Directors:

Mr Li, Yijie (Non-Executive Director/Chairman)

Mr Brian Thornton (Managing Director/CEO)

Mr Liu Zhensheng (Non-Executive Director)

Mr Joseph D Corrigan (Non-Executive Director)

Senior Management:

Mr William Lloyd (Operations Consultant)

Mr Glenn Fowles) (Company Secretary)

Mr Tony Amato (CFO)

Quarterly Activities Report December 2023

Highlights

Mount Bevan Project, Western Australia

Iron Ore - Magnetite JV

- Significant progress on a Pre-Feasibility Study (PFS) by the JV Partner Hancock Prospecting Pty Ltd.
- Mine Plan optimisation and financial evaluation model commenced.
- The PFS document is scheduled to be completed in March 2024 after internal peer review.
- On completion of the PFS, equity interests will be Hawthorn 19.6%, Legacy Iron Ore 29.4% and Hancock 51%.

Lithium and Other Minerals JV

- Completed ethnographic and archaelogical Heritage surveys
- Completed early-stage field reconnaissance work and a regional geophysics survey.
- Progressed site planning and Programme of Work ("PoW")
- approvals for mobilisation of drilling contractors in February 2024.
- Hancock has earned a 7.%% interest in the JV as at the end of the December quarter.

Anglo Saxon Gold Project, Pinjin, Western Australia

- The Anglo Saxon JV Partners (Hawthorn Resources 70% and Gel Resources Pty Ltd 30%) undertook a 1,712m RC drilling program late in the quarter.
- Program targeted historical results, designed to meet DMIRS tenement maintenance requirements and assess potential for small 1-5Koz open pit development opportunities to enhance the current underground MRE of 157,000 ozs at 6.1g/t gold.
- Results, received after the close of the quarter, revealed potential opportunities at Harbour Lights with an intersection of 3m at 5.9g/t from 33m and Sulphide to the north, both of which need follow up.
- A contract was signed in December with Paddington Gold Pty Ltd's Paddington mill in Kalgoorlie for the treatment of 35,000 tons of the JVs low grade oxide ore; this is expected to be treated in February 2024 and be cash generative.
- Discussions continue with potential buyers and or JV partners of the Anglo Saxon underground gold project given the company's focus on Mt Bevan magnetite and lithium.
- At the close of the quarter ,Hawthorn had a cash balance of \$13.4m

The Projects

Mount Bevan

The Mount Bevan project is 250 km north of Kalgoorlie and to the SW of Leonora in Western Australia.

The Project is on an extensive exploration tenement (E29/510), which hosts a 1,170 Mt magnetite resource at 34.9% Fe. Refer ASX announcement: Significant Resource Upgrade at Mt Bevan Iron Ore Project, 17 December 2013.

The Company is progressing this world-class magnetite project through a JV partnership with Hancock Magnetite Holdings Pty Ltd (Hancock) & Hawthorn Resources Limited (Hawthorn), and simultaneously exploring for lithium and nickel-copper mineralisation on the tenement.

Iron Ore - Magnetite JV

December Quarter Activities

Progressed Pre-Feasibility Studies (PFS) by the JV Partner Hancock, including.

- Completed iterations of the mine plan optimisation.
- Commenced development of the financial evaluation model.
- Finalising all chapters of the PFS document for internal peer review in February

Proposed March Quarter Activities

 Following internal peer review of the PFS document, it is expected to be finalised for release in March 2024.

Lithium and Other Minerals JV

The JV partners recognise the considerable potential of the Mount Bevan project to host lithium pegmatites and other critical minerals. The Mount Ida fault is spatially related to what is acknowledged as an emerging lithium, caesium, tantalum (LCT) pegmatite corridor following recent discoveries along the fault by neighbouring companies such as Delta Lithium (ASX:DLI); see map of potential LCT corridor below.

Given Mount Bevans' exploration and strategic importance, Legacy and Hawthorn executed a new earn-in and JV for lithium and other minerals agreement with Hancock, announced on 15 June 2023.

