Acorn Capital - Investment Update

"Australian markets had a soft month over the August corporate reporting season following a strong July. The RBA has moved into a "wait and see" mode, pausing again in August after inflation in the June quarter dropped more than expected to 6%, from 7% in the March quarter.

The S&P/ASX Small Ordinaries Index returned -1.3% for the month, underperforming the ASX 200 (-0.7%). The strongest performing sectors were Energy (+3.7%), Consumer Discretionary (+1.9%) and Industrials - Capital Goods (+1.9%), while the weakest sectors were Industrials - ex Capital Goods (-5.8%), Healthcare (-4.8%), and Financials - AREITs (-3.5%)."

ACQ Objective

The Objective is to create a diversified portfolio of listed microcap companies and then to invest opportunistically in unlisted entities that offer better relative value. The performance objective for ACQ is to outperform the S&P/ASX Small Ordinaries Accumulation Index over the medium to long term.

Dividend Intention

Acorn Capital Investment Fund Limited intends to pay annual dividends targeting at least 5% of closing post-tax NTA for each financial year, franked to the highest extent possible and without the Company incurring a liability.

Where the Company accumulates franking credits that the Board determines are in excess to its requirements it is the intent to distribute those excess credits by way of special dividends. This is subject to the Company having sufficient profit and cash flow to make such payments

Investment Philosophy

The investment philosophy is based on a belief that there are pricing inefficiencies amongst emerging or microcap companies due to a lack of readily available external research conducted on such entities.

Acorn Capital believes that through a research driven investment process the pricing inefficiencies that exist in both listed microcaps and unlisted microcaps can be exploited to earn returns superior to those available in the broader market.

Unlisted microcap opportunities must be of better relative value on a risk-adjusted basis to displace existing listed portfolio investments in the corresponding sector.

Investment Strategy

- Research-driven stock selection
- Economic sector diversified
- Style agnostic
- Long term investor
- Create diversified portfolios to reduce volatility

Investment Manager profile

Acorn Capital was established in 1998 as a specialist investment manager in emerging Australian companies.

Acorn Capital distinguishes itself through its relatively large research and investment team with expertise across all industries as well as its provision of expansion capital to developing companies.

Through its strategies Acorn Capital can provide Investors with efficient off-index exposure to both public and private emerging companies.
