

## Despatch of Non-Renounceable Entitlement Offer Documents

Bluechiip Limited (**Bluechiip** or the **Company**) (**ASX: BCT**) is pleased to advise that the following documents in relation to its 5-for-7 non-renounceable entitlement offer (**Entitlement Offer**) have been despatched today to Eligible Shareholders, being Bluechiip shareholders as at 7:00pm (AEDT) on Thursday, 8 February 2024 with a registered address in Australia and New Zealand:

- Non-renounceable entitlement offer booklet (**Offer Booklet**); and
- Personalised entitlement and acceptance form.

The Company confirms that the Entitlement Offer contained in the Offer Booklet is now open and will close at 5:00pm (AEDT) on Thursday, 7 March 2024 (unless otherwise extended) (**Closing Date**). The Closing Date is the last date that entitlement and acceptance forms and payment will be accepted by the Company (as stated in the indicative timetable included in the Offer Booklet).

**END.**

**Authorised for release by the Bluechiip Limited Board**

### **About Bluechiip Limited**

Bluechiip understands that every biological sample – stem cells, blood, eggs, sperm and other biospecimens – is critical, so our objective is to manage each one with optimal quality in the most efficient way. Bluechiip's Advanced Sample Management Solution is the only one that provides sample temperature with ID in cryogenic environments, driving productivity and improving quality. Bluechiip's solution delivers confidence in every sample.

Bluechiip's unique patented technology is a MEMS-based wireless tracking solution that contains no electronics. It represents a generational change from current tracking methods such as labels (hand-written and pre-printed), barcodes (linear and 2D), and Radio Frequency Identification. Bluechiip tags are either embedded or manufactured into storage products such as vials or bags. Each product is easily identified and critical information, such as sample temperature, detected by readers and stored in the Bluechiip software. In addition to functioning in extreme temperatures, the Bluechiip<sup>®</sup> Advanced Sample management solution can survive autoclaving, gamma irradiation sterilization, humidification, centrifuging, cryogenic storage and frosting.

Bluechiip listed on the ASX in June 2011. Since then, we have significantly developed our technology. Today it has applications in healthcare, including in cryogenic storage facilities (biobanks and biorepositories), pathology, clinical trials and forensics. Other key markets include cold-chain logistics/supply chain, security/defence, industrial/manufacturing and aerospace/aviation.

**Bluechiip: Delivering confidence in every sample.**
