks the emergence of the Company's development program with the first step, metallurgical studies on the Tesorito resources, commissioned during the period and completed in early July 2022.

Going forward, and in response to changing dynamics, the Company is directing greater focus towards activities that progress and de-risk the current advanced assets including commencement of investigations leading into a Quinchia-wide Preliminary Economic Assessment (PEA). The second half of 2022 will also see finalisation of the Company's largest drilling program to date which completed 80 holes for 37,000m over the past several years.

Exploration will continue in the second half of 2022, initially with surface mapping and similar investigations, while the Company also conducts a review and targeting exercise incorporating the extensive drill hole assay, geochemistry and geophysics data accumulated over the last few years.

---

<sup>1</sup> Contains a mix of Inferred, Indicated and Measured Resources. Using Tesorito MRE of 1.3Moz @ 0.81 g/t Au. The Miraflores Reserve is included in the Miraflores Resource. Refer ASX announcement dated 14 March 2017 (Miraflores Resource) and 27 November 2017 (Miraflores Reserve) and 25 February 2020 (Dosquebradas Resource) and 22 March 2022 (Tesorito Resource). The Company confirms that it is not aware of any new information or data that materially affects the information included in the market announcements, and that all material assumptions and technical parameters underpinning the estimates continue to apply.

### 1.3Moz maiden MRE defined at Tesorito, including potential 0.5Moz high-grade 'starter pit'

Los Cerros reported an MRE (Inferred) of 1.3Moz @ 0.81g/t Au for Tesorito<sup>2</sup>, with a central high-grade gold zone of 0.54Moz @ 1.23g/t Au<sup>3</sup> providing a compelling opportunity to consider higher margin 'starter pit' mining scenarios.

Whilst the Company has elected to focus on the 1.3Moz iteration of the MRE, this occurs within a larger optimised pit shell of 2.3Moz @ 0.53g/t Au<sup>4</sup> (Table 1 and Figure 1), which demonstrates potential for sustaining a longer-term mining project, involving lower grade gold that mostly defines the margins of the optimised modelled pit shell. It is also worth noting that the unconstrained MRE, capturing additional material beyond the pit optimisation, generates an Inferred Resource of 1.7Moz @ 0.71g/t Au using a 0.45g/t cut-off grade (and doubling to 3.4Moz @ 0.45g/t Au if applying a 0.25g/t Au cut-off)<sup>4</sup> This raises the possibility of resource growth through refinement of optimisation parameters, an improving gold price and consideration of possible underground mining methods for mineralisation below the optimised pit shell.

CUT-OFF	TONNES (Mt)	Au (g/t)	Ag (g/t)	Au (koz)	Ag (koz)
0.25g/t Au	134.3	0.53	0.62	2,290	2,673
<b>0.5g/t Au</b>	<b>50.0</b>	<b>0.81</b>	<b>0.75</b>	<b>1,298</b>	<b>1,205</b>
0.6g/t Au	33.4	0.94	0.82	1,006	880

**Table 1.** Tesorito optimised pit constrained Inferred MRE as at 22 March 2022 at three different gold cut-off grades.

The Tesorito MRE includes a 0.54Moz optimised pit shell (Table 2) capturing a significant proportion of the higher grade central zone starting from surface (Figure 2). This optimised pit shell, combined with material from the Miraflores Reserve less than 1km away, is a potential economically compelling scenario to be further investigated as part of the PEA.

CUT-OFF	TONNES (Mt)	Au (g/t)	Ag (g/t)	Au (koz)	Ag (koz)
0.8g/t Au	<b>13.69</b>	<b>1.23</b>	<b>0.89</b>	<b>540</b>	<b>391</b>

**Table 2.** Tesorito Inferred MRE, as at 22 March 2022, of an optimised pit shell at a 0.8 g/t Au cut-off capturing the central high grade porphyry core which starts from surface.

