ReadyAttentionGo! Full Market Launch

TALi has successfully enrolled and engaged all designated children in the planned Controlled Market Release across 5 Allied Healthcare centres. Favourable feedback is being received with minor improvements being actioned. The product is performing well.

Tali exhibited ReadyAttentionGo! at its first conference sourcekids Disability Expo 2023 in Sydney. This expo is unique in that the participants span across many of TALi's stakeholders and customers including NDIS Plan Managers, Allied Health practices and parents seeking solutions for their children. ReadyAttentionGo! and the TALi team generated great interest from parents, allied healthcare providers and NDIS managers. These leads are being actively followed up by the TALi sales team post-conference. These conferences are a key part of the sales strategy for TALi. TALi will be an exhibitor at the upcoming Occupational Therapy professionals' conference in June in Cairns and the sourcekids Disability conference in Melbourne in July.

AttentionTime! for Education Launched

TALi has developed a product targeted at pre-schools as part of the Sprint/Genius/TALi Partnership. This product is based on the patented TALi attention training algorithm but customised for use by Educators. TALi were able to prepare this tailored product in record time in order to facilitate the Education arm of the business. We are working with the Genius team in a product pilot to gather feedback for further customisations to ensure that AttentionTime! is mass-market ready. Additionally, TALi have articulated how AttentionTime! supports the requirements in the Early Years Learning Framework (EYLF) which lays out the requirements for curriculum for pre-schools.

AttentionTime! Pilot for Genius Underway

The usability pilot for Genius Pre-school began in March. This pilot is intended to demonstrate that the program can be used easily by teachers in the pre-school setting with children of all indicated ages (3- 6 years old for pre-schools). The product pilot has begun in one Genius childcare centre and will be rolled out to more Genius childcare centres and then released generally in the pre-school market. Early feedback around product usability is very positive with the pre-school teachers being able to administer and support the young children with the daily training program and the children are finding the program engaging.
