Full details are set out in the attached Appendix 4D and Interim Financial Report for the half year ended 31 December 2023.

Managing Director and CEO Andrew Strelein said "St Barbara's balance sheet has the strength and liquidity to fund the demonstration of the development potential of the projects in Nova Scotia and the Simberi Expansion in the quickest possible time."

"Net Cash Outflow for the continuing St Barbara business was \$16.6 million, with the close out of taxes and working capital payments on the sale of Leonora Assets consuming \$56.1 million."

"We have moved quickly to eliminate costs that do not directly relate to the demonstration of this development potential or which do not contribute to the preservation of value at Simberi to achieve projected neutral operating cashflow through FY26."

"The Underlying Loss After Tax reflects outcomes consistent with guidance given in October, while the Significant Items largely reflect work done to identify more precisely what will be utilised in the proposed transfer of the Touquoy processing plant to 15-Mile."

- M Hine (appointed 7 September 2023) Non-Executive Director
- W Hallam (appointed 7 September 2023) Non-Executive Director

### **Principal activities**

During the period, the principal activities of the Group were mining and the sale of gold, mineral exploration and project development. The nature of the activities of the Group has increasingly shifted towards a mine development focus with the sale of Leonora Operations in June 2023 and the closure of Touquoy mine in October 2023.

### **Overview of group results**

The consolidated result for the period is summarised as follows:

	Dec 23 \$'000	Dec 22 \$'000

Significant items after tax	(15,340)	(398,535)

Statutory loss is net loss after tax attributable to owners of the parent. (1)

EBIT is earnings before interest revenue, finance costs and income tax expense. (2) (3) EBITDA is EBIT before depreciation and amortisation.

(0) (4) (5) Loss before tax is earnings before income tax expense.

Underlying net loss after income tax is net profit after income tax ("statutory loss") excluding significant items as described in Note 3 to the financial statements.

EBIT, EBITDA and underlying net loss after tax are non-IFRS financial measures, which (6) have not been subject to review or audit by the Group's external auditors. These measures are presented to enable understanding of the underlying performance of the Group by users.

In 2024 St Barbara's strategic focus has moved to prioritisation of the development of the Simberi and Atlantic growth projects. St Barbara undertook several changes in the 2023 financial year ahead of this strategy shift:

- The asset sale of the Leonora operation to Genesis Minerals Limited, resulting in a \$86,733,000 pre-tax profit on sale, and cash proceeds of \$371,596,000.
- The cash repayment of \$159,196,000 to close out the syndicated debt facilities and repayment of the Australian

finance lease of \$4,495,000 to repay Leonora related lease liabilities.

Structural business changes continued into the first quarter of the financial year 2024:

- Simberi transitioned to a future business continuity focus through to the financial year 2026 utilising breakeven cut-off grades to provide sufficient window to allow completion of the Simberi Expansion Project study without incurring potentially unnecessary closure costs and community impact. Consequently, operations at Simberi aim for steady production and cashflow.
- Atlantic's Touquoy operation was closed and the processing plant entered into care and maintenance in October 2023 due to the inability to obtain permits for in-pit tailings deposition within a reasonable timeframe.
- The Company undertook further organisational restructure to significantly reduce the corporate support activities while retaining the core capabilities.

Key 2024 Half-Year achievements include:

- 15-Mile Project Pre-feasibility results announced;
- Updated environmental and social impact assessment for 15-Mile Project advanced;
- Mineral resources at Simberi increased by 0.8 million ounces to 4.8 million ounces;
- Resource definition drilling campaign was commenced at Simberi: and
- Simberi Expansion Project concept Study commenced.

The Group's underlying net loss after tax for the six months ended 31 December 2023 was \$27,326,000. Key elements of the result comprise a net operating loss at Simberi of \$11,814,000 and a net operating gain at Atlantic of \$768,000. In addition, Atlantic care and maintenance costs of \$6,669,000 and exploration costs of \$3,953,000 offset by interest income of \$5,013,000.

Cash on hand was \$167,801,000 at 31 December 2023 excluding restricted cash of \$45,888,000 provided as security for letters of credit issued for the Atlantic reclamation bond and are classified under "Trade and other receivables" in the balance sheet. Of the \$63,139,000 net cash outflows from operating activities, \$56,113,000 did not relate to current business activities as it was in relation to the Leonora asset sale for the settlement of working capital and income tax on the sale.