December Quarter Activities

- Completed targeted ethnographic and archeological heritage surveys
- Completed field reconnaissance (mapping, rock chip sampling and soil samples) and test work on all samples.
- Completed regional geophysics survey.
- Submitted two PoWs.
- Temporary camp and laydown approved (DMIRS).
- Planned drilling; approval pending (DMIRS).

Proposed March Quarter Activities

• Site activity will commence in February 2024, including earthworks, mobilisation of temporary camp facilities, and appointment of drilling contractors.

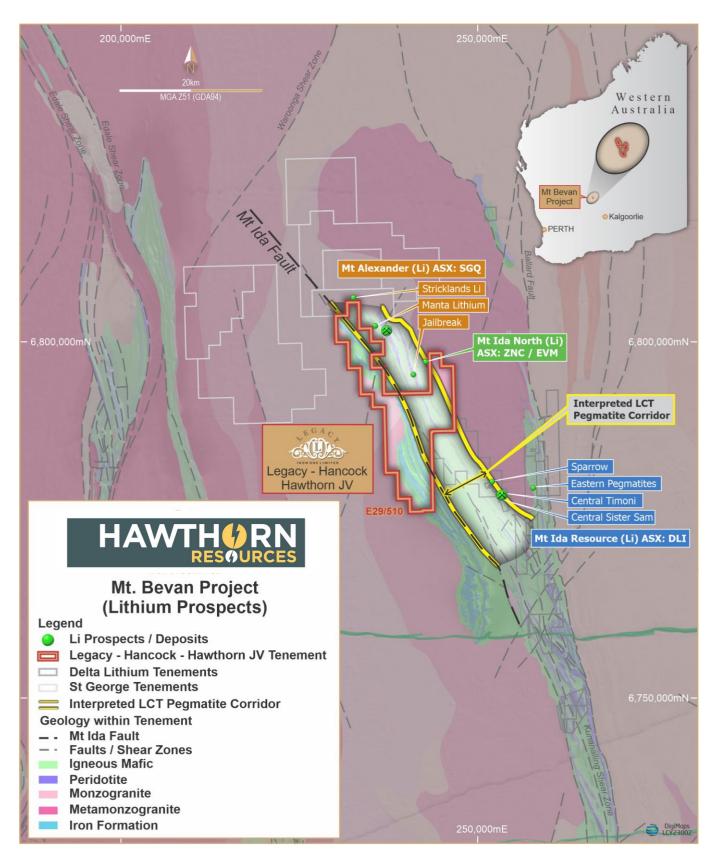

Figure: Mount Bevan Project, LCT pegmatite corridor.

Anglo Saxon Gold - Trouser Legs JV

(Hawthorn Resources Limited - 70% : Gel Resources Pty Ltd - 30%)

At the end of the quarter, the JV commenced a planned 1,800m RC drilling program over the tenement package, completing a total of 1,712m of drilling; see attached map of drill targets below within the Pinjin JV project area. BM Geological Services of Kalgoorlie planned and supervised the program with drilling undertaken by Goldfields Drilling and assays by ALS in Kalgoorlie.

