About Bluechiip Limited

Bluechiip understands that every biological sample – stem cells, blood, eggs, sperm and other biospecimens – is critical, so our objective is to manage each one with optimal quality in the most efficient way. Bluechiip's Advanced Sample Management Solution is the only one that provides sample temperature with ID in cryogenic environments, driving productivity and improving quality. Bluechiip's solution delivers confidence in every sample.

Bluechiip's unique patented technology is a MEMS-based wireless tracking solution that contains no electronics. It represents a generational change from current tracking methods such as labels (hand-written and pre-printed), barcodes (linear and 2D), and Radio Frequency Identification. Bluechiip tags are either embedded or manufactured into storage products such as vials or bags. Each product is easily identified and critical information, such as sample temperature, detected by readers and stored in the Bluechiip software. In addition to functioning in extreme temperatures, the Bluechiip[®] Advanced Sample management solution can survive autoclaving, gamma irradiation sterilization, humidification, centrifuging, cryogenic storage and frosting.

Bluechiip listed on the ASX in June 2011. Since then, it has significantly developed its technology. Today Bluechiip's Technology has applications in healthcare, including in cryogenic storage facilities (biobanks and biorepositories), pathology, clinical trials and forensics. Other key markets include cold-chain logistics/supply chain, security/defence, industrial/manufacturing and aerospace/aviation.

Bluechiip: Delivering confidence in every sample.

Bluechiip Fundamentals

**Drives
productivity**

**Redefines
Quality**

**Confidence in
every sample**

- World first, highly differentiated technology: 34 granted patents
- >>\$1B growing target markets: IVF, clinical trials, cell therapies, biobanking and vaccines requiring Ultra Low temperature ID and temperature traceability
- Well over 300M/yr high value bio-samples handled at -80°C & -196°C
- Current ID methods are suboptimal both in productivity and quality
- CE & FDA Registered Bluechiip Enabled Solutions Launched Dec '21
- Growing direct customer base globally – 25 Labs across 13 customers including ARMI, Organa Bio, New York Psychiatric Institute (Columbia Uni), large pharma
- Rapidly expanding US sales team driving significant pipeline (12 active quotes)
- Major partnership: FujiFilm Industries Irvine Scientific for IVF market
- >\$3m inventory & scaled production capacity of over 5m chips/yr

Key Achievements

• Bluechiip Enabled solutions launched

- ISO9001, CFR21-11 software, CE IVD & FDA registration
- Scaled chip supply chain (3m+)
- International ISBER award: Bluechiip Cryobox Tracker

• FujiFilm Industries Irvine Scientific

- Licence and development agreement for ART/IVF market

• Accelerating Customer Adoption & Pipeline Building

- Expanded US sales & Marketing Team
- Customer adoption in EU, US & APAC with **growing repeat orders**

REDEFINE QUALITY • DRIVE PRODUCTIVITY

CONFIDENCE IN EVERY SAMPLE

Sample Storage

Readers

Software

Certifications

- ✓ Certified ISO9001 Quality Management System
- ✓ CE Marked Readers and CE-IVD Marked Consumables
- ✓ FDA Registered Products
- ✓ Bluechiip is a registered Australian Trusted Trader

Bluechiip Enabled Laboratories

What end-users are saying about Bluechiip

"The Bluechiip System allows me to have a significant amount of oversight throughout our banking process"
- Dr Akhil Chawla MD, Clinical Assistant Professor of Surgery

"Bluechiip helps us work more efficiently with confidence in sample integrity and identity"
- Dr Mary Clare McCorry, Director of Technology and Process Development

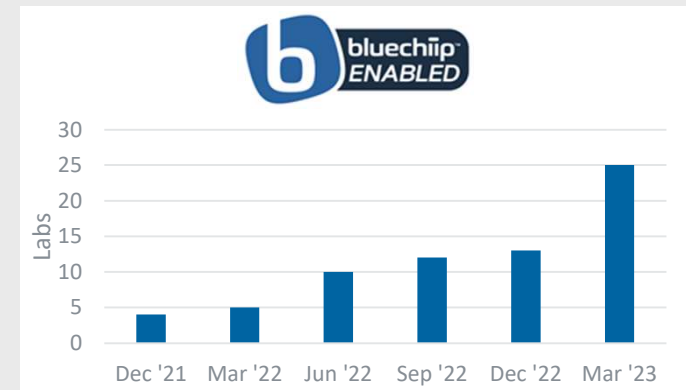

"The Bluechiip system provides a full audit trail to help us adhere to Good Manufacturing Practice"
- Dominika Lykova, Cell Therapy Specialist