#### Impact of COVID-19

Simberi Mine was not materially impacted by Covid in the six months to 31 December 2023. A Trigger Action Response Plan is in place to manage the impacts of any new localised COVID-19 outbreak.

(1) Cash operating costs are mine operating costs including government royalties, and after by-product credits. This is a non-IFRS financial measure which has not been subject to review or audit by the Group's external auditors. It is presented to provide meaningful information to assist management, investors and analysts in understanding the results of the operations. Cash operating costs are calculated according to common mining industry practice using The Gold Institute (USA) Production Cost Standard (1999 revision).

(2) AISC is a non-IFRS financial measure which has not been subject to review or audit by the Group's external auditors. It is presented to provide a meaningful measure by which to assess the total sustaining cash cost of operation. It is calculated in accordance with the World Gold Council's Guidance Note on Non-GAAP Metrics – All-In Sustaining Costs and All-In Costs (June 2013).

#### Analysis of Simberi operations

In Financial Year 2024, Simberi shifted focus to maintaining a cash neutral operation, with steady sustainable production profile until 2026. This is an intentional strategy to ensure business continuity, for the benefit of community and costs mitigation, whilst the Sulphide Expansion Feasibility project is completed. Simberi produced 23,348 ounces in the half despite the loss of six days of production at the end of Q2 due to an unplanned SAG mill stoppage.

Total mine operating costs at Simberi during the period was \$90,865,000 reflecting higher maintenance costs for historically underinvested plant, input costs such as consumables and freight and higher overhead costs.

Sustaining capital expenditure of \$3,874,000 was higher than the comparative period due to the focus on increasing plant and

mining reliability including structural repairs and the purchase and upgrade of mobile plant and equipment.

Growth capital expenditure in the period was \$854,000 focused on Simberi Expansion Project.

#### Analysis of Atlantic operations

Atlantic production for the period of 6,480 ounces (2022 comparative period: 21,546 ounces) with gold production from Touquoy operation ceasing in September.

Growth capital expenditure in the period was \$3,781,000 focused on development projects such as 15-Mile, Beaver Dam and Cochrane Hill.

#### Debt management and liquidity

The available cash balance at 31 December 2023 was \$167,801,000 (30 June 2023: \$247,037,000) with an additional \$45,888,000 held as restricted cash, for the Atlantic reclamation bond. and reported within trade and other receivables.

Total interest bearing liabilities decreased to \$7,982,000 as at 31 December 2023 (30 June 2023: \$12,875,000), with the balance comprising \$1,638,000 (2022: \$3,938,000) in 'right of-use asset' lease liabilities, finance leases of \$5,934,000 (2022: \$7,497,000) and \$461,000 (2022: \$1,497,000) relating to the insurance premium funding.

The AUD/USD exchange rate as at 31 December 2023 was 0.6812 (30 June 2023: 0.6668).

The AUD/CAD exchange rate as at 31 December 2023 was 0.9022 (30 June 2023: 0.8826).

(1)

At 30 June 2023, the capital return was approved by shareholders and declared at or prior to 30 June 2023, hence a liability for the amount payable had been recognised. The Genesis Minerals shares held for capital return and the capital return payable netted off when the capital return was completed in July 2023. Trade and other receivables include cash of \$45,888,000 (30 June 2023: \$46,907,000) placed on deposits in the form of letters of credit for the reclamation security bond at Atlantic Gold Operation. The Group has two operational business units: Simberi operations and Atlantic Gold operations. The Leonora operation was sold as part of an asset sale on the 30 June 2023 and is therefore reported as a discontinued operation. The operational business units are managed separately due to their separate geographic regions. The measurement of segment results is in line with the basis of information presented to the Group's Executive Leadership Team for internal management reporting purposes. The performance of each segment is measured based on production, revenue, costs, EBITDA ('Segment Result') capital expenditures and cash flow generation.

#### Accounting judgements and estimates

At each reporting date, the Group performs a review of the probable future taxable profit in each jurisdiction. The assessments are based on the latest life of mine plans relevant to each jurisdiction and the application of appropriate economic assumptions, such as gold price and operating costs. Any resulting recognition of deferred tax assets is categorised by type (e.g. tax losses or temporary differences) and recognised based on which would be utilised first according to that particular jurisdiction's legislation.