### Tesorito MRE grows combined Quinchia Project Resources to 2.6Moz

The inclusion of the Tesorito MRE using a 0.5g/t Au cut-off increases the total Quinchia Project MRE to 2.6Moz gold (Table 3), with potential to add further ounces from established and early-stage exploration targets within a 3km radius of Tesorito and Miraflores.

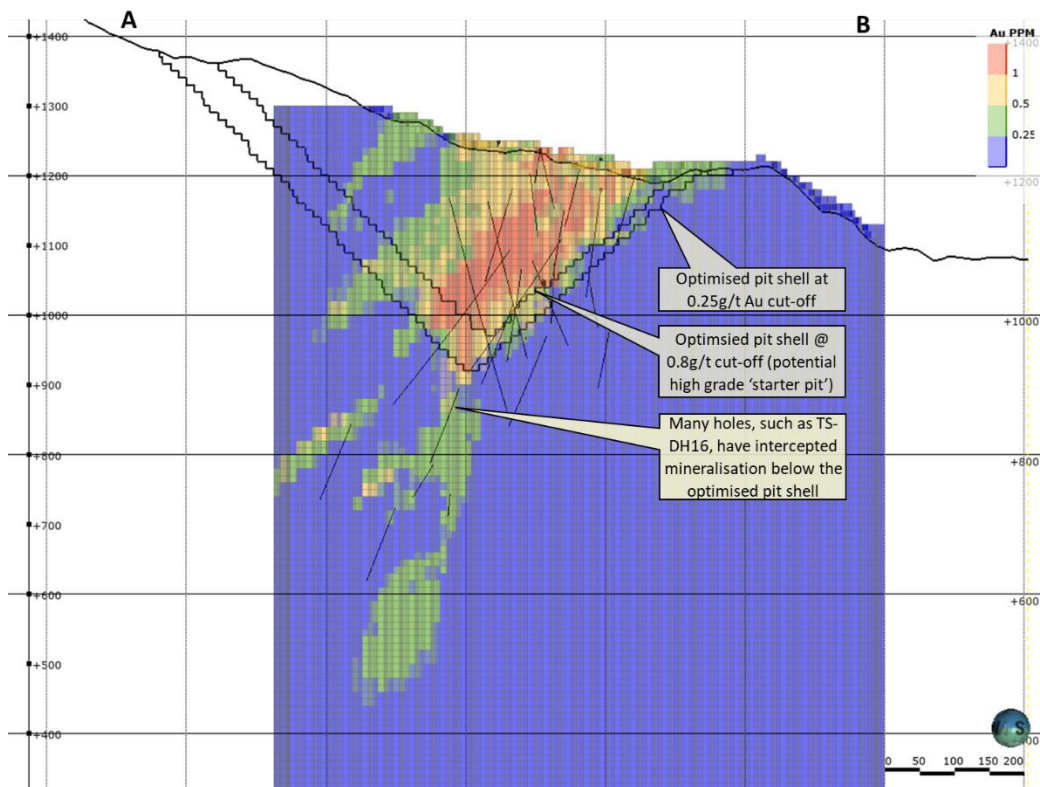

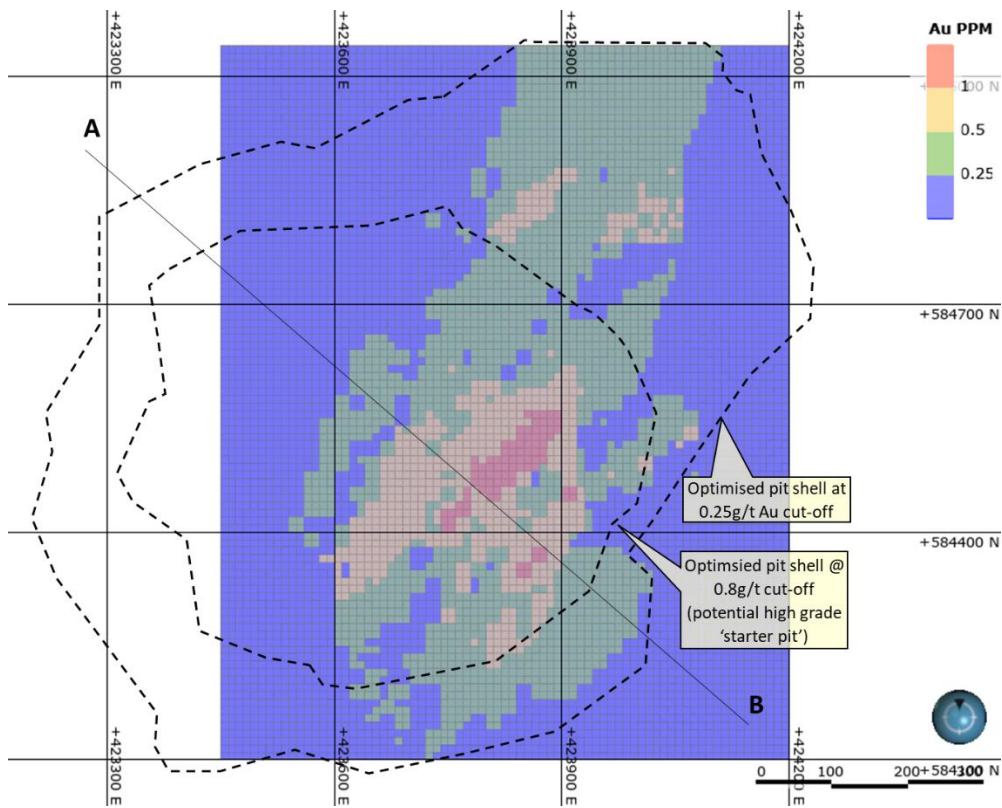

Quinchia subzone	Resource Category	CUT-OFF	TONNES (Mt)	Au (g/t)	Au (koz)
Tesorito	Inferred	0.5g/t Au	50.0	0.81	1,298
Dosquebradas	Inferred	0.5g/t Au	20.2	0.71	459
Miraflores - U.Ground	Measured + Indicated	1.2g/t Au	9.3	2.82	840
Miraflores - U.Ground	Inferred	1.2g/t Au	0.5	2.36	37
<b>QUINCHIA RESOURCE</b>			<b>80.0</b>	<b>1.02</b>	<b>2,634</b>

**Table 3.** Quinchia Project MRE<sup>1</sup>, as at 22 March 2022. Note: The Miraflores Resource includes a Reserve Estimate.

<sup>3</sup> At a 0.8g/t Au cut-off. Refer announcement 22 March 2022. The Company confirms that it is not aware of any new information that affects the information contained in the announcement.

<sup>4</sup> At a 0.25g/t Au cut-off and US\$1,800/oz gold price. Refer announcement 22 March 2022. The Company confirms that it is not aware of any new information that affects the information contained in the announcement.

### **Tesorito metallurgical test work**

A substantial activity during the half-year was the first round of Tesorito metallurgical test work. Based on preliminary results released 7 July 2022<sup>5</sup>, the Company is reassured that Tesorito mineral processing performance is likely to be typical of high gold/low copper porphyry ores including-

- 97% recovery of gold from saprolite and 87% from other units<sup>6</sup>, derived from 24 hour whole ore gold leach tests;
- an optimal grind size of p80 ~75micron which is fine grind and typical of porphyry gold ores;
- there are no appreciable benefits in including a gravity beneficiation step; and
- deleterious elements such as arsenic, mercury, organic carbon and soluble copper are all low and of no processing concern.

### **Exploration Update**

With completion of drilling for the Tesorito MRE, the Company's drilling program shifted to earlier stage targets across the Quinchia Project.

