## **MasterCare Delivers Cloud Based Inpatient EMR Solution at Australia's Newest Private Hospital Matilda Nepean**

Melbourne, Australia – healthcare software provider **Global Health Ltd (ASX: GLH) ("Global Health")** is pleased to announce the initial deployment of the Company's MasterCare Inpatient Electronic Medical Record (iEMR) SaaS solution at Australia's newest private hospital, Matilda Nepean.

Matilda Nepean is a 90-bed sub-acute private hospital operated by Arcadia Health Care. Located in a world-class medical hub in Kingswood, New South Wales, Matilda Nepean is bringing a new generation of boutique, 'hotel style' setting health care to the Western Sydney region.

Already a user of **MasterCare's Patient Administration System (PAS)** in the existing Arcadia Pittwater acute facility, this deployment coincides with the opening of the new private hospital facility, enabling Matilda Nepean to augment their existing administration solution with clinical features in line with their digital requirements.

### **Arcadia Health Care CEO Dr Harry Pannu commented:**

"It has been a fantastic experience working with Global Health to deliver the first implementation of their MasterCare Plus EMR solution to our 90-bed hospital Matilda Nepean. The EMR is Australia's answer to EMR adoption in the Australian Private Hospital market and we are proud to be collaborating on the design and delivery of a cutting edge technology that will benefit Private Hospital's around the country."

Global Health aims to provide integrated healthcare solutions to key growth corridors in regional areas across Australia, after the ongoing bombardment on community health resources during the COVID-19 Pandemic which placed a massive strain on regional health organisations.

Best known for its Electronic Medical Record (EMR) solution, used widely across Australia's community health network, MasterCare Inpatient EMR delivers a new-generation Service as a Software (SaaS) platform built on the principles of its predecessor.

The new platform enables Matilda Nepean to manage a range of integrated medical records, including:

- Patient medications
- Observation charts and patient charts
- Progress notes
- Patient allergies
- Handover notes
- Patient assessment forms
- E-orders and e-results
- Patient journey/bedboard
- Outcome measurement collection

**Kye Cherian, Project Manager of the MasterCare Matilda implementation commented:**

"We are excited to be working with Arcadia Health Care and delighted to be part of this next chapter in Matilda Nepean's story.

The uptake of EMR systems is well underway in the public sector, but funding limitations have caused delays for the private sector. With the latest implementation of our MasterCare offering, combined with the ongoing input from hospitals such as Matilda Nepean, we hope to establish a more affordable solution that will benefit the Australian hospital and health care sector as a whole."

"This is another key outcome from the strong sales pipeline in place and continues MasterCare's growth trajectory in its key markets of Community Health and Hospital providers. MasterCare iEMR will be progressively rolled out to existing MasterCare PAS customers with potential new ARR in excess of \$2M over the next few years."

With Matilda Nepean's go-live now complete, a second implementation of MasterCare's Inpatient EMR at Arcadia Pittwater Private Hospital is scheduled for completion by 30 June of this year.

**This announcement was approved for lodgement by the Board**
