3 Details of the Offers

3.1 The Rights Issue

The Rights Offer is being made as a pro-rata non-renounceable entitlement offer to existing shareholders of 1 new Share for every 3 Shares held on the Record Date at an issue price of \$0.035 (**Rights Issue Shares**), together with one free Option (exercisable at \$0.08 per Option on or before 31 January 2025) for every two new Shares subscribed for under the Rights Issue (**Rights Issue Options**) (together the **Rights Issue**).

To comply with the ASX Listing Rules, the Rights Issue has been priced at a minor discount (\$0.0005) to the issue price for the Placement Shares.

Fractional entitlements will be rounded down to the nearest whole number.

Based on the capital structure of the Company as at the date of this Prospectus, a maximum of approximately 34,467,700 Rights Issue Shares and 17,233,850 quoted Rights Issue Options will be issued pursuant to the Rights Issue to raise up to approximately \$1.2 million (subject to rounding).

As at the date of this Prospectus the Company has 8,750,000 unquoted Options on issue, as follows:

- (a) 5,500,000 Options (expiring 31 August 2023); and
- (b) 3,250,000 Options (expiring 30 November 2023).

All of the Rights Issue Shares offered under this Prospectus will rank equally with the Shares on issue at the date of this Prospectus. Please refer to Section 5 for further information regarding the rights and liabilities attaching to the Shares.

All of the Rights Issue Options offered under this Prospectus will be issued on the terms and conditions set out in Section 6. All Shares issued on conversion of the Rights Issue Options will rank equally with the Shares on issue at the date of this Prospectus.

If all Rights Issue Options are exercised the Company will receive approximately a further \$1.38 million. However the exercise of Rights Issue Options is entirely at the discretion of the holder.

The purpose of the Rights Issue and the intended use of funds raised are set out in Section 4.1.

The Rights Issue is non-renounceable. Accordingly, an Eligible Shareholder may not sell or transfer all or part of their Entitlement.

3.2 The Placement Options offer

The offer of the Placement Options is for the issue of up to 15,211,269 Placement Options to applicants who participated in the Placement.

The Placement was for the issue of 30,422,536 Shares at an issue price of \$0.0355 per Share. The Placement will be issued in two tranches, with the first tranche to be issued on 15 December 2022 to raise \$917,703 (before costs) and the second tranche to be issued on 31 January 2023, subject to shareholder approval, to raise a further \$162,298 (before costs). The purpose of the Placement and the intended use of funds are set out in Section 4.1.

Based on the number of Shares issued to Eligible Placement Options Applicants who participated in the Placement, and subject to shareholder approval of tranche 2 of the Placement, a maximum of 15,211,269 Placement Options will be issued pursuant to this Prospectus. Each Eligible Placement Options Applicant who participated in the Placement will be able to apply for one Placement Option for every two Placement Shares they subscribed for. Each Placement Option is exercisable at \$0.08 on or before 31 January 2025.

The issue of the Placement Options remains subject to approval of the Company's shareholders for the purposes of ASX Listing Rule 7.1. An extraordinary general meeting to approve the issue is expected to be held in mid-January 2023.

If all Placement Options are exercised, the Company will receive approximately a further \$1.22 million. However, the exercise of the Placement Options is entirely at the direction of the holder.

The terms and conditions of the Placement Options are set out in Section 6 of this Prospectus.

Any shares to be issued upon the exercise of the Placement Options offered under this Prospectus will rank equally with the Shares on issue at the date of this Prospectus. Please refer to Section 5 for further information regarding the rights and liabilities attaching to the Shares.

3.3 Shortfall offer

Any Rights Issue Shares and Rights Issue Options not taken up pursuant to the Rights Issue will form the Shortfall Offer (**Shortfall Shares**). The Shortfall Offer is a separate offer made pursuant to this Prospectus.

The Shortfall Shares will first be made available for subscription to Eligible Shareholders. If all Shortfall Shares are not subscribed for by Eligible Shareholders the Company reserves the right to place those Shares (together with attaching Options) to investors within three months following the Closing Date, subject to compliance with the ASX Listing Rules. The issue price for each Shortfall Share to be issued under the Shortfall Offer shall be \$0.035, being the price at which Shares have been offered under the Rights Issue. An applicant under the Shortfall Offer will also receive 1 free Option for every 1 Shortfall Share subscribed for under the Shortfall Offer).

All decisions regarding the allocation of Shortfall Shares will be made by the Board.

All decisions regarding the allocation of the Shortfall Shares will be final and binding on all applicants under the Shortfall Offer; as such there is no guarantee that any Shortfall Shares applied for will be issued.

The Company will have no liability to any Applicant who receives less than the number of Shortfall Shares they applied for under the Shortfall Offer. If the Company scales back any applications for Shortfall Shares under the Shortfall Offer any Application monies will be returned (without interest) as soon as practicable.

3.4 Broker Offer

Pursuant to the engagement letter entered into between the Company and the Joint Lead Managers, the Company has agreed to issue 10,000,000 Broker Options to be split equally between the Joint Lead Managers as consideration for the services provided by the Joint Lead Managers to the Company in relation to the Capital Raising.

The issue of the Broker Options remains subject to the approval of the Company's shareholders for the purposes of ASX Listing Rule 7.1. An extraordinary general meeting to approve the issue is expected to be held in mid-January 2023.

Each Broker Option will be issued in the same class as the Placement Options and Rights Issue Options. The Broker Options have the same exercise price and exercise expiry date as the Placement Options and Rights Issue Options.

If all Broker Options are exercised, the Company will receive approximately a further \$800,000. However, exercise of the Broker Options is entirely at the discretion of the holder.

Any Shares to be issued upon the exercise of the Broker Options offered under this Prospectus will rank equally with the Shares on issue at the date of this Prospectus. Please refer to Section 5 for further information regarding the rights and liabilities attaching to the Shares.

3.17 ASX quotation

An application for Official Quotation of the Placement Options, Rights Issue Shares, Rights Issue Options and Broker Options offered pursuant to this Prospectus will be made to ASX within 7 days after the date of the Original Prospectus.

