# **ASX Announcement**

#### 22 January 2024

# **Quarterly Activities Report**

MELBOURNE, Australia – Sunrise Energy Metals Limited (**Sunrise Energy Metals** or **Company**) (ASX:SRL and OTC:SREMF) is pleased to provide an update on its activities for the quarter ended 31 December 2023.

#### **Key Developments:**

- Discussions with potential equity funding and offtake partners for the Sunrise Battery Materials Complex ('Sunrise Project') remain ongoing.
- The Company continues to evaluate relocating the Sunrise Project nickel and cobalt refinery to the United States:
  - A US-based refinery will potentially open up opportunities for grant funding pursuant to a number of US Government programs, as well as possible involvement by US-based strategic investors.
- Ongoing work streams to advance the fully integrated Sunrise Project continued with activities focused on:
  - Advancing work on the electrical transmission line ('ETL') work scope with the first draft of the power system studies complete.
  - Power systems studies that are required as part of the ETL connection agreement have commenced.
  - Work continues to advance on the design and planning of civil and overhead services modifications required along the oversized transport route with designs to relocate overhead electrical services approximately 90% complete.
- Field exploration activities continued to advance during the quarter. The FY24 exploration program is focused on:
  - Defining limestone resources in close proximity to the Sunrise Project; and,
  - Exploring regional tenements for rare earth elements, base metals and copper-gold potential.
- Cash on hand of \$12.7 million as at 31 December 2023.

## OCCUPATIONAL HEALTH AND SAFETY & ENVIRONMENTAL PERFORMANCE

The Company had no lost time injuries or reportable environmental incidents recorded during the quarter.

## SUNRISE BATTERY MATERIALS COMPLEX

During the quarter, the Company continued to advance the development of the Sunrise Battery Materials Complex. A range of workstreams remain ongoing to progress several value-adding deliverables aimed at minimising the Sunrise Project start time once a financing package is secured and a final investment decision is made. Key work programs included:

- Advancement of the long-lead electrical transmission line (ETL) work scope:
  - A land access licence application over Crown Land lots for the ETL was submitted for approval.
  - The Company also continues to make good progress in securing easement agreements from rural landholders for land access over the planned route of the ETL.
  - O Work is continuing with Essential Energy on the ETL Network Connection Agreement. The planned network connection point is a new substation located 2km north of the existing TransGrid Parkes 132kV substation. The new substation is planned to be constructed to support a new solar farm project (Quorn Park) and other future large connections such as the Parkes Special Activation Precinct. By connecting to this new substation shortens the Projects transmission line by 1.5 km and results in a simplified connection process.
  - SRL's technical consultants, GHD, have completed the first draft of the power systems studies that are required as part of the ETL connection agreement. Initial outcomes from the studies indicate that the existing electrical network can support the Sunrise forecast load and minimal upstream network augmentation will be required. These studies have been submitted to Essential Energy for review.
- Work is progressing on the design and planning of civil and overhead services modifications
  required along the oversized transport route from Port Pirie to the Project site, with engagement
  with key road and power authorities continuing throughout the quarter. Concept civil designs
  have been completed and are currently being review by the various road managers (Councils,
  State Road Authorities).
  - Survey activities have been completed along the route and are being included into the detailed civil designs for issue to the various road managers for approval.
  - o Designs to relocate overhead electrical services are 90% complete and are being reviewed by Essential Energy.

- The South Australian Department of Infrastructure and Transport (SADIT) is currently reviewing the proposed civil route modification designs.
- Drilling of three new water production bores was completed in late 2023. Compulsory pump testing of the bores has been awarded to a drilling contractor and pump testing commenced in early January 2024. Each bore is required to be pumped for a 72-hour duration with drawdown and recovery monitored within the pumping bore and nearby bores. Early indications are that the water flow rates achieved from the bores are comfortably sufficient to meet the Project's operational needs.

