Field Solutions wins \$2.6M Glencore Rolleston Village Upgrade

Field Solutions Holdings (ASX: FSG), Australia's leading rural, regional and remote telecommunications carrier, is pleased to announce that it has entered into an agreement to upgrade the connectivity infrastructure at Glencore's Rolleston village.

Highlights

- Initial Contract Value of \$2.6M
- Utilises FSG's Regional Broadband network infrastructure
- Upgrade Camp to state-of-the-art XGS-PON (10Gb Gigabit Passive Optical network) backbone
- Deliver new enhanced Internet, Foxtel and Free-to-Air media services to over 350 accommodation blocks
- Accelerated delivery timeline with planned completion by end of 2024

Field Solutions Group's mining division continues its growth, adding both capability and capacity to its impressive portfolio of mining-oriented technology solutions.

"Field Solutions is proud to add Glencore to its roster of premier Mining customers alongside Kestrel Coal and Ravenswood Gold" said Andrew Roberts, CEO of Field Solutions Group.

"The solution underscores our commitment to delivering state-of-the-art telecommunications solutions that meet the evolving needs of modern enterprises and communities. By integrating Cambium's XGS-PON technology, the company is set to provide unparalleled internet speed, reliability, and scalability, ensuring that residents of the work camp enjoy a seamless online experience." Roberts added.

As foreshadowed at FSG's AGM last November, this project showcases the unique benefits that Field Solutions provides to its enterprise clients, by utilising our rural and remote infrastructure, networks, and our local regional workforce, to effectively meet the demands of critical enterprise IT needs.

Cambium Networks' XGS-PON technology stands at the forefront of optical network innovations, offering superior bandwidth, enhanced security, and extensive coverage. This project not only signifies a monumental step in our mission to bridge connectivity gaps but also reinforces our position as pioneers in adopting next-generation technologies to solve real-world challenges.

The upgrade will cater to the high-density living environment of the work camp, accommodating the diverse and demanding internet needs of its residents. From high-speed data transmission to robust internet access and media across 1,001 rooms, the project aims to set a new standard for connectivity in work camps and similar settings.

FSG's delivers a wide variety of specialised services to support rural and remote enterprises like mining operations, agribusiness, and local government. Key to our success, is our in-place regional telecommunications infrastructure, which delivers business-grade critical communications and, in its latest iteration, now includes Private LTE adding mobile communications, IoT and other critical service options for rural and remote enterprises.

This announcement has been authorised for release by the Board of FSG.

About FSG

FSG provides, builds, and operates "true broadband networks" specifically for rural, regional and remote Australia. FSG is a licensed Australian telecommunications carrier, providing services via its own telecommunications network (trading under the brands 'JustISP' and 'Ant Communications) and a NBNco Retail Service Provider.