If ASX does not grant Official Quotation of the Rights Issue Shares offered pursuant to this Prospectus before the expiration of 3 months after the date of issue of the Prospectus, (or such period as varied by the ASIC), the Company will not issue any Rights Issue Shares (or attaching Rights Issue Options) and will refund all application monies received under the Rights Issue within the time prescribed under the Corporations Act, without interest.

If the Company does not receive sufficient Applications to meet the requirements for quotation of a second class of securities (being the Placement Options, Rights Issue Options and Broker Options) under the ASX Listing Rules or ASX does not grant Official Quotation of the Placement Options, Rights Issue Options and Broker Options offered pursuant to this Prospectus before the expiration of 3 months after the date of issue of the Prospectus, (or such period as varied by the ASIC), the Company will not issue any Placement Options, Rights Issue Options and Broker Options and will refund all application monies received for the Placement Options, Rights Issue Options and Broker Options (which will be \$nil as they are free attaching Options) within the time prescribed under the Corporations Act, without interest.

The fact that ASX may grant Official Quotation to the Placement Options, Rights Issue Shares, Rights Issue Options and Broker Options is not to be taken in any way as an indication of the merits of the Company or the Rights Issue Shares offered under this Prospectus, or of the Rights Issue Options, Placement Options or Broker Options.

3.18 Issue

Rights Issue Shares, Rights Issue Options, Broker Options and Placement Options issued pursuant to the Offers under this Prospectus will be issued on or around 31 January 2023 in accordance with the ASX Listing Rules.

Holding statements for Rights Issue Shares, Rights Issue Options, Broker Options and Placement Options issued under this Prospectus will be mailed in accordance with the ASX Listing Rules as soon as practicable after their issue.

3.19 Overseas Shareholders

The Offers do not, and are not intended to, constitute an offer in any place or jurisdiction in which, or to any person to whom, it would not be lawful to make such an offer or to issue this Prospectus.

It is not practicable for the Company to comply with the securities laws of overseas jurisdictions having regard to the number of overseas Shareholders, the number and value of Rights Issue Shares these Shareholders would be offered and the cost of complying with regulatory requirements in each relevant jurisdiction. Accordingly, the Rights Issue is not being extended and Rights Issue Shares (and attaching Rights Issue Options) will not be issued to Shareholders with a registered address which is outside Australia or New Zealand.

The Shares and Options under the Offers are not being offered or sold to the public in New Zealand other than to Eligible Shareholders to whom the offer of Shares and Options under the Offers are being made in reliance on the *Financial Markets Conduct Act 2013* and the *Financial Markets Conduct (Incidental Offers) Exemption Notice 2016*.

This document has not been registered, filed or approved by any New Zealand regulatory authority. This document is not a product disclosure statement under New Zealand law and is not required to, and may not, contain all the information that a product disclosure statement under New Zealand law is required to contain.

3.20 Inconsistency

The terms and conditions of the Rights Issue and the offer of Placement Options and Broker Options set out in this Prospectus prevail to the extent of any inconsistency with the Rights Issue Application Form, the Placement Options Application Form or the Broker Offer Application Form.

4 Purpose and effect of the Capital Raising

4.1 Purpose of the Capital Raising and use of funds

Pursuant to the Capital Raising (comprising the Placement, Rights Issue and Shortfall Offer), Forbidden Foods is aiming to raise \$1,080,000 under the Placement and up to approximately \$1.2 million under the Rights Issue (and Shortfall Offer) for a total maximum amount of approximately \$2.29 million (before costs).

The purpose of the Offers is to provide immediate short term capital resources to accelerate sales and the international expansion of the Company's leading Blue Dinosaur® range, particularly into the United States.

As per the Company's ASX Announcement on 2 December 2022, integration with US distribution partner, KeHE Distributors has advanced rapidly, having completed all required Electronic Data Interchange interface integration to ensure seamless orders from major US retailers. Additionally, work alongside KeHE Sample orders for Blue Dinosaur® US stock have been received and the Company anticipates first orders from large retail groups shortly.

In addition, the proceeds of the Offers will be used to fund general working capital and to pay the expenses of the Offers, each as follows:

Item	Allocation (if \$400,000 raised under Rights Issue and Shortfall Offer)	Allocation (if \$700,000 raised under Rights Issue and Shortfall Offer)	Allocation (if Rights Issue and Shortfall Offer fully subscribed)
Blue Dinosaur	\$800,000	\$1,000,000	\$1,200,000
Expenses of the Capital Raising	\$220,000	\$240,000	\$280,000
Working capital	\$297,703	\$377,703	\$644,072
Total	\$1,317,703	\$1,617,703	\$2,124,072

Note: Each of the above allocations includes the full \$917,702 raised under tranche 1 of the Placement. If the Company's shareholders approve tranche 2 of the Placement at the EGM in January, an additional \$162,298 will be raised, with \$9,738 in additional expenses being incurred and the balance of \$152,560 being allocated to working capital.

4.2 Effect of the Offers

The principal effect of the Offers, assuming tranche 2 of the Placement is approved, the Rights Issue (and Shortfall Offer) is fully subscribed and assuming that all Placement Options and Broker Options offered under the Prospectus are issued, will be to:

- increase the cash reserves of the Company by approximately \$2.29 million, before deducting the costs of the Capital Raising;
- increase the number of Shares on issue from 103,403,102 to 168,293,338; and
- increase the number of Options on issue to 51,195,119 Options, of which 42,445,119 will be quoted and 8,750,000 will remain unquoted (in addition to the 2,455,260 performance rights that have been approved by shareholders but have not yet been issued).

4.3 Effect on capital structure

The effect of the Capital Raising on the capital structure of Forbidden Foods, based on the amount raised under the Capital Raising and assuming all shareholder approvals are obtained is set out below.

