2. Based on expected trading performance for the duration of the financial year. This represents a decrease from the previous January 2023 outlook of a circa 35% reduction. The change is driven partly by an observed decline in the Online Racing Wagering Market and VIP volatility in Australia, and the actual and estimated timing of payments, resulting in an expected increase in operating cash outflows, partly offset by lower-than-expected investing cash outflows in H2 FY23.

- At 31 December 2022, the group had a cash balance of \$387.2m, including \$66.5m of client cash and \$320.7m of corporate cash

- Net operating outflows excluding movement in player cash accounts was (\$123.2m), whilst revenue grew in H1 FY23 vs the PCP, cash outflows increased as a result of increased operations and continued scale operational capabilities
- Net investing outflows were (\$30.9m) as the business continued investment in US licences and market access as well as continued investment in the development of the betting platform
- Net financing outflows were (\$2.0m)
- H2 FY23 net cash outflow, excluding movement in player cash, is expected to be approximately 30% lower than H1 FY23²
