Third quarter update and cashflow

Highlights:

- **Cash Receipts from sales in excess of \$353k for the quarter.**
- **\$835k in cash held at end of quarter.**

30th April 2024 – IoT solutions company, Constellation Technologies Limited (ASX: CT1) (the “Company” or “Group”) is pleased to provide a summary update on its activities for the quarter ending 31 March 2024.

Sales

During the quarter, cashflows from sales activities reached \$353k. Although slightly down on the previous quarter as a result of payment terms, receipts and sales originations are remaining relatively consistent due to new installations our flagship product, the Callisto Food Safety & Compliance (FSC) system.

The FSC system also received several upgrades during the quarter, the most crucial being to address aspects of food safety management such as a comprehensive 22 allergen list model, ensuring compliance with emerging regulations and meeting diverse consumer needs.

We continued to focus on process automation within the product to improve endpoint and cooling processes which in turn effect operational efficiency, boost productivity and cut operational costs for the end user.

Expenditure & other activities

The Company continues to operate on a cost efficiency basis, with a net cash surplus from operating activities of \$106k for the quarter. Product and operating costs were higher than previous quarters due to the increase in sales activity, however were offset by the receipt of the FY23 R&D Tax rebate of \$299k.

Related party cash payments for the quarter were \$56k and consist of salary related payments for CEO, Kartheek Munigoti; director’s fees to two of the Company’s two non-executive directors and office rental and legal fees paid to entities associated with Mr Nicholson. No cash payments have been made to Mr Malone for his directors fees to date.

The board thanks all shareholders for their continued support and interest in the Company.