Shares and Options	Number (if \$400,000 raised under Rights Issue and Shortfall Offer)	Number (if \$700,000 raised under Rights Issue and Shortfall Offer)	Number (if Rights Issue and Shortfall Offer fully subscribed)
Shares currently on issue	103,403,102	103,403,102	103,403,102
Placement Shares to be issued pursuant to the Placement	30,422,536	30,422,536	30,422,536
Rights Issue Shares to be issued pursuant to the Rights Issue	11,267,606	19,718,310	34,467,700
Total Shares	145,093,244	153,543,948	168,293,338
Unquoted options currently on issue	8,750,000	8,750,000	8,750,000
Performance rights approved at 2022 AGM but not yet issued to recipients	2,455,260	2,455,260	2,455,260
Placement Options to be issued	15,211,269	15,211,269	15,211,269
Rights Issue Options to be issued	5,633,803	9,859,155	17,233,850
Broker Options	10,000,000	10,000,000	10,000,000
Total share capital (on a fully diluted basis)	187,143,576	199,819,632	221,943,717

Note: Assumes that tranche 2 of the Placement is approved by the Company's shareholders at the EGM in January 2023. If not, then the number of Shares will be reduced by 4,571,761 and the number of Options will be reduced by 2,285,881.

4.4 Effect on the control of the Company

The potential effect that the Rights Issue will have on the control of the Company, and the consequences of that effect, will depend on a number of factors, including investor demand. However, given the Placement, and the structure of the Rights Issue (together with the Shortfall Offer) could have a material effect on the dilution of shareholdings and/or control of the Company.

The potential effect on control of the Capital raising is summarised below:

- even if all Eligible Shareholders take up their Entitlement under the Rights Issue, then because of the Placement, all Eligible Shareholders will suffer an approximate 25% dilution in their shareholding as compared to their shareholding as at the date of this Prospectus (subject to that Eligible Shareholder having participated in the Placement or taking up additional Shares under the Shortfall Offer);
- in the more likely event that some Eligible Shareholders do not take up all of their Entitlement under the Rights Issue, then the interests of those Eligible Shareholders in the Company will be diluted even further relative to those Eligible Shareholders who have participated in the Placement or who subscribe for their full Entitlement, or those Eligible Shareholders who take up their full Entitlement and subscribe for additional Shares under the Shortfall Offer; and
- there are currently three substantial shareholders on the Company's share register. Following completion of the Rights Issue, and assuming the Rights Issue (and Shortfall Offer) is fully subscribed and that those holders do not take up their Entitlement under the Rights Issue or subscribe for Shares under the Placement (noting that neither Milani Family Investments nor MKB Family Investments, being related parties of Jarrod Milani and Marcus Brown, executive directors of the Company, can participate in the Placement without shareholder approval), their projected voting power in the Company is as follows:

Shareholder	Shares	% before Capital Raising	% after Capital Raising
MKB Family Investments Pty Ltd <MKB Family A/C>	9,901,284	9.58%	5.88%
Milani Family Investments Pty Ltd <Milani Family A/C>	9,427,811	9.12%	5.60%
Tuwhera Te Rangi Ltd	6,876,306	6.65%	4.09%

Note: Assumes that tranche 2 of the Placement is approved by the Company's shareholders at the EGM in January 2023.

4.5 Financial effect of the Capital Raising

The audited balance sheet as at 30 June 2022 and the unaudited pro-forma balance sheet as at 30 June 2022 shown below have been prepared on the basis of the accounting policies adopted by the Company and reflect the financial effect of the Capital Raising on the Company.

The pro forma balance sheet has been prepared on the following basis:

- the Placement has raised \$917,703;

Note 1 The Statement of Financial Position at 30 June 2022 has been extracted from the Company's audited financial statements for the year ended 30 June 2022 as released to the ASX on 30 August 2022.

Note 2 The subsequent events adjustment provides for actual material changes subsequent to 30 June 2022 up to 30 September 2022, including:

- decrease of cash and cash equivalents by \$1.333m
- reduction in trade and other receivables and trade and other payables
- general expenditure offset by income

Note 3 The unaudited pro forma Statement of Financial Position at 30 September 2022 is based on the Company's Statement of Financial Position at 30 June 2022 adjusted for material changes subsequent to that date including the items in Note 2.

Note 4 The pro forma adjustments assuming 50% subscription of Rights Issue and Shortfall Offer include the following:

- the issue of 25,850,775 new Shares through the Placement at \$0.0355 per Share raising \$917,703 before costs.
- the issue of 17,233,850 new Shares through the Rights Issue at \$0.035 per Rights Issue Share raising \$603,185 before costs.
- estimated transaction costs of \$230,437 to be paid in cash and offset against the issued capital.

Note 5 The pro forma adjustments assuming full subscription of Rights Issue and Shortfall Offer include the following:

- the issue of 25,850,775 new shares through the Placement at \$0.0355 per share raising \$917,703 before costs
- the issue of 34,467,700 new shares through the Rights Issue at \$0.035 per Rights Issue Share raising \$1,206,370 before costs
- estimated transaction costs of \$270,247 to be paid in cash and offset against the issued capital

Note 6 If the Company's shareholders approve the issue of tranche 2 of the Placement Shares, the Company will issue a further 4,571,761 Placement Shares and a further 2,285,881 Placement Options, and the Company will receive an additional \$162,298 in current assets.

The Placement Options and Rights Issue Options to be issued pursuant to this Prospectus will be issued for nil consideration. Accordingly, there will be no immediate effect on the Company's balance sheet. However, capital will be raised if the Placement Options or Rights Issue Options are exercised. This will have a positive effect on the Company's balance sheet by raising current assets by a corresponding amount.

If the maximum number of Placement Options and Rights Issue Options are issued and then exercised, the Company will receive approximately a further \$2,412,739 in current assets. However, the Company is not able to specify with any certainty the extent of any change to the balance sheet given the uncertainty around the number of Placement Options or Rights Issue Options to be ultimately issued and whether and when any of the Placement Options or Rights Issue Options will be exercised.

This Section excludes any effects from the issue of options to BW Equities Pty Ltd or Viriathus Capital Pty Ltd as part of their fees, which is subject to shareholder approval.

5 Rights and Liabilities attaching to Shares

5.1 Introduction

The rights and liabilities attaching to ownership of Shares arise from a combination of the Constitution, statute, the ASX Listing Rules and general law.

A summary of the significant rights, liabilities and obligations attaching to the Shares and a description of other material provisions of the Constitution are set out below. This summary is not exhaustive nor does it constitute a definitive statement of the rights and liabilities of Shareholders. The summary assumes that the Company is admitted, and continues to be admitted, to the Official List of the ASX.

