

ASX Announcement

30 April 2024

CLEANSING NOTICE PURSUANT TO PARAGRAPH 708A(5)(e) OF THE CORPORATIONS ACT 2001

This notice is given by **Alvo Minerals Limited (ASX: ALV)** ("**Alvo**" or the "**Company**") under section 708A(5)(e) of the *Corporations Act 2001* (Cth) ("**Corporations Act**").

The Company advises that it has today issued 22,857,143 fully paid ordinary shares in Alvo as set out in the Appendix 2A.

Alvo gives notice that:

1. the Shares were issued without disclosure to the investors under Part 6D.2 of the Corporations Act;
2. as at the date of the issues of the Shares and this notice, the Company has complied with:
 - i. the provisions of Chapter 2M of the Corporations Act as they apply to the Company; and
 - ii. section 674 of the Corporations Act; and
3. as at the date of this notice there is no excluded information required to be disclosed under section 708A(6)(e) of the Corporations Act.

Yours faithfully

A handwritten signature in black ink, appearing to read "Carol Marinkovich", is written over a light grey rectangular background.

CAROL MARINKOVICH
Company Secretary

This announcement has been approved for release by the Managing Director of Alvo Minerals Limited.

ABOUT ALVO

Alvo Minerals (ASX: ALV) is an active critical minerals exploration company, with an established exploration base in central Brazil.

The Company was founded to explore for base and precious metals, hunting high-grade copper and zinc at its Palma Project, adjacent to the Company's Bluebush REE Project. The Palma Project has a JORC 2012 Inferred Mineral Resource Estimate of 4.6Mt @ 1.0% Cu, 3.9% Zn, 0.4% Pb & 20g/t Ag.

Alvo is also exploring for Rare Earth Elements (**REE**) at the Bluebush Ionic Clay REE Project in Central Brazil. Bluebush is adjacent to and along strike from the privately-owned Serra Verde Ionic Clay REE Project, which is the only Ionic Clay REE project in commercial production outside of China.

Alvo's Ipora REE Project is an exciting greenfields exploration project targeting the Iporá alkaline intrusive complex, considered highly prospective for REEs, potentially of the highly valued ionic clay type. The Ipora REE Project is located in the State of Goiás and is on similar geology and located adjacent to the PCH REE Project (Appia Rare Earths and Uranium Corporation, CSE:API).

Alvo's strategic intent is to aggressively explore and deliver growth through discovery, leveraging managements' extensive track record in Brazil. There are three phases to the exploration strategy – Discover, Expand and Upgrade.

Alvo is committed to fostering best-in-class stakeholder relations and supporting the local communities in which it operates.
