ASX Limited

Cleansing Notice Entitlement Offer

This notice is given by X2M Connect Limited (Company) under Section 708AA(2)(f) of the Corporations Act 2001 (Cth) (Corporations Act).

The Company hereby confirms that:

- (a) the Company will issue fully paid ordinary shares and/or options (Securities) in the number, at the issue price, on the terms and for the purposes as set out in the Offer Document for an Entitlement Offer (The Offer) to be issued on 14 December 2023 under section 708AA of the Corporations Act.
- (b) the Securities will be issued without disclosure to investors under Part 6D.2 or part 7.9 of the Corporations Act;
- (c) as at the date of this notice the Company, as a disclosing entity under the Corporations Act, has complied with:
 - (i) the provisions of Chapter 2M of the Corporations Act as they apply to the Company; and
 - (ii) section 674 of the Corporations Act as it applies to the Company;
- (d) as at the date of this announcement, there is no excluded information of the type referred to in Sections 708A(7) and 708A(8) of the Corporations Act and/or s1012DA(7) and (8) of the Corporations Act; and
- (e) the Offer is expected to have no impact on the control of the Company.

Yours faithfully

Oliver Carton
Company secretary

The Company Secretary of X2M has approved this notice.

About X2M Connect Limited

X2M Connect Limited (ASX:X2M) is an Australian technology company that has developed and commercialised a patented proprietary Internet of Things (IoT) solution which delivers productivity improvements, cost savings and improved public safety to enterprise and government clients in the utilities sector. The strategy is to stay focused on the utility sector where X2M has proven performance and tap the growing artificial intelligence, renewable energy generation and battery storage markets' demand for data collection, analytics and device control.

X2M's technology connects devices such as water, gas and electricity meters and other utility sensors to the internet, enabling data exchange and the remote control of these devices. The collection of large volumes of data from meters or sensors and our ability to go back and control devices also provides the basis for artificial intelligence or machine learning applications to build upon our platform. The Company generates revenue from the sale of hardware and monthly subscription fees under Software as a Service arrangements.

X2M now has more than 510,000 devices connected to its IoT platform and distributed intelligence solution, providing real-time information and control to a steadily increasing customer base operating over multiple radio technologies.

X2M's current focus is on servicing the utility sector in the Asia-Pacific region, where it has a significant number of government and enterprise customer relationships already in place. The addressable market across the region is large and importantly, the addressable market within X2M's existing customer base is also large with penetration growing. Going forward, X2M will look to continue its global expansion, with subsidiaries already operating in Japan, South Korea, Taiwan and, most recently, China.