5.2 Escrow restrictions

In the event that ASX determines that certain Shares should be classified as 'restricted securities', a Shareholder must not dispose of those restricted securities (and the Company must refuse to acknowledge a disposal) during the applicable escrow period, except as permitted by the ASX Listing Rules. Shareholders who hold restricted securities are taken to have agreed that the restricted securities are kept on the Company's issuer sponsored sub-register and to have a holding lock applied for the duration of the escrow period. Shareholders will not be entitled to participate in any return of capital on restricted securities during the escrow period except as permitted by the ASX Listing Rules.

5.3 Voting at a general meeting

The Company's Constitution was amended on 29 November 2022 which requires the Company, to decide substantive resolutions at a general meeting by poll rather than a show of hands. In case of procedural resolutions, voting must be conducted by a show of hands. If the votes are equal on a proposed resolution, the Chairman of the meeting has a casting vote, in addition to his or her deliberative vote.

5.4 Meetings of members

Each Shareholder is entitled to receive notice of, attend and vote at general meetings of the Company and to receive all notices, accounts and other documents required to be sent to Shareholders under the Constitution, Corporations Act and ASX Listing Rules. The Company must give at least 28 days' written notice of a general meeting.

The Company's Constitution was amended on 29 November 2022 so as to enable the Company to hold general meetings physically, wholly-virtually or using a hybrid structure. Where the Company holds a virtual or hybrid general meeting using virtual meeting technology, the Shareholders as a whole are allowed a reasonable opportunity to participate in the meeting. The Chair of the meeting may adjourn the meeting in the event that a technical difficulty prevents the Shareholders as a whole from participating in the meeting.

5.5 Dividends

The Board may pay any interim and final dividends that, in its judgement, the financial position of the Company justifies. The Board may also pay any dividend required to be paid under the terms of issue of a Share, and fix a record date for a dividend and decide the method of payment.

5.6 Transfer of Shares

Subject to the Constitution and to any restrictions attached to a Shareholder's Shares, Shares may be transferred by proper ASTC transfer (effected in accordance with the ASX Settlement Operating Rules, Corporations *Regulations 2001* (Cth) and ASX Listing Rules) or by a written transfer in any usual form or in any other form approved by the Board and permitted by the Corporations Act and ASX requirements. The Board may decline to register, or prevent registration of, a transfer of Shares or apply a holding lock to prevent a transfer in accordance with the Corporations Act or the ASX Listing Rules.

5.7 Issues of further Shares

The Board may, subject to the Constitution, Corporations Act and the ASX Listing Rules issue, allot or grant options for, or otherwise dispose of, Shares in the Company on such terms as the Board decides.

5.8 Winding up

If the Company is wound up, then subject to the Constitution, the Corporations Act and any rights or restrictions attached to any Shares or classes of shares, Shareholders will be entitled to a share in any surplus property of the Company in proportion to the number of Shares held by them. If the Company is wound up, the liquidator may, with the sanction of a special resolution, divide among the Shareholders the whole or any part of the Company's property and decide how the division is to be carried out as between Shareholders or different classes of shareholders.

5.9 Non-marketable parcels

In accordance with the ASX Listing Rules, the Board may sell Shares that constitute less than a marketable parcel by following the procedures set out in the Constitution. A marketable parcel of shares is defined in the ASX Listing Rules and is generally, a holding of shares with a market value of not less than \$500.

5.10 Variation of class rights

The procedure set out in the Constitution must be followed for any variation of rights attached to the Shares. Under the Constitution, and subject to the Corporations Act and the terms of issue of a class of shares, the rights attached to any class of shares may be varied:

- with the written consent of the holders of 75% of the shares of the class; or
- by a special resolution passed at a separate meeting of the holders of shares of the class.

5.11 Directors – Appointment and retirement

Under the Constitution, the Board is comprised of a minimum of three Directors and a maximum of nine Directors, unless the Company resolves otherwise at a general meeting. Directors are elected or re-elected at general meetings of the Company.

No Director (excluding the CEO) may hold office without re-election beyond the third annual general meeting following the meeting at which the Director was last elected or re-elected. The Board may also appoint any eligible person to be a Director either as an addition to the existing Directors or to fill a casual vacancy, who will then hold office until the conclusion of the next annual general meeting of the Company following his or her appointment.

5.12 Directors – Voting

Questions arising at a meeting of the Board must be decided by a majority of votes cast by the Directors present and entitled to vote on the matter. If the votes are equal on a proposed resolution, the Chairman of the meeting has a casting vote in addition to his or her deliberative vote, unless there are only two Directors present or entitled to vote in which case the Chairman of the meeting does not have a second or casting vote and the proposed resolution is taken as lost. A Director may attend and vote by proxy at a meeting of the Board if the proxy is a Director, and has been appointed in writing by the appointer.

5.13 Directors – Remuneration

Under the Constitution, the Board may decide the remuneration from the Company to which each Director is entitled for his or her services as a Director but the total aggregate amount provided to all Non-Executive Directors of the Company for their services as Directors must not exceed in any financial year the amount fixed by the Company in general meeting. The remuneration of a Director (who is not the CEO or an executive Director) must not include a commission on, or a percentage of, profits or operating revenue. Any change to that maximum aggregate amount needs to be approved by Shareholders.

Directors are entitled to be paid for all travelling and other expenses they incur in attending to the Company's affairs, including attending and returning from general meetings of the Company

or meetings of the Board or of Board Committees. Any Director who performs extra services, makes any special exertions for the benefit of the Company or otherwise performs services which, in the opinion of the Board, are outside the scope of ordinary duties of a Non-Executive Director, may be remunerated for the services (as determined by the Board) out of the funds of the Company.

5.14 Powers and duties of Directors

The business and affairs of the Company are to be managed by or under the direction of the Board, which (in addition to the powers and authorities conferred on it by the Constitution) may exercise all powers and do all things that are within the power of the Company and that are not by the Constitution or by law directed or required to be done by the Company in its general meeting.

5.15 Preference shares

The Company may issue preference shares including preference shares which are, or at the option of the Company or holder are, liable to be redeemed or converted into ordinary shares. The rights attaching to preference shares are those set out in the Constitution or have been otherwise approved by special resolution of the Company.