## **Project Financing**

The Company continues to proactively engage with a range of participants in the electric vehicle (EV) industry with a view to securing project-level equity funding, in conjunction with offtake, to underpin a complete financing package for Sunrise. The partnering process remains ongoing, however the targeted timing for completion of any transaction is not possible to forecast.

## **US Refinery Evaluation**

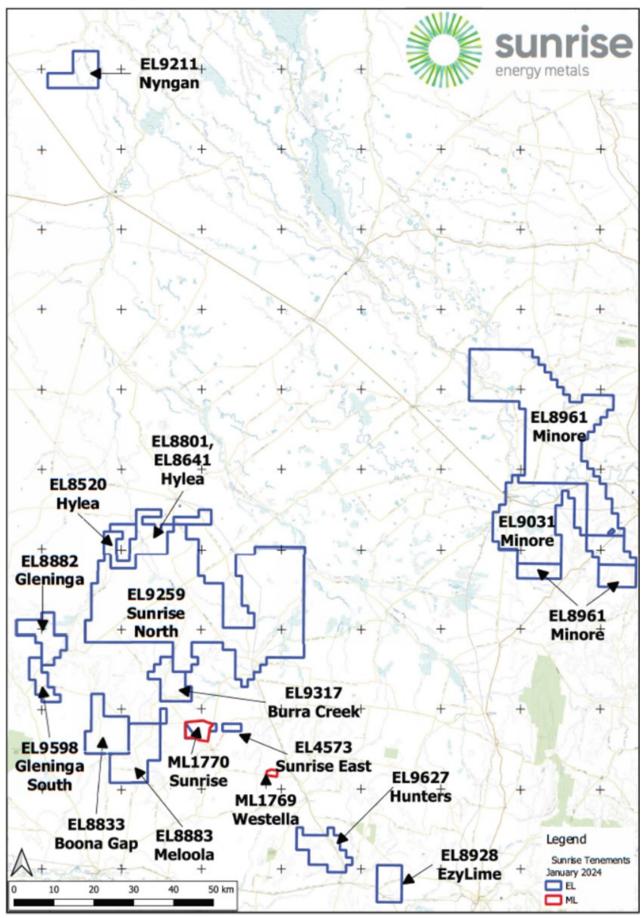

Sunrise Energy Metals previously announced that feedback from both the auto sector and US Government agencies indicated the potential for locating Sunrise's nickel and cobalt sulphate refinery in the United States (refer to ASX release of 28 September 2023). The Company, in conjunction with its advisors, continues to evaluate the possibility of the relocation of the refinery to the United States, with a focus on eligibility criteria under US Government funding initiatives which are aimed at supporting the development of new critical minerals supply.

### **EXPLORATION ACTIVITIES**

The Company continues to advance activities across its range of exploration assets in New South Wales. The FY24 exploration programme is focused on:

- Defining limestone resources in close proximity to the Sunrise Project; and,
- Exploring regional tenements for rare earth elements ('REE'), base metals and copper-gold potential.

Given the approximately 50 years of existing mine life at the Sunrise Project, the Company is not seeking to add additional nickel and cobalt laterite resources. Rather, delineation of limestone resources, a key reagent required for the Sunrise processing flow sheet, is the priority. The FY24 exploration work program is aimed at advancing the highest priority limestone targets closest to the Sunrise Project site.

Sunrise Energy Metals' Tenement Holdings in New South Wales

## **Limestone Exploration**

#### EL8883 Meloola and EL8833 Boona Gap

- During the quarter the drilling tendering process was initiated for the planned drilling at Meloola and Boona Gap.
- A program of auger drilling and reverse circulation ('RC') drilling for limestone is expected to commence in February 2024 across the two tenements. Preliminary auger drilling (which is cheaper than RC drilling) will be used to test the depth of surface cover over the interpreted limestone deposit. Follow-up RC drilling will take place to test the grade and extent of limestone in areas where the cover is shallow enough to potentially support economic mining of the limestone.

