## ASX ANNOUNCEMENT

### Senetas Corporation Limited

#### Votiro Business Update – Investor Webcast

Senetas Corporation Ltd (ASX: SEN) (Senetas), advises that it will host an investor webcast on Thursday 27 October 2022 at 10.30am (Melbourne time) to provide an update on its investment in Votiro Cybersec Global Pty Ltd (Votiro), a global leader in content disarm and reconstruction (CDR) technology.

The webcast will be hosted by Senetas CEO, Andrew Wilson and feature a presentation from Votiro CEO, Ravi Srinivasan. The presentation will provide investors with an update on Votiro's business strategy, growth opportunities, and the ongoing development of Votiro's patented CDR technology that provides world leading zero day anti-ransomware and malware protection. Following the presentation, investors will be provided with the opportunity for Q&A.

Investors can register for the webcast using the following link:

<https://s1.c-conf.com/diamondpass/10026320-7gibfu.html>

Registered participants will receive their dial in number upon registration.

**END**

## ABOUT SENETAS

An Australian global leader in cybersecurity, Senetas (ASX:SEN) develops and manufactures solutions trusted to protect the world's most sensitive data. We protect commercial, government, critical infrastructure, defence and Cloud services' data in 45+ countries. Our cybersecurity solutions are chosen by the most secure organisations to protect against data breaches and the most advanced malware attacks – preventing catastrophic financial and reputational consequences.

All Senetas solutions deliver maximum security without compromising systems' performance and user convenience. They are state-of-the-art – from multi-certified and high-performance encryption security for all data networks; to secure file-sharing, storage and collaboration; and advanced CDR malware attack and zero-day exploit prevention.

**CypherNET** encryptors protect data in motion across high-speed networks essential to businesses and governments and the Cloud services security they depend on. They are certified by FIPS, Common Criteria and NATO. CypherNET hardware and virtualised encryptors support all modern network types – network infrastructure and 'in the field'. All CypherNET encryptors are interoperable and share a cryptographically agile and Quantum-resistant platform.

**SureDrop** provides the complete information security, 100% data location control and data sovereignty essential for secure local, remote and mobile workgroups. Developed on a cybersecurity platform, SureDrop provides encryption, secure key management, file fragmentation and features preventing user security errors. Seamless integration with Microsoft 365, Active Directory and Azure maximise SureDrop's user convenience.

**Votiro Cloud** prevents malicious crippling malware and ransomware attacks and zero-day exploits. Its patented CDR technology is not 'signature-dependent', it prevents known and signatureless unknown malware attacks and zero-day exploits - preventing successful ransomware attacks and data breaches. Votiro Cloud makes incoming data safe in an instant.

Senetas solutions are distributed and supported internationally by Thales, the world's largest security company. Our state-of-the-art network data security, file-sharing and anti-malware solutions protect sensitive and high-value data - from citizen identity and privacy to government, defence and military secrets, intellectual property, financial transactions and critical national infrastructure.
