

ASX ANNOUNCEMENT**4 October 2022****Scope of GMP manufacturing licence for
Mildura facility extended**

4 October 2022 – Cann Group Limited (ASX: CAN) (**Cann** or the **Company**) announced today that the GMP manufacturing licence for the Company’s flagship Mildura facility, which was issued by the Therapeutic Goods Administration (**TGA**) on 30 June 2022, has been extended to cover additional manufacturing capabilities.

The GMP manufacturing licence extension allows Cann Group to manufacture and release finished dried flower products for patient use at Mildura, and crops currently under cultivation at Mildura have been allocated to this purpose. The Company will utilise its GMP-approved laboratory testing capabilities to test patient-ready flower products released from the Mildura facility.

This licence extension is in addition to capabilities previously announced on 30 June 2022 covering the manufacture of dried flower as an Active Pharmaceutical Ingredient (**API**) and hard capsule manufacturing.

Cultivation, manufacturing, testing, and packaging are also being offered as a service to commercial clients.

Cann Group’s CEO, Mr Peter Crock, said “This licence extension allows Cann to now manufacture patient-ready dried flower products at our Mildura facility, allowing us to quickly respond to market demands.”

Authorised for release by the Board of Directors of Cann Group Limited.
