FY23 overview

Performing through market uncertainty

Higher rates drove record levels of MI

- › MI increased to \$792m, new high for the Group
- › Recapture rate in excess of 90% across all our key banking partners by year end achieved
- › Counterparty deposit policy protected balances through US banking sector uncertainty
- › Executing plan to lock in \$1.5bn of MI (the majority to be received over the next 5 years). \$1.2bn secured, additional \$0.3bn to be executed in FY24

Higher rates also impacted transaction and event revenues and costs

- › Lower event and transaction fees materially impacted earnings, recovery emerging in 2H
- › Average client balances declined in the 2H due to lower bond issuance not offsetting run off
- › Inflationary pressures impacted earnings, with BAU opex up over 5% vs. pcg and net interest expense up 131%

Stronger 2H EBIT ex MI performance

- › 2H EBIT ex MI, up 70% compared to 1H. Includes seasonality
- › Core fee revenues increased 4% in 2H22 vs. pcg
- › Employee Plans Trading performing ahead of plan, up 17% on 2H22
- › CCT integration on track and synergy plan re-affirmed
- › US Mortgage Services back to profit. Evaluating strategic options
- › Inflationary pressures moderating and further cost-out programs under consideration

- "Locked in" margin income is income from the fixed leg of the swaps, fixed term deposits, plus non-exposed margin income.
- The primary driver of FY24E net margin income change from 2nd May 2023 disclosure of \$860m to current FY24E margin income of \$840m is the FX retranslation, from FY22 FX rates to FY23 FX rates.
- On 1 May 2023, the Group disposed of the Class Actions and Bankruptcy business, which was based in North America and formed part of the Business Services segment.

Key sensitivities on FY24 Margin Income

\$1bn change in exposed non-hedged balances translates to around \$50m PBT impact

Earnings Sensitivity – Average Balances		
-\$1bn Balances	FY24 Guidance	+\$1bn Balances
788.8	840.0	891.2

- Balance sensitivity assumes annual impact on non-hedged exposed balances.

Earnings Sensitivity – Interest Rates		
-25 bps	FY24 Guidance	+25 bps
818.0	840.0	862.0

- Interest rate sensitivity assumes annual rate impact on non-hedged exposed balances.