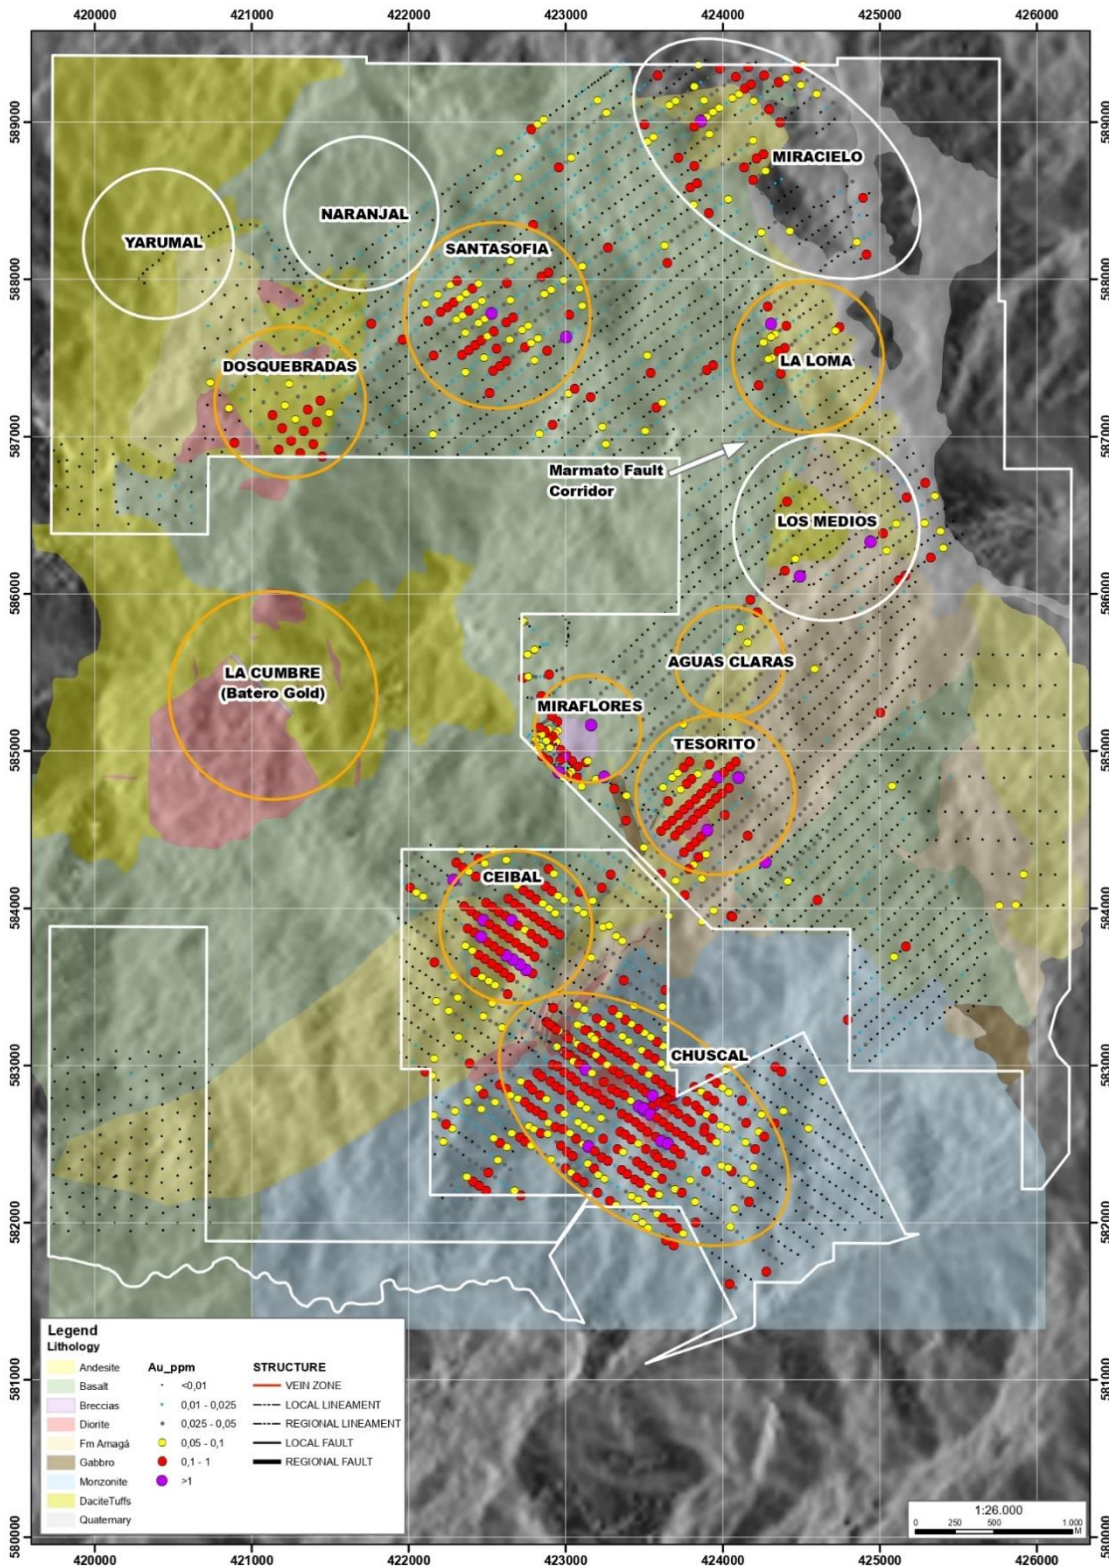

- **Central Target** Two holes were drilled from a single pad to test the Central Target geophysics anomaly between Miraflores and Tesorito deposits, beneath, but lateral to, the Miraflores gold resource. Gold grades reported from intercepts within the Central Target area were low in tenor indicating the geophysics anomaly at these depths is likely caused by non-economic mineralisation such as magnetite and sulphides. However, both drill holes intercepted Miraflores type breccia, the host rock of Miraflores mineralization, far below historic drilling and the existing Miraflores Resource envelopes. Hole QM-DH61 was collared further north to drill under the Miraflores Resource to test this gap, with assays pending at the date of this report.
- **Tesorito Deep** - A 700m deep hole (TS-DH60<sup>7</sup>) confirmed the western limits of the Tesorito deposit. Elevated pathfinders (magnetic susceptibility, Mo, Cu/Fe ratio, Cu/Zn ratio and others) in the final ~100m of drill core point to Tesorito mineralisation remaining open at depth and 'hugging' the Marmato Fault.

<sup>5</sup> Refer ASX announcement 7 July 2022. The Company confirms that it is not aware of any new information or data that materially affects the information included in the market announcement.

<sup>6</sup> Unweighted, does not account for losses from soluble gold, fine carbon and other losses from the circuit.