Palacký University
Olomouc

New York State Psychiatric Institute

Growing install base with multiple sites including large EU Pharma company & Ivy League Core Facility

Vision

To be the global leader in ID and sensing technology
for extreme environments

Mission

To advance research and medicine by providing
confidence in every sample

Major ID and Sensing Technology Sectors

Primary Focus

Lifesciences Cold Chain incl Logistics, Storage and Monitoring

Item level **ID and temperature tracking** of containers holding high value samples through-out the **cryogenic** cold chain cycle. Including Banking, Transport and Monitoring where **frost** is usually present, and **ID errors have high risk and impact**

Cold Chain Logistics Food

Item level **tracking of frozen**, and **temperature sensitive** food products through-out the cold chain cycle.

Industrial and Manufacturing

Item level **ID and high/low temperature tracking** tools and parts, structural health monitoring, items exposed to **ionizing radiation** such as nuclear products, sterilised medical devices, disposables and some food products.

Security and Defence

Anti counterfeiting fashion, art, and high value commercial items. Cloning a bluechiip tag is extremely difficult. tracking of tools and parts that are exposed to **ionizing radiation**, security and defence.

Bluechiip is highly differentiated in Lifescience Cold Chain with core technology benefits and large market opportunity

Life-science Cold Chain Market Trends

Increasing sample numbers and retrieval rates

PRODUCTIVITY

Minimise total cost of sample ownership and ROI

Increased demand for advanced therapies and sensitive samples

SAMPLE VALUE

ID tech needs to keep up with higher value samples

Criticality of sample history maps and reports

SAMPLE QUALITY

Maximise specimen integrity via adequate cold chain handling and reporting

Increasing demand for cryo (-196°C and -80°C) storage

CRYO TECH

Utilisation of cryo-safe technology and processes

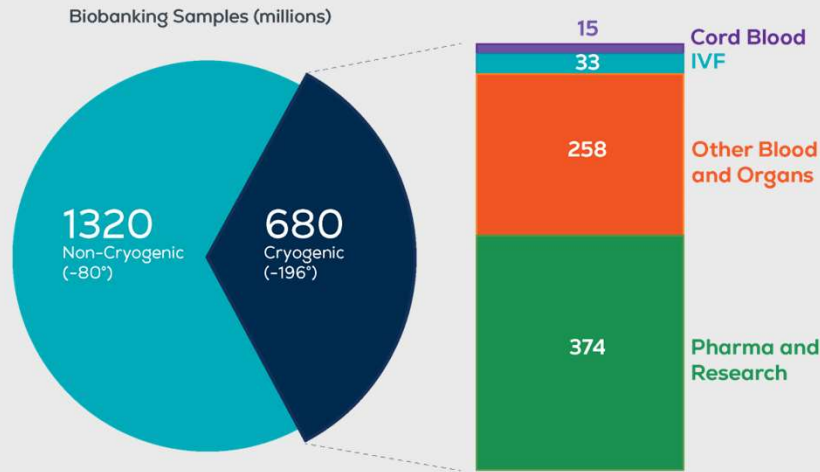

Biosample Management Technology is Not Keeping up With the Increasing Value of Biosamples

Primary Market Opportunity

Global Bio-Preservation Market \$3.1B in 2020
 – Projected \$4.9B in 2025 (CAGR 9.2%)^

