5 April 2024

Patent Infringement Case Dismissed

Mach7 Technologies Limited ("M7T" or "the Company") (ASX:M7T), a company specialising in innovative imaging software solutions, today advises that the patent infringement lawsuit brought by AI Visualize, Inc. has been dismissed on appeal.

On 4 April 2024,[1] the United States Court of Appeals for the Federal Circuit affirmed a lower court's dismissal of patent infringement claims asserted by AI Visualize, Inc., a Texas Corporation against Nuance Communications, Inc. and Mach7 Technologies, Inc., a wholly-owned subsidiary of Mach7 Technologies Limited.[2]

In affirming the decision of the United States District Court for the District of Delaware, the Court of Appeals held that the subject patent claims "are patent ineligible because they are directed to an abstract idea and fail to transform that abstract idea into patent-eligible subject matter."

In doing so, the Court confirmed that Mach7 Technologies, Inc. did not infringe on any patents.

M7T is pleased with the affirmation of this dismissal and the closure of this legal action.

[1] United States time

[2] In July 2022, Mach7 announced that the United States District Court for the District of Delaware had dismissed AI Visualize's claims of wilful infringement on the grounds that the patents were not eligible for patenting. In August 2022, Mach 7 received notice that AI Visualize had appealed the dismissal to the United States Court of Appeals for the Federal Circuit. The appeal was heard in October 2023.

ASX Announcement

About Mach7 Technologies

Mach7 Technologies (ASX:M7T), founded in 2007, is a medical imaging systems provider that develops innovative image management and viewing solutions for healthcare organizations. The core of these offerings is the Mach7 Enterprise Imaging Solution, encompassing Enterprise Data Management, Enterprise Diagnostic Viewing and Departmental Workflow applications. Mach7's Enterprise Data Management solution, consisting of a powerful Vendor Neutral Archive (VNA) and data administration tools, allows for the fast storage, access, retrieval and viewing of images across a healthcare network with connectivity to the Cloud. In July 2020, Mach7 acquired Client Outlook and the eUnity Enterprise Diagnostic Viewing technology to augment Mach7's Enterprise Data Management and Departmental Workflow applications. eUnity is a zero-footprint, FDA-approved, image viewing solution that makes images accessible on any workstation. This offers healthcare professionals consolidated access to all patient images and data, ensuring radiologists and clinical staff have timely access to the right information to diagnose and treat patients. Uniquely, the company also gives customers independence to deploy its solutions either on a component basis or in a unified comprehensive platform. With more than 165 customers across 15 different countries, Mach7 has built a global network of diverse customers that range from expansive Integrated Delivery Networks, National Health Systems, medical research facilities, and large academic medical institutions to regional community hospitals, private radiology practices, and independent provider groups.