5.16 Indemnities

The Company must indemnify each Director and executive officer on a full indemnity basis and to the full extent permitted by law against all losses, liabilities, costs, charges and expenses incurred by the person as an officer of the Company.

The Company may, to the extent permitted by law, purchase and maintain insurance or pay, or agree to pay, a premium for insurance for each officer of the Company against any liability incurred by that person as an officer of the Company or of a related body corporate, including, but not limited to, a liability for negligence or for reasonable costs and expenses incurred in defending or responding to proceedings (whether civil or criminal and whatever the outcome).

5.17 Access to records

The Company may enter into contracts with a Director or former Director agreeing to provide continuing access for a specified period after the Director ceases to be a Director to board papers, books, records and documents of the Company which relate to the period during which the Director or former Director was a Director on such terms and conditions as the Board thinks fit. The Company may procure that its subsidiaries provide similar access to board papers, books, records or documents.

5.18 Amendment

The Constitution can only be amended by special resolution passed by at least three-quarters of Shareholders present (in person or by proxy, attorney or representative) and entitled to vote on the resolution at a general meeting of the Company.

6 Rights and Liabilities attaching to Options

The Placement Options, Rights Issue Options and Broker Options each have the same terms and conditions as set out in this Section.

6.1 Entitlement

6.2 Exercise Price

Subject to paragraph 6.9, the amount payable upon exercise of each Option will be \$0.08 (**Exercise Price**).

Each Option will expire at 5.00 pm (AEDT) on 31 January 2025 (**Expiry Date**). An Option not exercised before the Expiry Date will automatically lapse on the Expiry Date.

6.4 Exercise Period

The Options are exercisable at any time on or prior to the Expiry Date (**Exercise Period**).

6.5 Notice of Exercise

6.6 Exercise Date

A Notice of Exercise is only effective on and from the later of the date of receipt of the Notice of Exercise and the date of receipt of the payment of the Exercise Price for each Option being exercised in cleared funds (**Exercise Date**).

6.7 Timing of issue of Shares on exercise

Within 15 Business Days after the Exercise Date, the Company will, subject to compliance with all applicable laws and the ASX Listing Rules:

- (a) issue the number of Shares required under these terms and conditions in respect of the number of Options specified in the Notice of Exercise and for which cleared funds have been received by the Company;
- (b) if required, give ASX a notice that complies with section 708A(5)(e) of the Corporations Act; and
- (c) if admitted to the official list of ASX at the time, apply for official quotation on ASX of Shares issued pursuant to the exercise of the Options.

If a notice delivered under 7.7(b) for any reason is not effective to ensure that an offer for sale of the Shares does not require disclosure to investors, the Company must, no later than 20 Business Days after becoming aware of such notice being ineffective, lodge with ASIC a prospectus prepared in accordance with the Corporations Act and do all such things necessary to satisfy section 708A(11) of the Corporations Act to ensure that an offer for sale of the Shares does not require disclosure to investors.

6.8 Shares issued on exercise

Shares issued on exercise of the Options rank equally with the then issued shares of the Company.

6.10 Participation in new issues

There are no participation rights or entitlements inherent in the Options and holders will not be entitled to participate in new issues of capital offered to Shareholders during the currency of the Options without exercising the Options.

6.11 Change in exercise price

6.12 Transferability

Application will be made for the Options to be quoted on ASX. The Options will be transferable subject to any restrictions imposed by ASX.

7 Risk Factors

This Section 7 describes the potential risks associated with the Company's business and an investment in Shares. It does not list every risk that may be associated with the Company or an investment in Shares now or in the future, and the occurrence or consequences of some of the risks described in this Section 7 are partially or completely outside the control of the Company, the Directors and the Management team.

The selection and order of risks has been based on an assessment of a combination of the probability of the risk occurring, the ability to mitigate the risk and impact of the risk if it did occur. The assessment is based on the knowledge of the Directors and Management team as at the date of this Prospectus. There may be other risks which Directors are unaware of at the time of issuing this Prospectus which may impact on the Company, its operations or the valuation and performance of the Shares or Options. The importance of different risks may change and other risks may emerge in the future.

Before applying for Shares or Options, any prospective investor should be satisfied that they have a sufficient understanding of the risks involved in making an investment in the Company and should consider whether the Shares or Options are a suitable investment, having regard to their own investment objectives, financial circumstances and taxation position. If you do not understand any part of this Prospectus or are in any doubt as to whether to invest in the Shares or Options, it is recommended that you seek professional guidance from your stockbroker, solicitor, accountant, tax adviser or other independent and qualified professional adviser before deciding whether to invest.

7.1 Risks specific to an investment in the Company

(a) Reliance on third party raw material and manufacturing suppliers

Forbidden Foods relies on the availability of supply of raw materials, including organic raw materials, to meet the current and expected growth in demand for its products. Forbidden Foods' business model relies on outsourcing key raw materials to third party suppliers.

In addition to raw materials, Forbidden Foods, through its manufacturers, sources product packaging from the United States, China and other countries in Asia, and engages contract manufacturers in Australia and the United States to manufacture and pack its products.

Forbidden Foods may experience disruptions to its supply chain, for example as a result of a shortage of suitable organic-certified raw materials, a virus or disease outbreak (such as COVID-19), quality control or certification issues or a production outage. Any such disruption could have a material adverse impact on Forbidden Foods' ability to source suitable raw materials and manufacture its products to meet current and anticipated future consumer demand. This would likely negatively impact the financial performance and future prospects of the business.

There is also a risk that Forbidden Foods may not be able to retain its key existing third party suppliers. Forbidden Foods relationships with its existing suppliers are typically not exclusive, and its suppliers also have relationships with third parties (including Forbidden Foods' competitors). Forbidden Foods' current third party suppliers and service providers may cease their supply to Forbidden Foods – for example, as a result of a dispute – which would restrict Forbidden Foods' ability to source supply from that supplier. If a third party supplier ceased supplying products or services to Forbidden Foods and an alternative supplier was not readily available, this could lead to a material adverse effect on the Company's operations, financial performance and growth prospects.