Samples in Storage*

Primary Bluechiip Applications

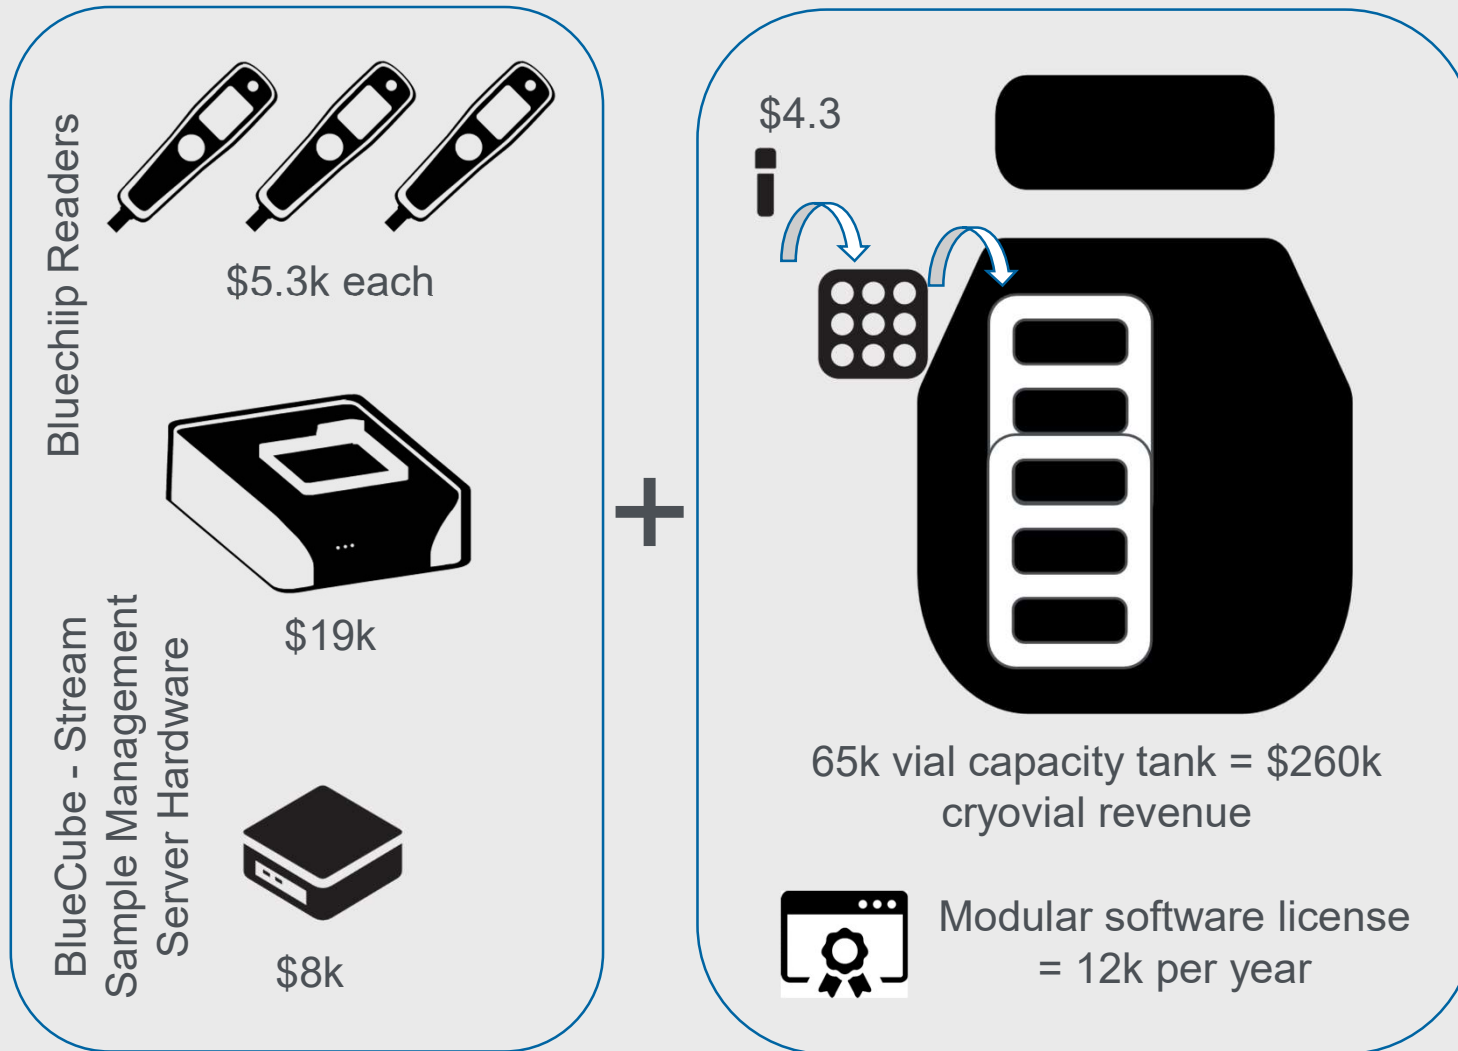

Life Science Market Opportunities

Target Market	Market Size by Samples	Bluechiip Addressable Market
Bio-preservation	300m+ samples/year >2B in storage	US\$600m+
Assisted Reproductive Technology (IVF)	2.5m IVF Cycles/year 5-8 consumables per cycle >33m samples in storage	US\$50m+
Clinical trials and research	>35m samples/year	US\$70m+
Cell therapies, Pharmaceuticals	3m samples/year 15m+ in storage	US\$30-50m+