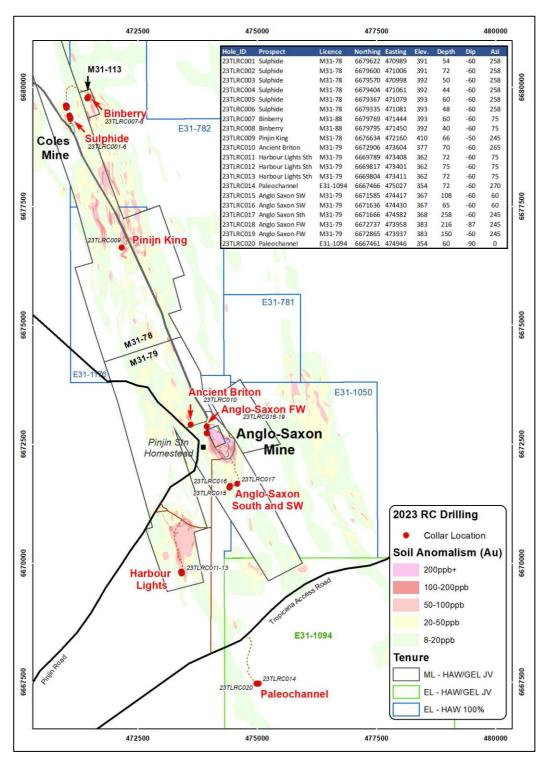

Figure: Anglo Saxon Gold Project, Drilling plan 2023.

The recent program was designed to follow up high priority historical drill results that were extant and needed explanation, also meet DMIRS tenement maintenance requirements and investigate the

potential for satellite, shallow open pittable resources of 1 - 5,000kozs. In todays higher A\$ gold price environment, small open pittable resources are very profitable and justify development.

The addition of more ounces at Anglo Saxon could potentially assist with the economics and scheduling of the development of the current underground MRE of 157,000 ozs at 6.1g/t at todays A\$ gold price of \$3,070/oz (see HAW ASX Quarterly Report of March 2020).

SUMMARY OF RESULTS

Some of the better results of the program were returned from the Harbour Lights prospect where 3 holes of 219m were drilled beneath historical close spaced shallow drilling; hole 23TLRC013 returned an intercept of 3m at 5.9g/t from 33m and 6m at 0.93g/t from 45 m within a zone of 32m at 0.94g/t from 28m. Drilling targeted down dip mineralisation where historical drilling had been left open at depth on some sections, despite the presence of very high grades up to 100g/t.

Following the latest program, the potential now exists to conduct further drilling and assess the potential for a small high grade resource at Harbour Lights which is on a granted ML.

At Sulphide, which is immediately to the north of the Coles open pit, the six hole program infilled historical low grade steeply dipping mineralisation which extends over a 400m strike length. The intention was to infill and extend the potential of historical results to delineate higher grade zones that could be mined by open cut.

Best results of the program were in hole 23TLRC 001 for 7m at 1.3g/t including a 2m void, and 2m at 2.9g/t including 1m at 4.7g/t. In hole 23TLRC005 drilling returned a composite zone of 26m at 0.6g/t from 32m which ended in mineralisation.

Anglo Saxon Gold Project, RC Drilling at Sulphide prospect, Pinjin 2023.

Given the location of Sulphide, which is contiguous to the Coles open pit and our dedicated haul road, it is proposed that an IP program be undertaken over the ground to better understand the structural

controls of the mineralisation and its resource potential. A remnant gold resource also exists at Coles underpinning the rationale for further work on the Sulphide tenement.

Drilling also targeted mineralisation in the main zone of the Anglo Saxon footwall with 2 holes drilled; the best results were 2m at 2.61g/t from 55m plus a further 1m at 1.75g/t from 197m; no other significant intersections were confirmed in the 2 holes which failed to replicate historical high grade results. At the southern end of the Anglo Saxon pit, the best result returned was 6m at 1.13g/t including 1m at 4.6g/t from 104m. In the event of an underground development at Anglo Saxon, the most cost effective drill out of the resource would be from underground benches.

Overall the recent drill program elevated both the Sulphide and Harbour Lights targets and confirmed that the both the footwall and Anglo Saxon south targets were best drilled from underground benches.

Hole	Prospect	From (m)	To (m)	Int. (m)	Au ppm	Metal g*m	Comments

Figure : Anglo Saxon Gold Project, Significant intersections 2023.

ANGLO SAXON GOLD - OTHER

The Joint Venture partners confirm that they are continuing to explore avenues for the development of the current underground resource against the backdrop of a higher A\$ gold price, including outright sale or joint venture. The main development constraint of the current underground is a lack of nearby processing facilities.