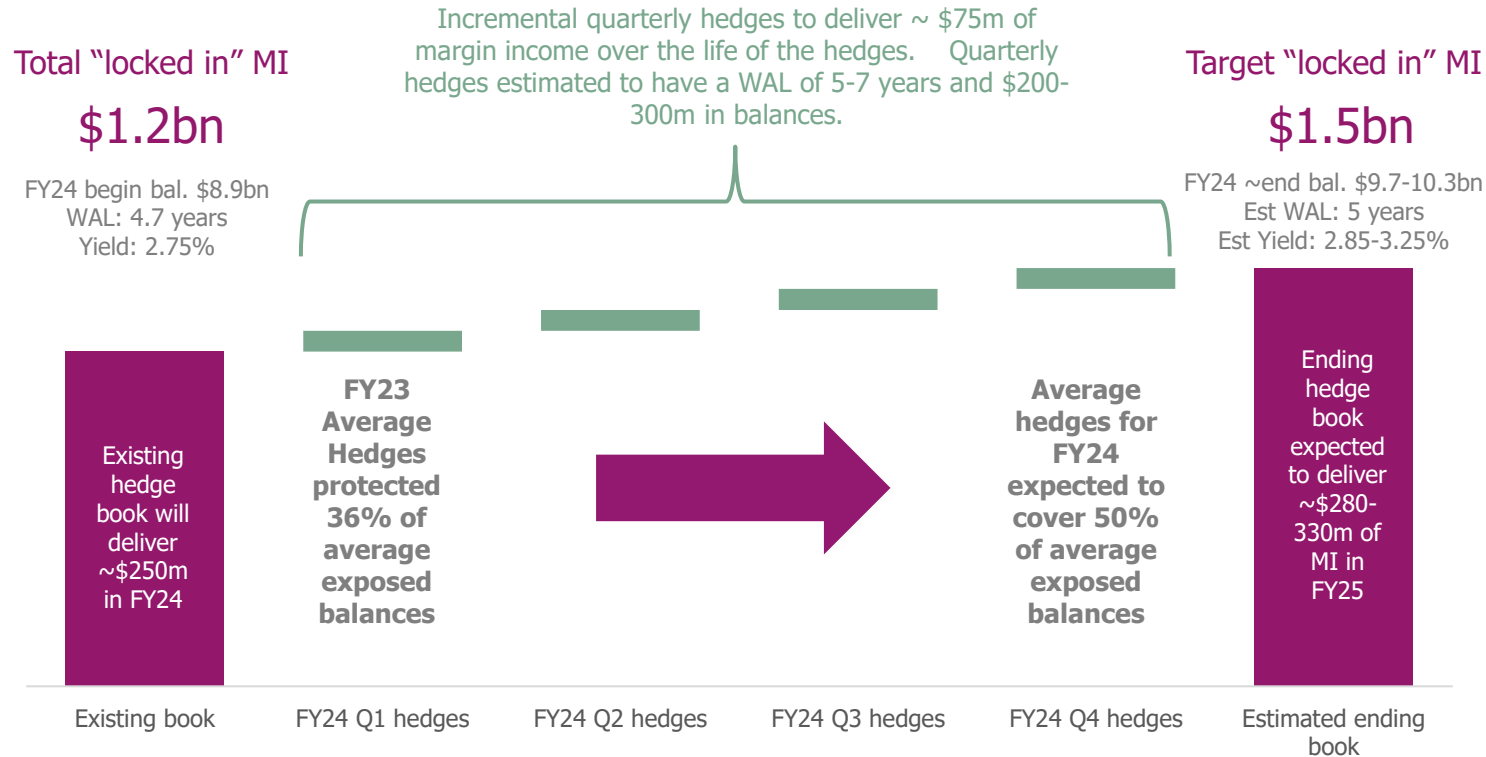

- If balances move by \$1bn (+/-) in FY24, the delta to Margin Income is around \$51m per annum vs FY24 Estimate. This assumes increase is only on exposed, non-hedged balances.
- If interest rates move by 25 bps (+/-) in FY24, the delta to Margin Income is around \$22m per annum vs. FY24 Estimate. This assumes movements in short term floating rates impact entire non-hedged exposed balances and no impact to payout rates or other factors.

Key Definitions

- Performing servicing:** Servicing of a mortgage which is less than 30 days delinquent. Typically loans that meet the criteria of the Government Sponsored Entities e.g. "Fannie Mae", "Freddie Mac".
- Non-performing servicing:** Servicing of a mortgage that is over 30 days delinquent up to management of the foreclosure process. Typically, non-performing servicing is performed over loans that are part of a securitization arrangement.
- Mortgage servicing rights (MSR):** Intangible assets representing an ownership right to service the mortgage for a fee for the life of the mortgage. The owner of the MSR can either service the loan itself or appoint a sub-servicer to do so. A fully owned MSR is where CPU owns the MSR outright.
- Servicing advances:** The owner of the MSR is required to fund various obligations required to protect a mortgage if the borrower is unable to do so. Advances receive a priority in any liquidation and are often financed in standalone non-recourse servicing advance facilities.
- Part owned MSR's**
 - CPU has sold part of the MSR to a third party investor.
 - An Excess Strip Sale refers to the sale of a stream of cash flows associated with the servicing fee on a performing MSR. The seller of the servicing strip has the ability to service the mortgage.
 - An SPV deal refers to the sale of the rights to the MSR and associated servicing advances into an SPV. CPU typically takes a 20% equity stake in the SPV and performs all servicing on the loans via a sub-servicing fee for service relationship.
- Subservicing:** Servicing performed on a contractual basis.

- Management results are used, along with other measures, to assess operating business performance. The Company believes that exclusion of certain items permits better analysis of the Group's performance on a comparative basis and provides a better measure of underlying operating performance. These items are typically non-recurring costs associated with significant restructuring programs and integration of acquisitions and profits and losses arising from the sale of businesses and investments.
- Management adjustments are made on the same basis as in prior years.
- Non-cash management adjustments include significant amortisation of identified intangible assets from businesses acquired in recent years, which will recur in subsequent years, asset disposals and other one-off charges.
- Cash adjustments are predominantly expenditure on acquisition-related and other restructures and will cease once the relevant acquisition integrations and restructures are complete.
- A description of the current financial year's management adjustments is included on the next slide.
- The non-IFRS financial information contained within this document has not been reviewed or audited in accordance with Australian Auditing Standards.