In addition, the Company's supply arrangements are generally governed by purchase orders and invoices, which means that suppliers may change the price or other terms on which products are supplied, as well as the range of products available, on short

notice. If this was to occur in circumstances where alternative supply arrangements were not available, this could lead to a material adverse effect on the Company's operations, financial performance and growth prospects.

(b) Foreign exchange risk

Forbidden Foods sources a significant amount of its raw materials and packaging from China, and pays for it in United States dollars. The Company's manufacturing expenses are typically incurred in Australian dollars and the Company generates revenue in a range of currencies, including Australian dollars, US dollars and New Zealand dollars.

The Company's financial statements are presented in Australian dollars, and therefore the Company must translate its assets, liabilities, revenue and expenses into Australian dollars for external reporting purposes. As a result, significant changes in the value of the Australian dollar during a reporting period (in particular, any material depreciation against the US dollar) may unpredictably and adversely impact the Company's operating results, asset and liability balances and cash flows.

(c) Reliance on sales channels and key customers

Forbidden Foods distributes its products to end consumers through various sales channels, including Australian retailers such as Coles and Woolworths. The Company depends on continued access to its sales channels and its relationships with its current customers and, similar to many other suppliers in the Food and Beverage Industry, many of the Company's customer arrangements are not contracted.

There can be no guarantee that the Company's relationships with key customers and channel partners will continue or, if they do continue, that they will purchase the same, similar or greater quantities of Forbidden Foods' products as they have historically.

In addition, Australian retailers are often sophisticated organisations with strong negotiating power that are able to resist price increases or demand increased promotional programs. Retailers may also decrease the number of brands that they carry and increase the emphasis on private label products. In addition, customers such as supermarkets and food distributors, may exit the Australian market for a number of reasons such as consolidation or ceasing business.

If Forbidden Foods is unable to effectively negotiate commercial terms with its channel partners, or if they cease carrying Forbidden Foods' products or cease operations, the Company's financial performance and prospects would be materially and adversely affected.

(d) No contracts with key customers

Forbidden Foods' performance and growth is dependent on maintaining its existing customers and securing new customers. A proportion of Forbidden Foods' revenue is generated from uncontracted customer relationships, using the Company's or the customer's standard terms and conditions and purchase orders and invoices. These supply arrangements typically have no minimum volume requirements and can be varied or terminated by the customer on short notice (or no notice) and without penalty. Even when customers are contracted, the Company's sales contracts typically do not provide for minimum volumes, although they may give Forbidden Foods exclusive supply rights.

There is a risk that the Company will be unable to maintain its uncontracted customers, or secure new customers, on commercially viable terms. In addition, there is no certainty as to the volume, price and frequency of any future sales from uncontracted customers. Given the nature of the Company's business, it is likely that a significant proportion of Forbidden Foods' sales will continue to be on an uncontracted basis.

If Forbidden Foods is unable to retain its existing customers and grow its customer base, particularly in circumstances where a significant proportion of its revenue is not contracted, Forbidden Foods' revenue and profitability could be materially and adversely affected.

(e) Forbidden Foods operates in a competitive industry

Forbidden Foods' operates in a highly competitive geographic and product market.

There is no assurance that Forbidden Foods will be able to compete effectively with existing and new competitors in the future. Forbidden Foods competes with other larger brands and products for retail shelf space at its sales channels and many of its competitors are multinational corporations and other large food brands, most of whom have significantly more access to capital and resources. Should any of Forbidden Foods' competitors participate more aggressively on price, product, innovation or other means, this could have a material adverse impact on Forbidden Foods' financial performance and prospects.

(f) Impact of pandemics and health crises

COVID-19 has brought significant volatility in global financial markets and has impacted many aspects of life and the economy in Australia and around the world.

While the effects of COVID-19 may be subsiding, the lingering effects of the pandemic could still have a significant adverse effect on Forbidden Foods.

(g) Customer concentration risk

Should the Company's trading relationship with any of its large customers change in an adverse way – for example as a result of competition, reduced demand for the Company's products or a product contamination issue – the Company's financial performance and prospects could be adversely affected.

(h) Product concentration risk

Forbidden Foods' product mix and revenues are currently dependent on ingredients and finished consumer goods. Given the Company's limited product range, factors affecting the supply of, and demand for, these products could have a significant adverse impact on Forbidden Foods' financial performance and future prospects.

(i) Changes in consumer trends and preferences

Forbidden Foods' business is primarily focused on the sale of ambient food related goods, which are subject to continually evolving consumer preferences. The Company is subject to changing consumer trends, demands, preferences and attitudes, including a shift in the beliefs, tastes and dietary habits of end consumers. There is a risk that consumer preferences for Forbidden Foods' products will change in an adverse way. Should there be a reduction in demand for Forbidden Foods' products, this could have a material adverse impact on the financial performance and future prospects of the Company.

(j) Retail environment

There is a risk that an economic downturn could occur in Australia or overseas, which could cause the retail environment to deteriorate as consumers reduce their expenditure (generally) or reduce their disposable income expenditure on specific discretionary items. This could result in reduced turnover for Forbidden Foods.

(k) Climate or environment events

As a seller of agricultural products, weather and climactic conditions directly affect the business operations of the Company. The quantity and quality of Forbidden Foods' products may be adversely affected by adverse weather or climactic conditions, including climate change, water supply issues and drought.

Any adverse change to weather or climactic conditions may impact the sustainability of the rice, seeds and grains that the Company sells, which are sourced through third party providers. If a weather or climactic condition disrupts Forbidden Foods' supply chain,

this may have a material adverse impact on the Company's operations and financial performance.

(l) Failure to comply with food safety and quality standards

As with most food products, raw materials and final products are susceptible to deterioration, contamination or tampering or may otherwise be unsafe or unfit for sale or consumption. This may result from various factors such as human error, equipment failure, mislabelling, poor storage, environmental contamination or poor regulation and/or enforcement.

Non-compliance with food safety regulations and quality standards, and associated adverse publicity, could damage the Company's brand and reputation, reduce demand for the Company's products and adversely affect its revenue. There is also potential for other adverse consequences, including regulatory penalties, litigation, product recall and disposal costs, loss of inventory and delayed supply.

Any product contamination or failure to comply with food safety regulations could have a material and adverse effect on the Company's financial performance and prospects.