At the end of the quarter the JV signed a contract with Paddington Gold Pty Ltd in Kalgoorlie for the treatment of our low-grade oxide stockpile totalling approximately 35,000 tons. This remaining stockpile will generate a significant cash surplus for the JV during the current quarter. Once completed, the JV will endeavour to finalise treatment of its remaining fresh ore stockpiles of approximately 70,000 tons.

Other Assets

The Company's remaining assets include the small Edjudina mining lease (Hawthorn 100%) and a 10.6% interest in the unlisted Black Raven Mining Limited.

As confirmed in our earlier releases, Hawthorn is seeking to exit its Edjudina project and is in advanced discussions with a buyer of the tenement. The licence has a small underground gold resource. The Black Raven Investment has seen no activity for a number of quarters and has been fully impaired.

Corporate Update

Issued Securities - ASX Limited securities code: "HAW"

The number of ordinary fully paid shares on issue and quoted on the official lists of the ASX at 31 December 2023 was 335,015,613 fully paid ordinary shares (30 September 2023: 335,015,613 shares) as held across 1,708 shareholder accounts (30 September 2023: 1,728).

At 31 December 2023 the Top 20 Shareholdings held 246,352,687 shares (30 September 2023: 245,922,672 shares) being 73.5 per cent of the number of shares on issue (30 September 2023: 73.4 per cent).

Funding/Cash Balance/Working Capital

At 31 December 2023 the Company held funds-on-hand of A\$13.399 million (30 September 2023: A\$13.716 million). For full details of Cashflow movements refer to the Appendix 5B Report accompanying this Quarterly Activities Report.

The reported funds on hand at quarter end relate to the movement in cash during the quarter under review and are not to be confused with the accrual accounting system applicable in the preparation and audit of financial statements.

As at the quarter end the Company and the Trouser Legs Mining Joint Venture ("TLMJV"), as managed by the Company, as required under accounting standards, accrue and account for expenditures and revenues incurred/generated during the quarter but have not, as at quarter end, been paid or received.

Such accrued outflow items include Joint Venture Distributions and Accrued Expenditures, such as Trading Creditors, GST Collections and Credits, Local Government rates/taxes, mining operations closure and rehabilitation of mine site.

7.3	Other (please specify)	-	-	
7.4	Total financing facilities	-	-	
7.5	Unused financing facilities available at qu	arter end	-	
7.6	Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end,			

include a note providing details of those facilities as well.

8.	Estimated cash available for future operating activities	\$A'000	
8.1	Net cash from / (used in) operating activities (Item 1.9)	(317)	
8.2	Capitalised exploration & evaluation (Item 2.1(d))	-	
8.3	Total relevant outgoings (Item 8.1 + Item 8.2)	(317)	
8.4	Cash and cash equivalents at quarter end (Item 4.6)	13,399	
8.5	Unused finance facilities available at quarter end (Item 7.5)	-	
8.6	Total available funding (Item 8.4 + Item 8.5)	13,399	
8.7	Estimated quarters of funding available (Item 8.6 divided by Item 8.3)	42	

- 8.8 If Item 8.7 is less than 2 quarters, please provide answers to the following questions:
 - 1. Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?

:	
	Answer:
	N/A

2. Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

Answer:		
N/A		

3. Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer:				
N/A				

Compliance statement

1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.

2 This statement gives a true and fair view of the matters disclosed.

Signed: Date: 30/01/2024.

Name: Glenn Fowles – Company Secretary

Authorised by the Board.

Notes

- 1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
- 2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, AASB 6: Exploration for and Evaluation of Mineral Resources and AASB 107: Statement of Cash Flows apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
- 3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
- 4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
- 5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.

Competent Person Statement

The information in this report that relates to the Trouser Legs Gold Project in Western Australia is based on information compiled by Mr Joseph Clarry, an employee of BM Geological Services. Mr. Clarry is a Member of the Australian Institute of Geoscience (AIG). Mr Clarry has been engaged as consultant by Hawthorn Resources Limited. Mr Clarry has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Clarry consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.