<sup>7</sup> Refer ASX announcement 9 May 2022. The Company confirms that it is not aware of any new information or data that materially affects the information included in the market announcement.

**Figure 2:** The Quinchia Project contains multiple targets at various levels of investigation within a ~3km radius. This image reveals the major known target areas (orange circles) and earlier stage targets (white circles) over gold geochemistry in soils anomalies and major structures. La Cumbre is a gold/copper project within the area owned by TSX listed Batero Gold ([www.baterogold.com](http://www.baterogold.com)).

**Ceibal** - Ceibal is a gold/copper porphyry system identified in 2021, with significant gold intercepts (eg. 500m @ 0.52g/t Au from surface in CEDDH01 and 586m @ 0.51g/t Au from surface in CEDDH02<sup>8</sup>). Recent drilling at three sites for 2,660m was focused on vectoring towards the, yet to be discovered, causative gold porphyry. Pathfinders reported from the two northern holes suggest a causative source closer to/under the region of 2021 drilling. The southern drill hole, which was collared near the Company's Chuscal target but drilling towards Ceibal, intercepted lithologies and ISS veining typical of the nearby Chuscal prospect (Figure 2).

Two Ceibal drilling programs have not located the causative porphyry source of the substantial gold intercepts in CHDDH01 and 02.

