

Innamincka – Yarrow 3 Gas Well Drilling Progress

HIGHLIGHTS

- **Yarrow 3 Gas Well currently drilling ahead at 2384m**
- **Anticipate reaching the target depth of 2720 MD over next 24 hours**
- **Yarrow has been estimated to have a 2C contingent resource of 18BCF**

Red Sky Energy (ROG: ASX) (**Red Sky** or the **Company**) is pleased to provide an update on the current progress with the Yarrow well at the Innamincka Projects (**Innamincka**).

Santos Limited (**ASX:STO**) have advised the Yarrow 3 vertical well in PRL17 in the Cooper Basin is currently drilling a 6 ¾” production hole in the Nappamerri group. The primary target is the Tirrawarra sandstone with the secondary target the Patchawarra formation.

Commenting on the drilling progress, Red Sky Managing Director, Andrew Knox, said:

“Santos has made great progress. The forward plan is to drill ahead to target depth @ 2720m. At the current drilling rate this could be achieved within the next 24 hours.”

Innamincka Projects

Santos Limited (**ASX:STO**) mobilised a rig and commenced drilling at Yarrow on Thursday 15 September 2022. The planned well total depth is approximately 2,720m. Red Sky is free carried through the drilling of this well up to a cap of \$3 million.

Yarrow has been estimated to have a 2C contingent resource of 18BCF. A further 20BCF 2C of associated gas is estimated at the Flax oil field 8km to the south east of Yarrow ([see ROG ASX announcement 6 May 2019](#)). Yarrow 3 is an appraisal gas well targeting the Tirrawarra sandstone as primary objective and the Patchawarra formation as secondary objective. Tested at Yarrow 1, the Tirrawarra sandstone was shown to flow gas to surface. The aim of the Yarrow 3 appraisal well is to test the extent of the gas accumulation.

A pipeline of approximately 18km would potentially be built to tie into the grid at Napowie to the south of the Yarrow gas field.

Various statements in this report constitute statements relating to intentions, future acts and events. Such statements are generally classified as forward-looking statements and involve unknown risks, expectations, uncertainties and other important factors that could cause those future acts, events and circumstances to differ from the way or manner in which they are expressly or impliedly portrayed herein.

Some of the more important of these risks, expectations and uncertainties are pricing and production levels from the properties in which the Company has interests and the extent of the recoverable reserves at those properties. In addition, the Company has a number of exploration permits. Exploration for oil and gas is expensive, speculative and subject to a wide range of risks. Individual investors should consider these matters in light of the personal circumstances (including financial and taxation affairs) and seek professional advice from their accountant, lawyer or other professional advisor as to the suitability for them of an investment in the Company.