(m) Loss of certifications

Forbidden Foods relies on independent certifications, such as certifications of some of its products as organic. Quality control issues in respect of raw materials and ingredients may result in the loss of any independent certifications, which could adversely affect the Company's brand and reputation as a certified organic and natural products company and result in a loss of consumer confidence in Forbidden Foods' brands. In turn, this could adversely affect the Company's business and financial performance.

(n) Regulatory risk

Forbidden Foods is required to comply with a range of laws and regulations in Australia and in the foreign jurisdictions in which it sources product inputs (including China and Vietnam) or sells its products (currently including Australian, New Zealand, China, Southeast Asia and the United States). These laws and regulations include food standards and product content requirements, labelling and packaging, environmental, occupational health and safety, quarantine, customs and tariff and tax laws.

Compliance with these laws and regulations, and the ability to comply with any changes to these laws and regulations, is critical to the success of Forbidden Foods' business. Any failure to comply with existing or new laws and regulations may result in a fine or penalty, loss of accreditation or brand damage, any of which could have a material and adverse effect on the Company's operations, performance and reputation.

(o) Brand or reputation damage

Forbidden Foods' business is dependent on its reputation with customers and consumers. Forbidden Foods' brands are of significant value to the business. The reputation and value associated with these brands and related intellectual property could be adversely affected by a number of factors, including:

- quality issues with Forbidden Foods' products;
- failure of delay in supplying products;
- disputes or litigation with third parties, employees, suppliers or customers; or
- adverse media coverage (including social media) or publicity about Forbidden Foods' products or processes.

A material adverse impact to the reputation of Forbidden Foods or its brands could negatively affect public perception of Forbidden Foods, demand for its products, consumer loyalty and employee retention. This could have a material adverse effect on Forbidden Foods' financial and operating performance and future prospects.

(p) Reliance on key personnel

Forbidden Foods' success depends to a significant extent on its key personnel, in particular its Founders Marcus Brown and Jarrod Milani. Marcus and Jarrod both have deep experience in, and knowledge of, the Company's business and the Food and Beverage Industry. The loss of Marcus or Jarrod could have a significant adverse effect on the management of the Company, its financial performance and future prospects.

(q) Increase in production and logistics costs

Forbidden Foods may be adversely impacted by increases in production and logistics costs, including material increases in raw ingredient prices, logistics and distribution costs. The availability and price of raw ingredients used in Forbidden Foods' products are influenced by global demand and supply factors outside of Forbidden Foods' control, and may be impacted by a wide range of factors such as climate or environment events. Forbidden Foods may not be able to pass on increased costs to its customers.

If there is a significant increase in the cost of raw materials and the other inputs of Forbidden Foods' products, this may have a material adverse effect on Forbidden Foods' operating and financial performance.

(r) Failure to effectively manage inventory

Forbidden Foods may fail to accurately forecast or manage its inventory levels. This may result in the Company incurring additional costs and losing revenue. If Forbidden Foods acquires excess raw materials or produces excess product that it cannot sell in a timely manner, the excess product may need to be sold at a discount, otherwise the excess product will become obsolete and Forbidden Foods may be required to bear the costs of the surplus product and recognise inventory write-down costs.

(s) Intellectual property risk

Forbidden Foods regards its brands, trademarks, domain names, trade secrets, proprietary information and similar intellectual property as important to its success. Forbidden Foods' business is developed with a strong emphasis on developing brand equity in each of its brands.

Any unauthorised use or disclosure of its intellectual property may have an adverse effect on the operating, marketing and financial performance of the Company.

In addition, there may be third party infringements of its trademarks. To enforce its intellectual property rights, the Company may have to commence legal proceedings against third parties who infringe its rights. Such intellectual property litigation is expensive and time consuming and may divert valuable resources from and disrupt the conduct of its business.

(t) Failure to execute growth plans

Forbidden Foods intends to continue to grow its business, including through increased sales of its current products and the introduction of new products. It aims to do this by building trusted and strong brands and products.

There is a risk that the Company is unable to increase sales of its existing product range for a range of reasons including loss of customers, competition, changes in consumer preferences, product safety issues and failure to adequately market its products.

There is also a risk that the Company's new products may be unsuccessful because they are not supported by sufficient market interest and purchases, and therefore fail to sell in the targeted volumes. The Company may also be unable to offer a sufficient number of new, differentiated products.

Unsuccessful new products and ineffective marketing campaigns may adversely impact expected future revenues.

If the Company fails to grow the sales of its existing products and does not introduce successful new products, it will not meet its growth plans and its future financial performance and prospects will be diminished.

(u) Failure to effectively manage growth

Forbidden Foods aims to achieve rapid growth in the scope of its operating activities, which may include operating in new markets. This growth is anticipated to result in an increased level of responsibility for existing and new management personnel. If the Company is unable to manage its expected growth successfully, including through the recruitment, training, integration and management of the staff required to support this expected growth, it may not be able to take advantage of market opportunities, satisfy customer requirements, execute its business plans or respond to competitive threats.

(v) Forbidden Foods may need to raise additional capital

While the proceeds raised from the Capital Raising are expected to meet the Company's next immediate phase of growth, there can be no assurance that the proceeds from the Capital Raising will be sufficient for the Company to maintain working capital at a sufficient level for operations to be maintained at their current levels. Accordingly, the Company may need to raise future capital through equity or debt financings or from other sources. If the Company is unable to generate sufficient cash flows from its operations or is unable to raise funds from additional sources on commercially acceptable terms, then its business and financial condition may be materially and adversely affected.

In addition, if the Company issues Shares to raise capital, as consideration for acquisitions or to facilitate employee share plans, Shareholders at any time may be diluted as a result of these Share issues.

(w) The co-founders are significant Shareholders

As at the date of this Prospectus, Marcus Brown and Jarrod Milani hold 9,901,284 and 9,427,811 of the Shares on issue respectively.

Consequently, Marcus Brown and Jarrod Milani will have a significant influence over all matters that require approval by Shareholders, including the election and removal of Directors and approval of significant corporate transactions (unless prevented from voting under the Corporations Act or ASX Listing Rules). This concentration of ownership may limit other Shareholders' ability to influence corporate matters and, as a result, actions may be taken that some Shareholders may not view as beneficial.