**Tesorito North/Claras** - Two drill holes for 1,449m tested the southern edge of a +400m gap along the Marmato Fault between northern most Tesorito drilling and the Claras blind porphyry target, ~1km to the north of Tesorito. Two additional holes were drilled near the Claras target area. Gold values were universally low<sup>9</sup>, however the alteration pathfinders identified add further weight to the inferred occurrence of a causative porphyry within this 400m gap which would explain both northern extensions of gold grade envelopes at Tesorito and the anomalism at Claras. This gap remains an area of interest (Figure 2).

### Los Cerros in the Community

The Company's focus on "buy local, train local, hire local" has, over the last few years, transformed Los Cerros to essentially a Colombian enterprise immersed in the local economy and community.

The importance of local communities to the Group and its efforts have been reflected in an award in September 2022 from the Quinchia Regional Council recognising the economic and social benefits that the Group has provided to the Quinchia community.

Los Cerros does not believe it is appropriate to invest in major community capital projects before a decision to mine an asset is made, but in recognition of the need to support local communities (in addition to employment), it has backed a number of community programs. Central to that has been supporting development of sustainable businesses in the local area that draw people away from the sometimes dangerous and environmentally damaging practice of informal mining.

Amongst other entrepreneurial programs, the Group has supported the foundation and growth of a local plantain chip business (Quinchips) and more recently has supported the development of a coffee bean export business to Australia from the Quinchia region<sup>10</sup>. These projects help to build entrepreneurial skills, self-sustaining businesses, broaden employment opportunities and demonstrate that other businesses can exist along-side mining activities.

The Group is also financing 15 tertiary scholarships and other education projects focussed on developing the potential of people in the Quinchia and Andes regions.

Our main environmental focus is on the prompt rehabilitation of drilling sites.

The Group also continues its focus on employment of local staff (90%); employment of women (36%); and female representation in senior management which has reached our short-term goal of 25%.

### Significant Changes in the State of Affairs

There were no significant changes in the state of affairs of the consolidated entity during the financial half-year.

## Note 1. Significant Accounting Policies

These general purpose financial statements for the interim half-year reporting period ended 30 June 2022 have been prepared in accordance with Australian Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Act 2001*, as appropriate for for-profit oriented entities. Compliance with AASB 134 ensures compliance with International Financial Reporting Standard IAS 34 *Interim Financial Reporting*.

These general purpose financial statements do not include all the notes of the type normally included in annual financial statements. Accordingly, these financial statements are to be read in conjunction with the annual report for the year ended 31 December 2021 and any public announcements made by the Company during the interim reporting period in accordance with the continuous disclosure requirements of the *Corporations Act 2001*.

The principal accounting policies adopted are consistent with those of the previous financial year and corresponding interim reporting period, unless otherwise stated.

### (a) No New or Amended Accounting Standards for the period

The consolidated entity has adopted all of the new or amended Accounting Standards and Interpretations issued by the Australian Accounting Standards Board ('AASB') that are mandatory for the current reporting period.

The adoption of these Accounting Standards and Interpretations did not have any significant impact on the financial performance or position of the consolidated entity.

### (b) No New Accounting Standards and Interpretations Not Yet Mandatory or Early Adopted

Australian Accounting Standards and Interpretations that have recently been issued or amended but are not yet mandatory, have not been early adopted by the consolidated entity for the annual reporting period ended 30 June 2022. The consolidated entity has not yet assessed the impact of these new or amended Accounting Standards and Interpretations.

### (c) Going Concern

During the half-year ended 30 June 2022 the Consolidated Group incurred a net loss after tax of \$1,820,501 (2021: \$2,318,237). The Consolidated Group's net cash used in operations was \$1,190,036 during the period ended 30 June 2022 (2021: \$1,715,184); its net cash used in investing activities was \$4,911,114 (2021: \$2,567,816).

The Company had a cash balance of \$14,377,103 at 30 June 2022 (2021: \$19,252,206).

## Note 2. Operating Segments

### *Identification of Reportable Operating Segments*

The Company's primary activity is mineral exploration in the geographic area of South America. This focus is consistent with the internal reports that are reviewed and used by the Board of Directors (Chief Operating Decision Makers "CODM") in assessing performance and determining the allocation of resources.

