ASX Announcement

2 December 2022

Singtel signs 2-year contract extension for enterprise Knowledge Management solution, KnowledgeIQ

Knosys Limited (ASX: KNO), (“Knosys” or the “Company”), a global software-as-a-service (SaaS) information technology company offering a range of software solutions designed to boost productivity, collaboration and connectivity in the digital workplace, is pleased to announce that Singtel has signed a two (2) year contract extension for the continued use of Knosys’ market leading knowledge management platform KnowledgeIQ.

The value of the contract over the two year period is expected to be \$750,000. In addition, Singtel will upgrade to the latest release of KnowledgeIQ over the next six months to benefit from the new product features and capabilities.

This contract extension, in addition to the recently announced three year contract extension with ANZ Bank (ASX release 10 October 2022) provides further validation of the Company’s enterprise Knowledge Management solution and underpins the recurring revenue over the years ahead. Knosys is now implementing an industry vertical approach with its portfolio of SaaS solutions to further drive sales in FY23 and beyond.

Knosys Managing Director, John Thompson said, “Over the past few years, Knosys has demonstrated that it has a robust business model through the cycle, with low volatility recurring revenue based on multi-year contracts with blue-chip clients. All three of our SaaS solutions have an updated Product Roadmap with new advanced features, a distinct marketing position and clear target markets. The recent contract extensions with ANZ Bank, Optus and Singtel validate our enterprise grade Knowledge Management solution, which gives us confidence in our pipeline opportunities moving forward.

ABOUT KNOSYS

Knosys is a leading SaaS provider based in Melbourne, with specialist expertise in helping businesses manage information and knowledge. We enable organisations to make sense of information and use it to connect, collaborate and drive strong business outcomes for customers, employees and stakeholders. Our focus is on developing solutions that enable businesses to make the most of information and knowledge assets that sit within their organization. This currently includes knowledge management, intranet and library management solutions.