(x) Failure to meet forward looking statements

The forward-looking statements, opinions and estimates provided in this Prospectus, rely on various contingencies and assumptions. Various factors, both known and unknown, may impact upon the performance of Forbidden Foods and cause actual performance to vary significantly from expected results. There can be no guarantee that the Company will achieve its stated objectives or that any forward looking statement will eventuate.

7.2 General risks

(a) The price of Shares may fluctuate

The Rights Issue Shares may trade on ASX following issuance at a price higher or lower than the price paid for the Shares. The price of Shares may trade on ASX at a price higher or lower than the exercise price of the Options.

The price at which the Shares trade following the Capital Raising will be affected by the financial performance of the Company and by external factors unrelated to the operating performance of the Company, including movements on international share markets, the level of interest rates and exchange rates, general domestic and international economic conditions and government policies relating to taxation and other matters.

(b) Dilution

The Placement is being conducted within the Company's current placement capacity under ASX Listing Rule 7.1 and ASX Listing Rule 7.1A. Notwithstanding that fact, the Placement and the potential exercise of the Placement options (if approved by Shareholders) and the Rights Issue Options will have a dilutory effect on Shareholders. This means that each Share will represent a lower proportion of the ownership of the Company on a fully diluted basis.

(c) Trading in Shares might not be liquid

There can be no guarantee that an active market in the Shares will develop. There may be relatively few potential buyers or sellers of the Shares on the ASX at any time. This may increase the volatility of the market price of the Shares. It may also affect the prevailing market price at which Shareholders are able to sell their Shares. This may result in Shareholders receiving a market price for their Shares that is less or more than the price that Shareholders paid for their Shares.

(d) Australian Accounting Standards may change

Australian Accounting Standards are set by the AASB and are outside the control of the Company. The AASB regularly introduces new or refined Australian Accounting Standards, which may affect future measurement and recognition of key statements of profit and loss and balance sheet items, including revenue and receivables.

- (e)** There is also a risk that interpretations of existing Australian Accounting Standards, including those relating to the measurement and recognition of key statements of profit and loss and balance sheet items, may differ. Changes to Australian Accounting Standards issued by the AASB, or changes to commonly held views on the application of those standards, could materially adversely affect the financial performance and position reported in the Company's consolidated financial statements. **Inflation rates**

Higher than expected inflation rates could lead to increased development and/or operating costs. If such increased costs cannot be offset by increased revenue, this could impact the Company's future financial performance.

(f) Interest rates

The Company does not currently have any material debt. If the Company borrows money in the future, it will be exposed to increases in interest rates which would increase the cost of servicing the Company's debts.

(g) Other risks

The above list of risk factors should not be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of the Shares and Options to be issued under this Prospectus.

Shareholders and other investors are recommended to consult their professional adviser before deciding whether to apply for Shares and Options pursuant to this Prospectus.

8 Additional Information

8.1 Continuous disclosure obligations

The Company is a “disclosing entity” (as defined in section 111AC of the Corporations Act) for the purposes of section 713 of the Corporations Act and, as such, is subject to regular reporting and disclosure obligations. Specifically, like all listed companies, the Company is required to continuously disclose any information it has to the market which a reasonable person would expect to have a material effect on the price or the value of the Company’s securities. The Rights Issue Shares which will be issued pursuant to this Prospectus are in the same class as Shares that have been continuously quoted on the official list of the ASX during the three months prior to the issue of this Prospectus. The Placement Options, Rights Issue Options and Broker Options are options to acquire Shares, such Shares having been continuously quoted securities on the official list of the ASX during the three months prior to the issue of this Prospectus.

This Prospectus is a “transaction specific prospectus” to which the special content rules under section 713 of the Corporations Act apply. That provision allows the issue of a more concise prospectus in relation to an offer of securities or an offer of options to acquire securities in a class of securities that has been continuously quoted by ASX in the three months prior to the date of the Prospectus. In general terms a “transaction specific prospectus” is only required to contain information in relation to the effect of the issue of the Rights Issue Shares, Rights Issue Options, Placement Options and Broker Options on the Company and the rights and liabilities attaching to the Rights Issue Shares, Rights Issue Options, Placement Options and Broker Options. It is not necessary to include general information in relation to all of the assets and liabilities, financial position, profits and losses or prospects of the issuing company.

This Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to ASX and does not include all of the information that would be included in a prospectus for an initial public offering of securities in an entity that is not already listed on a stock exchange. Eligible Shareholders, Joint Lead Managers and Eligible Placement Options Applicants should therefore have regard to the other publicly available information in relation to the Company before making a decision whether or not to invest.

Having taken such precautions and having made such enquires as are reasonable, the Company believes that it has complied with the general and specific requirements of ASX as applicable from time to time throughout the period from the lodgement of the Company’s annual financial report for the financial year ended 30 June 2022 up to the date of this Prospectus which required the Company to notify ASX of information about specified events or matters as they arise for the purpose of ASX making that information available to the stock market operated by ASX.

Generally, information that is already in the public domain has not been reported in this Prospectus other than that which is considered necessary to make this Prospectus complete.

The Company, as a disclosing entity under the Corporations Act states that:

- (a) it is subject to regular reporting and disclosure obligations;
- (b) copies of documents lodged with ASIC in relation to the Company (not being documents referred to in section 1274(2)(a) of the Corporations Act) may be obtained from, or inspected at, the offices of ASIC; and
- (c) it will provide a copy of each of the following documents, free of charge, to any person on request between the date of issue of this Prospectus and the Closing Date:
 - (i) the annual financial report most recently lodged by the Company with ASIC;
 - (ii) any half-year financial report lodged by the Company with ASIC after the lodgement of that annual financial report and before the lodgement of this Prospectus with the ASIC; and

- (iii) any continuous disclosure documents given by the Company to ASX after the lodgement of the annual financial report referred to in paragraph (i) and before the lodgement of this Prospectus with the ASIC.

Copies of all documents lodged with ASIC in relation to the Company can be inspected at the Company's principal place of business during normal office hours.

Details of documents lodged by the Company with ASX since the date of lodgement of the Company's latest annual financial report and up to the date of lodgement of this Prospectus with ASIC are set out in the table below.