The Group is managed primarily for the sole purpose of mineral exploration.

The information reported to the CODM is on a monthly basis.

### *Intersegment Transactions*

There are no intersegment transactions.

## Note 2. Operating Segments (Continued)

### Segment Assets

Where an asset is used across multiple segments, the asset is allocated to that segment that receives majority economic value from that asset. In the majority of instances, segment assets are clearly identifiable on the basis of their nature and physical location.

### Segment Liabilities

Liabilities are allocated to segments where there is a direct nexus between the incurrence of the liability and the operations of the segment. Borrowings and tax liabilities are generally considered to relate to the Group as a whole and are not allocated. Segment liabilities include trade and other payables and certain direct borrowings.

The following items of revenue, expenses, assets and liabilities are not allocated to operating segments as they are not considered part of the core operations of any segment:

- Income tax expense
- Deferred tax assets and liabilities
- Current tax liabilities
- Head office income / expenses and related assets / liabilities

<sup>1</sup> A reassessment of the Company's 31 December 2021 business activity statement resulted in an increase in the amount of GST that the Company was able to claim with reference to capital raising costs. This resulted in a refund of \$13,543 during the period ended 30 June 2022 from the Australian Taxation Office.

*Ordinary shares*

Ordinary shares entitle the holder to participate in dividends and the proceeds on the winding up of the Company in proportion to the number of and amounts paid on the shares held. The fully paid ordinary shares have no par value and the Company does not have a limited amount of authorised capital.

On a show of hands every member present at a meeting in person or by proxy shall have one vote and upon a poll each share shall have one vote.

*Share buy-back*

There is no current on-market share buy-back.

## Note 8. Equity - Options and Performance Rights

As at the half-year reporting date, the Company has a series of options and performance rights under issue that entitle holders to one ordinary share in the Parent Company at a fixed exercise price or upon achievement of certain performance targets. #### Report on the half year financial report

##### Conclusion

We have reviewed the accompanying half year financial report of Los Cerros Limited (the Company) and its subsidiaries (the Group), which comprises the consolidated condensed statement of financial position as at 31 December 2022, and the consolidated condensed statement of profit or loss and other comprehensive income, consolidated condensed statement of changes in equity and consolidated condensed statement of cash flows for the half year ended on that date, a description of accounting policies, other selected explanatory notes, and the directors' declaration.

Based on our review, which is not an audit, we have not become aware of any matter that makes us believe that the accompanying half-year financial report of Los Cerros Limited does not comply with the *Corporations Act 2001* including:

- a giving a true and fair view of the Los Cerros Limited's financial position as at 31 December 2022 and of its performance for the half year ended on that date; and
- b complying with Accounting Standard AASB 134 *Interim Financial Reporting and the Corporations Regulations 2001*.

##### Basis for Conclusion

We conducted our review in accordance with ASRE 2410 *Review of a Financial Report Performed by the Independent Auditor of the Entity*. Our responsibilities are further described in the Auditor's Responsibilities for the Review of the Financial Report section of our report. We are independent of the Company in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the annual financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

### **Directors' responsibility for the half-year financial report**

The Directors of the Company are responsible for the preparation of the half-year financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the Directors determine is necessary to enable the preparation of the half-year financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

### **Auditor's responsibility**

Our responsibility is to express a conclusion on the half-year financial report based on our review. We conducted our review in accordance with Auditing Standard on Review Engagements ASRE 2410 *Review of a Financial Report Performed by the Independent Auditor of the Entity*, in order to state whether, on the basis of the procedures described, we have become aware of any matter that makes us believe that the half year financial report is not in accordance with the *Corporations Act 2001* including giving a true and fair view of the Group's financial position as at 30 June 2022 and its performance for the half-year ended on that date, and complying with Accounting Standard AASB 134 *Interim Financial Reporting and the Corporations Regulations 2001*.

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.