At 31 December 2023, the Australian tax consolidated group did not have any unused tax losses.

### 3 Significant items

Significant items are those items where their nature or amount is considered material to the financial report. Such items included within the consolidated results for the period are detailed below.

Total significant items – post tax	(15,340)	(398,535)

### (1) Business development costs

Costs relating to business development included due diligence costs, legal and consulting fees.

### (2) Accelerated depreciation

Atlantic's Touquoy operation was closed and the processing plant entered into care and maintenance in October 2023. This has resulted in the accelerated depreciation of plant and equipment that will not be reused in future projects and has a minimal resale value.

### (3) Inventories write-down

As a result of the Atlantic processing plant entering into care and maintenance in October 2023, the write down of gold ounces carried in the gold in circuit have been fully provided for as there is uncertainty of gold recovery.

#### (4) Redundancy costs

The redundancy costs relate to payments made to employees for roles made redundant as part of the organisation restructure and cost reduction program.

#### Borrowings

Borrowings are initially recognised at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in the consolidated statement of profit or loss over the period of the borrowings using the effective interest method. Fees paid on the establishment of loan facilities, which are not incremental costs relating to the actual draw down of the facility, are recognised as prepayments and amortised on a straight line basis over the term of the facility.

Aside from finance leases for assets in Simberi, the Group does not have any other secured debt facility at 31 December 2023.

Balance at end of year	124,712	127,960

(1) Represents an increase in real discount rate applied to the rehabilitation provision at all operations. This increase was reflective of the increase in the long term government bond rates.

Provisions, including those for legal claims and rehabilitation and restoration costs, are recognised when the Group has a present legal or constructive obligation as a result of past events, it is more likely than not that an outflow of resources will be required to settle the obligation, and the amount has been reliably estimated. Provisions are not recognised for future operating losses.

The Group has obligations to dismantle, remove, restore and rehabilitate certain items of property, plant and equipment and areas of disturbance during mining operations.

A provision is made for the estimated cost of rehabilitation and restoration of areas disturbed during mining operations up to reporting date but not yet rehabilitated. The provision also includes estimated costs of dismantling and removing the assets and restoring the site on which they are located. The provision is based on current estimates of costs to rehabilitate such areas, discounted to their present value based on expected future cash flows. The estimated cost of rehabilitation includes the current cost of contouring, topsoiling and revegetation to meet legislative requirements. Changes in estimates are dealt with on a prospective basis as they arise.

There is some uncertainty as to the extent of rehabilitation obligations that will be incurred due to the impact of potential changes in environmental legislation and many other factors (including future developments and price increases). The rehabilitation liability is remeasured at each reporting date in line with changes in the timing and /or amounts of the costs to be incurred and discount rates. The liability is adjusted for changes in estimates. Adjustments to the estimated amount and timing of future rehabilitation and restoration cash flows are a normal occurrence in light of the significant judgments and estimates involved.

#### Accounting judgements and estimates

Mine rehabilitation provision requires significant estimates and assumptions as there are many transactions and other factors that will ultimately affect the liability to rehabilitate the mine sites. Factors that will affect this liability include changes in regulations, prices fluctuations, physical impacts of climate change and changes in timing of cash flows which are based on life of mine plans. When these factors change or are known in the future, such differences will impact the mine rehabilitation provision in the period in which it becomes known.

	\$'000	\$'000
Current		
Genesis Minerals shares held for capital return	-	267,525
Non-current		
Australian listed shares and equity	26,109	20,495

At the 31 December 2023 reporting date, the Group's financial assets of \$26,109,000 (30 June 2023: \$288,020,000) represented investments in shares of entities listed on the Australian Securities Exchange, which are valued using Level 1 inputs.

These level 1 financial assets of \$26,109,000 (2022: 20,495,00) relate to the Company's investment in the following Australian Securities Exchange listed companies:

- Peel Mining Limited (PEX)
- Catalyst Metals Limited (CYL)
- Kin Mining NL (KIN)
- Genesis Minerals Limited (GMD)

The Group recognised Level 1, 2 and 3 financial assets on a recurring fair value basis as at 31 December 2023 as follows:

**Level 1:** The fair value of financial instruments traded in active markets is based on quoted market prices at the end of the reporting period. The quoted marked price used for financial assets held by the group is the close price. These instruments are included in level 1.