#### Hunters (EL9627)

- During the quarter the Company was granted a new Group 2 (limestone) exploration licence EL9627 - Hunters. The Hunters prospect is approximately 50km by road from the Sunrise Project. The third-party contracted supplier of limestone for the Project is around 75km from the Sunrise Project.
- Field mapping of EL9627 and sampling of untested surface expressions of limestone are to commence shortly.

#### Gleninga (EL8882)

• The Company is negotiating a land access agreement with a landowner to allow field staff to map and sample areas to extend the known occurrences of limestone in the western part of EL8882.

### Rare Earth Elements Exploration

#### Minore (EL9031 and EL8961)

- During December 2023 RC drill collar locations were finalised for the pending Minore RC drilling program.
- The drilling tendering process for the Minore program has been initiated and it is anticipated that drilling will commence in February 2024.
- Final surface geochemistry results were received from ALS for Minore REE, with results to be plotted and analysed in the current quarter.

## CORPORATE

Cash on hand was \$12.7 million as at 31 December 2023.

Payments to related parties and their associates during the quarter as outlined in Section 6 of the accompanying Appendix 5B to this quarter's activities report were \$219,000. These payments are for salaries, superannuation, advisory and consultancy fees paid to directors and/or director related entities during the quarter.

#### **About Sunrise Energy Metals Limited**

Sunrise Energy Metals Limited (ASX:SRL) is progressing its world-class Sunrise Battery Materials Complex in New South Wales. The Sunrise Project is one of the largest and most cobalt-rich nickel laterite deposits in the world and is development-ready, with all key permits and approvals in place. Sunrise is also one of the largest and highest-grade scandium deposits globally.

#### **Forward Looking Statements**

Certain statements in this news release may constitute "forward-looking statements or "forward-looking information" within the meaning of applicable securities laws. Such statements involve known and unknown risks, uncertainties and other factors, which may cause actual results, performance or achievements of the Company or industry results, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements or information. Such statements can be identified by the use of words such as "may", "would", "could", "will", "intend", "expect", "believe", "plan", "anticipate", "estimate", "scheduled", "forecast", "predict" and other similar terminology, or state that certain actions, events or results "may", "could", "would", "might" or "will" be taken, occur or be achieved. These statements reflect the Company's current expectations regarding future events, performance and results, and speak only as of the date of this new release. Readers are cautioned not to place undue reliance on forward-looking information or statements.

Although the forward-looking statements contained in this news release are based upon what management of the Company believes are reasonable assumptions, the Company cannot assure investors that actual results will be consistent with these forward-looking statements. These forward-looking statements are made as of the date of this news release and are expressly qualified in their entirety by this cautionary statement. Subject to applicable securities laws, the Company does not assume any obligation to update or revise the forward-looking statements contained herein to reflect events or circumstances occurring after the date of this news release. 7.6	Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.		tional financing

8.	Estimated cash available for future operating activities	\$A'000
8.1	Net cash from / (used in) operating activities (item 1.9)	(2,069)
8.2	(Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	-
8.3	Total relevant outgoings (item 8.1 + item 8.2)	(2,069)
8.4	Cash and cash equivalents at quarter end (item 4.6)	12,711
8.5	Unused finance facilities available at quarter end (item 7.5)	-
8.6	Total available funding (item 8.4 + item 8.5)	12,711
8.7	Estimated quarters of funding available (item 8.6 divided by item 8.3)	6.1
	Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, an Otherwise, a figure for the estimated quarters of funding available must be included in item 8	
8.8	If item 8.7 is less than 2 quarters, please provide answers to the following	questions:
	8.8.1 Does the entity expect that it will continue to have the current leve	l of net operating

cash flows for the time being and, if not, why not?

Answer:		

8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

Answer:			

8.8.3	Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?		
Answei	r:		
Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.			

#### **Compliance statement**

- This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 22 January 2024

This announcement is authorised for release to the market by the Board of Directors of Sunrise Energy Metals Limited.

#### **Notes**

- 1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
- If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, AASB 6: Exploration for and Evaluation of Mineral Resources and AASB 107: Statement of Cash Flows apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
- Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
- 4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
- 5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
