About Dart Mining

Dart Mining’s (ASX: DTM) aim is to evaluate and develop several historic Goldfields as well as substantiating a new porphyry province in NE Victoria. The area is prospective for precious, base, and minor metals. These include Lithium, Gold, Silver, Copper, Molybdenum, Zinc, Tungsten, Tin, Tantalum, and other important minerals. Dart Mining has built a strategic footprint in the Central and Northeast Region of Victoria where historical surface mining and alluvial gold indicates the existence of a potentially significant gold endowment.