**Level 2:** The fair value of financial instruments that are not traded in an active market is determined using valuation techniques, which maximise the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

**Level 3:** If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. This is the case for unlisted equity securities.

### 8 Events occurring after the half – year balance sheet date

The Directors are not aware of any matter or circumstance that has arisen since the end of the reporting period that, in their opinion, has significantly affected or may significantly affect in future years the Company's or the Group's operations, the results of those operations or the state of affairs.

### 9 Contingencies

As a result of routine and regular tax reviews and audits by tax authorities in each jurisdiction, the Group anticipates that reviews and audits may occur in the future. The ultimate outcome of any future reviews and audits by tax authorities cannot be determined with an acceptable degree of reliability at this time. Nevertheless, the Group believes it is making adequate provision for its tax liabilities, including amounts shown as deferred tax liabilities, and takes reasonable steps to address potentially contentious issues with the tax authorities.

### **10 Basis of Preparation**

#### Significant accounting policies

The accounting policies applied by the Group in this consolidated half year financial report are the same as those applied by the Group in its consolidated financial report as at and for the year ended 30 June 2023. These accounting policies are consistent with Australian Accounting Standards.

The Group has adopted all the new and revised Standards and Interpretations issued by the AASB that are relevant to its operations and effective for the current half-year report. Accounting policies are applied consistently by each entity in the Group.

#### Critical accounting judgement and estimates

The preparation of the half year financial report requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expenses. Actual results may differ from these estimates.

In preparing this consolidated half year financial report, the significant estimates and judgements made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the most recent annual financial report.

#### Going concern

These financial statements have been prepared on a going concern basis, which assumes the Group will be able to realise its assets and discharge its liabilities in the normal course of business.

### **11 Discontinued operations**

### (a) Description

On 17 April 2023 the Group entered into an agreement with Genesis Minerals Limited in respect of the sale of the Leonora Assets. The disposal was completed on 30 June 2023, on which date control passed to the acquirer. As such, the Leonora business unit has been reported in the current and prior period as a discontinued operation. Financial information relating to the discounted operation for the period to the date of disposal is set out below:

#### (b) Financial performance and cashflow information

The results of the discontinued operations included in the consolidated comprehensive income statement are set out below. The comparative profit and cash flows from discontinued operations are shown in the tables below:

### Independent auditor's review report to the members of St Barbara Limited

Report on the half-year financial report

### Conclusion

We have reviewed the half-year financial report of St Barbara Limited (the Company) and the entities it controlled during the half-year (together the Group), which comprises the Condensed consolidated balance sheet as at 31 December 2023, the Condensed consolidated statement of changes in equity, Condensed consolidated statement of cash flows and Condensed consolidated comprehensive income statement for the half-year ended on that date, selected explanatory notes and the directors' declaration.

Based on our review, which is not an audit, we have not become aware of any matter that makes us believe that the accompanying half-year financial report of St Barbara Limited does not comply with the *Corporations Act 2001* including:

- 1. giving a true and fair view of the Group's financial position as at 31 December 2023 and of its performance for the half-year ended on that date
- 2. complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*.

### **Basis for conclusion**

We conducted our review in accordance with ASRE 2410 *Review of a Financial Report Performed by the Independent Auditor of the Entity* (ASRE 2410). Our responsibilities are further described in the *Auditor's responsibilities for the review of the half-year financial report* section of our report.

We are independent of the Group in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the Accounting Professional & Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to the audit of the annual financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

### Responsibilities of the directors for the half-year financial report

The directors of the Company are responsible for the preparation of the half-year financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the half-year financial report that gives a true and fair view and is free from material misstatement whether due to fraud or error.

### Auditor's responsibilities for the review of the half-year financial report

Our responsibility is to express a conclusion on the half-year financial report based on our review. ASRE 2410 requires us to conclude whether we have become aware of any matter that makes us believe that the half-year financial report is not in accordance with the *Corporations Act 2001* including giving a true and fair view of the Group's financial position as at 31 December 2023 and of its

performance for the half-year ended on that date, and complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*.

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.