Total Bio-Preservation: 2B Samples in Storage
 300M new samples per year

Case Study – Protein Lab in a big pharma

Initial Capital Expenditure = \$42.9k

Yearly revenue \$272k

Scalability through \$260k cryovials per new tank and adjacent expansion into additional labs within customer with Bluechip systems

Bluechip MEMS Core Technology Advantages

Bluechip's sensor tag consists of a silicon chip (1mm²) with 52 mechanical beams that provide a unique ID when read. The chip is connected to an antenna available in multiple form factors, providing communication of both ID and temperature to a centralized database. Bluechip's Tag provides key advantages over other forms of ID in cryogenic conditions.

	 RFID	 Barcodes	 Bluechip
 Non-visual ID Reads through frost	~*	✗	✓
 Cryosafe Operates down to -196C	✗	✗	✓
 Guaranteed unique ID ID cannot be overwritten or duplicated	✗	✗	✓
 On-board sensor Senses temperature on each scan	✗	✗	✓
 Sterilization proof Gamma, E-beam, Autoclave	✗ [^]	✓	✓

*Majority of RFID unreliable below -40C. ^Some newer RFID's have resistance

Bluechiip offers the only Advanced Sample Management solution that provides **sample temperature with ID** in cryogenic environments

We understand that every sample is critical and managing each one with optimal quality, in the most efficient way is the objective

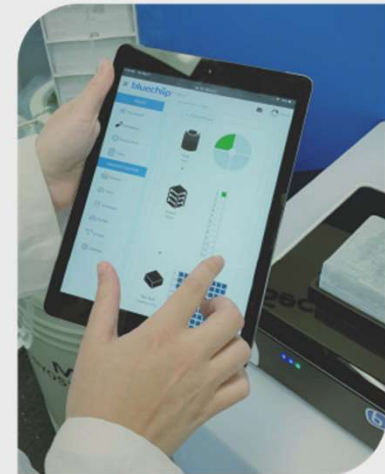

Bluechiip Enabled Storage

Bluechiip Readers

Bluechiip Stream Software

Bluechiip's goal is to deliver confidence in every sample

Confidence in Every Sample

Bluechiip's unique and patented technology is designed to operate across a wide temperature range from -196°C to over $+100^{\circ}\text{C}$, creating the perfect system for managing sensitive samples. Bluechiip Enabled Sample Storage, Readers and Software combine to provide an unparalleled ability to track and store sample level data, including temperature across the cold chain process.

Redefining Quality

- ✓ Capturing ID and temperature at the sample level for cold chain integrity
- ✓ Reducing the risk of temperature excursions in cryogenic conditions
- ✓ Providing key workflow insights to drive continuous improvement
- ✓ Eliminating errors through optimized inventory management
- ✓ Enabling compliance to industry standards and internal procedures

Driving Productivity

- ✓ Reducing manual processes and eliminating double witnessing
- ✓ Identifying multiple samples instantly through frost
- ✓ Simplifying inventory handling for faster processing
- ✓ Driving efficiency at every step of the workflow

Bluechiip - Path to Market

Bluechiip Direct Solutions

- Direct to market: North America, ANZ and global distribution network
- Consumables, Readers, Software Sales model

Primary Target Markets

- Bio-preservation
- Clinical trials and research
- Cell therapies & Pharmaceuticals

Partnerships: Bluechiip Enabled Solutions

- Developer kits sold to global corporations for due diligence
- Conversion to licence agreements and Bluechiip Enabled solutions
- Ongoing licence fees
- Development and service revenues
- Sale of Bluechiip Enabled Consumables, readers & software

Major Licence agreements

- FujiFilm Industries Irvine Scientific
 - Licence and Development agreement
 - 18-24 month development project
- Labcon distribution agreement

Growth Initiatives For A Bluechiip Future

- Sales & marketing team expansion in North America in 2023
- Expanding distribution networks in Europe & Asia in 2023
- Growing our direct customer base globally across the >>\$1B, Ultra Low temperature clinical trials, cell therapies, pharmaceuticals and biobanking markets
- Execution and conversion of our Major partnerships: FujiFilm Industries Irvine Scientific for IVF market
- Expansion of platform offerings based on customer feedback providing productivity and quality across the Cold Chain
- Continued expansion and protection of our world first, highly differentiated technology: >34 granted patents
- Building operational & manufacturing capabilities to meet demand
